ABBREVIATIONS AND ACRONYMS

AQI	Air Quality Index
BIA	Bureau of Indian Affairs
BLM	Bureau of Land Management
BMP	best management practice
BNR	biological nitrogen removal
BOR	Bureau of Reclamation
CARB	California Air Resources Board
California	State of California
CCP	Comprehensive Conservation Plan
CCR	California Code of Regulations
CDFG	California Department of Fish and Game
CDPR	California Department of Parks and Recreation
CDWR	California Department of Water Resources
CEQA	California Environmental Quality Act
CFR	Code of Federal Regulations
cfs	cubic feet per second
CO	carbon monoxide
COE	U.S. Army Corps of Engineers
Compact	Interstate Compact
CWC	California Water Code
DEIS/EIR	draft environmental impact statement/environmental impact report
DO	dissolved oxygen
DSSAMt	Dynamic Stream Simulation and Assessment Model with temperature
EIP	Environmental Improvement Program
EIS/EIR	environmental impact statement/environmental impact report
EPA	Environmental Protection Agency
ESA	Endangered Species Act of 1973, as amended

ºF	degrees Fahrenheit
FR	Federal Register
FWCA	Fish and Wildlife Coordination Act
FWS	U.S. Fish and Wildlife Service
GIS	geographic information system
H_2S	hydrogen sulfide
Interior	U.S. Department of the Interior
LCT	Lahontan cutthroat trout
LRWQCB	Lahontan Regional Water Quality Control Board
LTAB	Lake Tahoe Act Basin
LWSA	Local Water Supply Alternative
M&I	municipal and industrial
MCL	maximum contaminant level
MOU	Memorandum of understanding
msl	mean sea level
MWh	megawatt-hours
NAAQS	National Ambient Air Quality Standards
NASF	Naval Air Station Fallon
NDEP	Nevada Division of Environmental Protection
NDOT	Nevada Department of Transportation
NDOW	Nevada Department of Wildlife
NDWR	Nevada Division of Water Resources
NEPA	National Environmental Policy Act
Nevada	State of Nevada
NHPA	National Historic Preservation Act
No Action	No Action Alternative
NO_2	nitrogen dioxide
NRHP	National Register of Historic Places
NRS	Nevada Revised Statutes
NWR	National Wildlife Refuge

O_3	ozone
OCAP	Operating Criteria and Procedures
operations model	Truckee River Operations Model
P.L.	Public Law
Pb	lead
PM_{10}	particulate matter
POSW	privately owned stored water
PSA	Preliminary Settlement Agreement, as modified by the Ratification Agreement
PSI	Pollution Standard Index
Pyramid Tribe	Pyramid Lake Paiute Tribe of Indians
revised DEIS/EIR	revised draft environmental impact statement/environmental impact report
ROD	Record of Decision
SCORP	State Comprehensive Outdoor Recreation Plan
Secretary	Secretary of the Interior
SHPO	State Historic Preservation Office
Sierra Pacific	Sierra Pacific Power Company
SIP	State Implementation Plan
SO_2	sulfur dioxide
States	California and Nevada
STMWRF	South Truckee Meadows Water Reclamation Facility
SWRCB	California State Water Resources Control Board
TCID	Truckee-Carson Irrigation District
TDS	total dissolved solids
TMDL	total maximum daily load
TMWA	Truckee Meadows Water Authority
TMWRF	Truckee Meadows Water Reclamation Facility
TPEA	Tahoe-Prosser Exchange Agreement
TRA	Truckee River Agreement
TRBWG	Truckee River Basin Water Group
TRIT	Truckee River Basin Recovery Implementation Team
TROA	Truckee River Operating Agreement
TRPA	Tahoe Regional Planning Agency

Truckee Meadows	Reno-Sparks metropolitan area
TTSA	Tahoe-Truckee Sanitation Agency
UNR	University of Nevada, Reno
USFS	U.S. Forest Service
USGS	U.S. Geological Survey
USRS	U.S. Reclamation Service
VRP	visibility-reducing particles
WARMF	Watershed Analysis Risk Management Framework
WCWCD	Washoe County Water Conservation District
WMA	Wildlife Management Area
WQSA	Truckee River Water Quality Settlement Agreement
WRAP	Water Rights Acquisition Program for Stillwater National Wildlife Refuge

TABLE OF CONTENTS

Page

Chapter 1 – Purpose of and Need for Action

I. Proposed Action 1-1
II. Purpose of and Need for Proposed Action 1-2
III. Decision Process and Decisions Needed 1-4
  A. Use of EIS/EIR by the Secretary 1-4
  B. Use of EIS/EIR by California 1-4
  C. Steps to Completion of TROA 1-5
IV. Study Area 1-8
V. Background and History 1-9
  A. History of Reservoir and River Operations 1-9
  B. Water Rights Administration on the Truckee River Today 1-12
  C. Current Reservoir and River Operations in the Truckee River Basin 1-14
VI. Other Authorities 1-15
VII. Participating Agencies 1-15
  A. Signatory Parties 1-15
  B. Cooperating/Responsible Agencies 1-17
  C. Interested Parties 1-17
VIII. Summary of Issues 1-18

Chapter 2 – Alternatives

I. Development of Alternatives 2-1
  A. History of Negotiations 2-1
  B. Development Process for the TROA Alternative 2-2
  C. Alternatives Considered 2-4
II. No Action 2-10
  A. Overview 2-11
  B. Interstate Allocation 2-11
  C. Water Operations and Facilities 2-12
    1. Water Categories 2-12
    2. Floriston Rates 2-12
    3. Reservoir Operations 2-14
    4. Truckee River Hydroelectric Plants 2-20
    5. Water Exportation from Little Truckee River to Sierra Valley 2-20
    6. Municipal and Industrial Water Resources 2-21
    7. Administration, Accounting and Scheduling 2-23
III. LWSA 2-23
  A. Overview 2-23
  B. Interstate Allocation 2-24

Table of Contents - continued

Page

C. Water Operations and Facilities 2-24
1. Water Categories 2-24
2. Floriston Rates 2-24
3. Reservoir Operations 2-24
4. Truckee River Hydroelectric Plants 2-24
5. Water Exportation from Little Truckee River to Sierra Valley 2-24
6. Municipal and Industrial Water Resources 2-25
7. Administration, Accounting, and Scheduling 2-26
IV. TROA 2-26
A. Overview 2-26
B. Interstate Allocation 2-29
1. Lake Tahoe Basin 2-30
2. Truckee River Basin in California 2-30
3. Carson River Basin in California 2-33
C. Water Operations and Facilities 2-33
1. Water Categories 2-33
2. Floriston Rates 2-38
3. Reservoir Operations 2-39
4. Truckee River Hydroelectric Plant Diversion Dams 2-43
5. Water Exportation from Little Truckee River to Sierra Valley 2-44
6. Municipal and Industrial Water Resources 2-44
7. Administration, Accounting, and Scheduling 2-46
8. Additional Elements Unique to TROA 2-46
D. Change Petitions and Water Right Applications 2-48
V. Alternatives Considered and Rejected 2-49
A. Basic TROA Alternative 2-50
B. Streamflow Alternative 2-50
C. Recreational Pools Alternative 2-51
D. Threatened and Endangered Species Alternative 2-51
E. California Assured Storage Alternative 2-51
VI. Identification of the Preferred Alternative (NEPA) and Environmentally Superior Alternative (CEQA) 2-52
VII. Summary of Effects 2-52

Chapter 3 – Affected Environment and Environmental Consequences

I. Background 3-1
A. Study Area Setting 3-1
B. Watercourse of the Truckee River 3-2
C. Geology 3-4
D. Climate 3-5
E. Public Trust Doctrine 3-5

Table of Contents - continued

Page

II. Past Cumulative Effects 3-6
A. Overview 3-6
1. Early Exploration and Settlement 3-6
2. Comstock Era 3-6
3. Lumber Era 3-7
4. Railroads 3-7
5. Farming and Ranching 3-8
6. Early Irrigation and Water Projects 3-8
7. Later Irrigation and Water Projects 3-10
8. OCAP and More Recent History 3-10
B. Past Cumulative Effects on Affected Resources 3-11
1. Water Resources 3-11
2. Water Quality 3-12
3. Sedimentation and Erosion 3-14
4. Biological Resources 3-15
4. Economics and Social Environment 3-24
5. Recreation 3-25
7. Cultural Resources 3-27

General Methods and Assumptions 3-28
I. Comparative Evaluation of Alternatives 3-28
II. Use of the Truckee River Operations Model 3-28
III. Study Assumptions 3-31
A. Population Level and Water Demands 3-31
B. Period of Analysis 3-32
C. Water Rights Transfers 3-32

Water Resources 3-33
I. Affected Environment 3-33
A. Supply 3-33
1. Surface Water 3-33
B. Current Demands 3-38
1. Consumptive Demands 3-38
2. Nonconsumptive Demands 3-40
C. Current Water Management 3-42
1. Truckee River General Electric Decree 3-42
2. Orr Ditch Decree 3-42
3. Tahoe-Prosser Exchange Agreement 3-43
4. Alpine Decree 3-43
5. OCAP 3-43
6. Carson-Truckee Water Conservancy District v. Watt, 1982 3-43
7. Interim Storage Agreement 3-43
8. Truckee River Water Quality Settlement Agreement 3-44

Table of Contents - continued

Page

D. Current Operations 3-44
1. Flood Control 3-44
2. Dam Safety Requirements 3-45
3. Minimum and Bypass Flow Requirements 3-45
4. Floriston Rates 3-45
5. Storing Water in Reservoirs 3-46
6. Truckee River Operations for Pyramid Lake Fishes 3-46
II. Environmental Consequences 3-48
A. Introduction 3-48
B. Summary of Effects 3-49
C. Reservoir Storage and Releases 3-55
1. Method and Operations Model Input Assumptions 3-55
2. Model Results 3-64
3. Evaluation of Effects 3-74
D. Flows 3-83
1. Method of Analysis and Operations Model Input 3-83
2. Model Results 3-83
3. Evaluation of Effects 3-87
E. Exercise of Water Rights to Meet Demand 3-90
1. Method of Analysis 3-90
2. Model Results 3-90
3. Evaluation of Effects 3-92
F. Optional Scenarios 3-96
1. Method of Analysis 3-96
2. Model Results 3-96
3. Evaluation of Effects 3-97
G. Certain Credit Waters 3-104

Groundwater 3-105
I. Affected Environment 3-106
II. Environmental Consequences 3-107
A. Introduction 3-107
B. Summary of Effects 3-108
C. Recharge of the Shallow Aquifer Adjacent to the Truckee River in the Oxbow Reach 3-108
1. Method of Analysis 3-108
2. Threshold of Significance 3-109
3. Model Results 3-109
4. Evaluation of Effects 3-110
5. Mitigation 3-110

Table of Contents - continued

Page

D. Recharge of the Shallow Aquifer in Truckee Meadows 3-110
1. Method of Analysis 3-110
2. Threshold of Significance 3-111
3. Evaluation of Effects 3-111
4. Mitigation 3-111
E. Recharge of the Shallow Aquifer near the Truckee Canal 3-111
1. Method of Analysis 3-112
2. Threshold of Significance 3-112
3. Model Results and Evaluation of Effects 3-112
5. Mitigation 3-113
F. Effects of Well Pumping on the Shallow Aquifer 3-113
1. Method of Analysis 3-113
2. Threshold of Significance 3-113
3. Model Results 3-113
4. Evaluation of Effects 3-114
5. Mitigation 3-114

Water Quality 3-115
I. Affected Environment 3-115
A. Truckee River Basin: Lake Tahoe to Reno 3-115
B. Truckee River Basin: Reno to Pyramid Lake 3-116
II. Environmental Consequences 3-116
A. Introduction 3-116
B. Summary of Effects 3-117
C. Overview of Methods of Analysis 3-120
D. Summary of Pertinent Water Quality Standards for California Waters 3-122
E. Truckee River Flow 3-124
1. Method of Analysis 3-124
2. Threshold of Significance 3-125
3. Model Results 3-125
4. Evaluation of Effects 3-125
F. Violations of Nevada Water Temperature and Dissolved Oxygen Standards 3-126
1. Method of Analysis 3-126
2. Threshold of Significance 3-126
3. Model Results 3-126
4. Evaluation of Effects 3-126
G. Total Dissolved Solids and Nutrient Loadings to Pyramid Lake 3-127
1. Method of Analysis 3-129
2. Threshold of Significance 3-129
3. Model Results 3-129
4. Evaluation of Effects 3-129
5. Mitigation 3-130

Table of Contents - continued

Page

Sedimentation and Erosion 3-131
I. Affected Environment 3-131
A. Shoreline Erosion at Lake Tahoe 3-131
1. Wave Action 3-132
2. Material Properties of Shoreline 3-132
3. Climate 3-134
4. Fluctuating Water Elevation 3-134
B. Stream Channel Erosion and Sediment Transport 3-134
C. Truckee River Delta Formation at Pyramid Lake 3-137
D. Carson River 3-138
II. Environmental Consequences 3-138
A. Introduction 3-139
B. Summary of Effects 3-139
C. Shoreline Erosion at Lake Tahoe 3-140
1. Method of Analysis 3-140
2. Threshold of Significance 3-141
3. Model Results 3-141
4. Evaluation of Effects 3-141
5. Mitigation 3-143
C. Stream Channel Erosion and Sediment Transport 3-143
1. Method of Analysis 3-143
2. Threshold of Significance 3-143
3. Model Results 3-144
4. Evaluation of Effects 3-144
5. Mitigation 3-150
D. Truckee River Delta Formation at Pyramid Lake 3-150

Biological Resources 3-152

Fish in Truckee River and Affected Tributaries 3-153
I. Affected Environment 3-153
II. Environmental Consequences 3-155
A. Introduction 3-155
B. Frequency that Preferred Flows for Various Life Stages of Brown Trout from October through March Are Achieved or Exceeded Without Exceeding Maximum Flows 3-160
1. Summary of Effects 3-160
2. Method of Analysis 3-160
3. Threshold of Significance 3-160
4. Model Results 3-162
5. Evaluation of Effects 3-162
6. Mitigation and Enhancement 3-165
C. Frequency that Minimum Flows for Various Life Stages of Brown Trout from October through March Are Sustained 3-165
1. Summary of Effects 3-165

Table of Contents - continued

Page

2. Method of Analysis 3-165
3. Threshold of Significance 3-165
4. Model Results 3-165
5. Evaluation of Effects 3-167
6. Mitigation and Enhancement 3-168
D. Frequency that Preferred Flows for Various Life Stages of Rainbow Trout from April through September Are Achieved or Exceeded Without Exceeding Maximum Flows 3-168
1. Summary of Effects 3-168
2. Method of Analysis 3-168
3. Threshold of Significance 3-169
4. Model Results 3-169
5. Evaluation of Effects 3-169
6. Mitigation and Enhancement 3-172
E. Frequency that Minimum Flows for Various Life Stages of Rainbow Trout from April through September Are Sustained 3-172
1. Summary of Effects 3-172
2. Method of Analysis 3-173
3. Threshold of Significance 3-173
4. Model Results 3-173
5. Evaluation of Effects 3-173
6. Mitigation and Enhancement 3-175
F. Frequency of Flushing/Stranding Flows 3-175
1. Summary of Effects 3-175
2. Method of Analysis 3-175
3. Threshold of Significance 3-175
4. Model Results 3-176
5. Evaluation of Effects 3-176
6. Mitigation and Enhancement 3-177
G. Frequency of Low Flows in Winter Months that Increase the Potential for Anchor Ice Formation 3-177
1. Summary of Effects 3-177
2. Method of Analysis 3-177
3. Threshold of Significance 3-178
4. Model Results 3-178
5. Evaluation of Effects 3-178
5. Mitigation and Enhancement 3-179

Fish in Lakes and Reservoirs 3-180
I. Affected Environment 3-180
II. Environmental Consequences 3-182
A. Introduction 3-182
B. Summary of Effects 3-182

Table of Contents - continued

Page

C. Fish Survival Based On Minimum Storage Thresholds 3-183
1. Method of Analysis 3-183
2. Threshold of Significance 3-183
3. Model Results 3-183
4. Evaluation of Effects 3-184
5. Mitigation and Enhancement 3-186
D. Spring/Summer Shallow Water Fish Spawning Habitat 3-186
1. Method of Analysis 3-186
2. Threshold of Significance 3-186
3. Model Results 3-187
4. Evaluation of Effects 3-188
5. Mitigation and Enhancement 3-190

Waterfowl and Shorebirds 3-191
I. Affected Environment 3-191
II. Environmental Consequences 3-192
A. Introduction 3-192
B. Summary of Effects 3-192
C. Waterfowl and Shorebird Shallow Water Foraging Habitat 3-193
1. Method of Analysis 3-193
2. Threshold of Significance 3-194
3. Model Results 3-194
4. Evaluation of Effects 3-194
5. Mitigation and Enhancement 3-195
D. Island Bird Nest Predation and Inundation 3-196
1. Method of Analysis 3-196
2. Threshold of Significance 3-196
3. Model Results 3-197
4. Evaluation of Effects 3-197
5. Mitigation and Enhancement 3-198

Riparian Habitat and Riparian-Associated Wildlife 3-199
I. Affected Environment 3-199
A. Riparian Habitat 3-199
1. Palustrine Emergent Wetlands 3-200
2. Montane Freshwater Marshes/Wet Meadows 3-202
3. Transmontane Freshwater Marsh 3-202
4. Palustrine Scrub-Shrub Wetlands 3-203
5. Palustrine Forested Wetlands 3-204
6. Other Wetlands 3-205
B. Riparian-Associated Wildlife 3-205
1. Birds 3-206
2. Amphibians and Reptiles 3-208
3. Mammals 3-209

Table of Contents - continued

Page

II. Environmental Consequences 3-210
A. Introduction 3-210
B. Summary of Effects 3-211
C. Relative Amounts of Riparian Habitat 3-211
1. Method of Analysis 3-211
2. Threshold of Significance 3-214
3. Model Results 3-215
4. Evaluation of Effects 3-216
5. Mitigation and Enhancement 3-223

Endangered, Threatened, and Other Special Status Species 3-224
Cui-Ui 3-229
I. Affected Environment 3-229
A. Status and Distribution 3-229
B. Life History 3-229
C. Management 3-230
1. Flow Regimes for Stampede Reservoir Storage 3-230
2. Recovery Plan 3-231
3. Fish Passage 3-232
II. Environmental Consequences 3-233
A. Introduction 3-233
B. Summary of Effects 3-233
1. Average Annual Inflow to Pyramid Lake 3-233
2. Frequency that Flow Regime 1, 2, or 3 Is Achieved in the Lower Truckee River from April through June 3-234
3. Relative Amounts of Riparian Habitat Along the Lower Truckee River 3-234
C. Average Annual Inflow to Pyramid Lake 3-234
1. Method of Analysis 3-234
2. Threshold of Significance 3-235
3. Model Results 3-235
4. Evaluation of Effects 3-235
5. Mitigation and Enhancement 3-236
D. Frequency that Flow Regime 1, 2, or 3 Is Achieved in the Lower Truckee River from April through June 3-236
1. Method of Analysis 3-236
2. Threshold of Significance 3-236
3. Model Results 3-236
4. Evaluation of Effects 3-237
5. Mitigation and Enhancement 3-237
E. Relative Amounts of Riparian Habitat along the Lower Truckee River 3-237
1. Evaluation of Effects 3-238
2. Mitigation and Enhancement 3-238

Table of Contents - continued

Lahontan Cutthroat Trout 3-239
I. Affected Environment 3-239
A. Status and Distribution 3-239
1. Pyramid Lake 3-239
2. Lake Tahoe 3-240
3. Independence Lake 3-240
B. Life History 3-240
C. Management 3-241
1. Recovery Plan 3-241
2. Hatchery Stocking 3-241
3. Riparian Vegetation Restoration 3-242
II. Environmental Consequences 3-243
A. Introduction 3-243
B. Summary of Effects 3-243
C. Average Annual Inflow to Pyramid Lake 3-244
D. Relative Amounts of Riparian Vegetation Along the Lower Truckee River 3-244
1. Evaluation of Effects 3-244
2. Mitigation and Enhancement 3-245
E. Access to Independence Creek for Spawning LCT 3-245
1. Method of Analysis 3-245
2. Threshold of Significance 3-245
3. Model Results 3-245
4. Evaluation of Effects 3-246
5. Mitigation and Enhancement 3-246

Bald Egale 3-247
I. Affected Environment 3-247
II. Environmental Consequences 3-248
A. Introduction 3-248
B. Summary of Effects 3-248
C. Fish Survival 3-248
1. Method of Analysis 3-248
2. Threshold of Significance 3-248
3. Model Results 3-249
4. Evaluation of Effects 3-249
5. Mitigation and Enhancement 3-249

Tahoe Yellow Cress 3-250
I. Affected Environment 3-250
II. Environmental Consequences 3-251
A. Introduction 3-251
B. Summary of Effects 3-252
C. Method of Analysis 3-252

Table of Contents - continued

Page

D. Threshold of Significance 3-253
E. Model Results 3-254
F. Evaluation of Effects 3-254
1. No Action 3-254
2. LWSA 3-254
3. TROA 3-255
G. Mitigation and Enhancement 3-256

Island Nesting Water Birds 3-257
I. Affected Environment 3-257
II. Environmental Consequences 3-259
A. Introduction 3-259
B. Summary of Effects 3-259
C. American White Pelican Prey Availability 3-259
D. Predator Access to California Gull Nesting Islands in Lahontan Reservoir 3-259
1. Threshold of Significance 3-259
2. Mitigation and Enhancement 3-260

Osprey 3-261
I. Affected Environment 3-261
II. Environmental Consequences 3-261

Habitat for Other Special Status Plants 3-262
I. Affected Environment 3-262
II. Environmental Consequences 3-263

Habitat for Other Special Status Animal Species 3-264
I. Affected Environment 3-264
A. Palustrine Emergent Wetlands 3-264
B. Palustrine Scrub-Shrub Wetlands 3-265
C. Palustrine Forested Wetlands 3-266
D. General Riparian or Aquatic Habitats 3-266
II. Environmental Consequences 3-268

Recreation 3-269
I. Affected Environment 3-269
A. Introduction 3-269
B. Recreation Facilities 3-270
1. Lakes and Reservoirs 3-271
2. Rivers and Streams 3-276
II. Environmental Consequences 3-287
A. Introduction 3-287
B. Summary of Effects 3-287

Table of Contents - continued

C. Lake- and Reservoir-Based Recreation Visitation 3-289
1. Method of Analysis 3-289
2. Threshold of Significance 3-290
3. Model Results 3-291
4. Evaluation of Effects 3-293
5. Mitigation 3-300
D. Stream-Based Recreation 3-301
1. Method of Analysis 3-301
2. Threshold of Significance 3-301
3. Model Results 3-302
4. Evaluation of Effects 3-308
5. Mitigation 3-318

Economic Environment 3-119
I. Affected Environment 3-319
A. Current Economic Environment 3-319
1. California 3-319
2. Nevada 3-320
B. Employment and Total Income 3-321
1. California 3-321
2. Nevada 3-322
C. Agricultural and M&I Water Use 3-322
II. Environmental Consequences 3-322
A. Introduction 3-322
B. Summary of Effects 3-323
1. Recreation-Related Employment and Income 3-323
2. Employment and Income Affected by Changes in Water Use 3-323
3. Hydropower Generation and Revenues 3-325
4. Groundwater Pumping Costs 3-325
C. Recreation-Related Employment and Income 3-325
1. Method of Analysis 3-325
2. Threshold of Significance 3-327
3. Model Results 3-327
4. Evaluation of Effects 3-328
5. Mitigation 3-330
D. Employment and Income Affected by Changes in Water Use 3-330
1. Method of Analysis 3-330
2. Threshold of Significance 3-331
3. Model Results 3-331
4. Evaluation of Effects 3-331
5. Mitigation 3-334
E. Hydropower Generation and Revenues 3-334
1. Method of Analysis 3-334
2. Threshold of Significance 3-334

Table of Contents - continued

Tables *Page*

1.1 Environmental authorities 1-16
2.1 A comparison of water management provisions among the alternatives 2-4
2.2 Water categories[1] and uses under No Action 2-13
2.3 Prescribed Floriston Rates (cfs) at the Farad gauge are based on Lake Tahoe elevation in a given month 2-13
2.4 Minimum reservoir releases (cfs) 2-17
2.5 Water usage (acre-feet per year) Truckee River and Lake Tahoe basins in California 2-23
2.6 Principal elements of TROA that differ from No Action and LWSA 2-28
2.7 TROA Credit Water categories, water right ownership, and uses 2-34
2.8 Enhanced minimum releases (cfs) from specified reservoirs during normal[1] and dry[2] seasons (these releases include minimum releases shown in table 2.4) 2-42
2.9 Water spill order (first to last) 2-43
2.10 Summary of effects of alternatives on resources 2-53
3.1 Historic Truckee River annual runoff (acre-feet per year) 3-36
3.2 Historic annual Truckee Canal and Carson River annual discharge (acre-feet) 3-37
3.3 Current (2002) annual consumptive demands in the Lake Tahoe and Truckee River basins (acre-feet) 3-39
3.4 Current (2002) nonconsumptive water demands (cfs) in the Lake Tahoe and Truckee River basins 3-40
3.5 Hydrologic year types 3-47
3.6 Stampede Reservoir storage levels 3-47
3.7 Flow regime selection 3-47
3.8 Pyramid Lake inflow targets (cfs) for flow regime Nos. 1-6 3-48
3.9a Summary of effects on reservoir storage and releases 3-50
3.9b Summary of effects on Truckee River flow 3-52
3.10 Summary of effects on exercise of water rights to meet demands 3-54
3.11 Modeled annual consumptive demands in study area (acre-feet) 3-57
3.12 Average annual flow in wet, median, and dry hydrologic conditions at Farad, Vista, and Nixon 3-84
3.13 Annual demand in Nevada and annual average and minimum agricultural and and M&I supplies (acre-feet) 3-91
3.14 Summary of effects on groundwater 3-108
3.15 Average annual stream loss in Oxbow reach of the Truckee River 3-109
3.16 Truckee Canal flows and Lahontan Reservoir storage and releases (1,000 acre-feet per year) 3-112
3.17 Projected groundwater use in Truckee Meadows (acre-feet) 3-113
3.18 Truckee River average monthly flows (cfs) for selected months and reaches 3-119

Tables *Page*

3.19 Summary of modeled violations of temperature (T) and dissolved oxygen (DO) standards 3-119
3.20 Summary of loadings to Pyramid Lake 3-120
3.21 Summary of effects on sedimentation and erosion 3-140
3.22 End-of-month water surface elevations of Lake Tahoe (msl) 3-142
3.23 Weighted average differences in sediment transport capacity change 3-145
3.24 Water elevation differences at Pyramid Lake in very wet, median, and very dry hydrologic conditions 3-151
3.25 Abundance of native and non-native fish species in the mainstem Truckee River 3-154
3.26 Abundance of native and non-native fish species in the tributaries to the upper Truckee River 3-155
3.27 Spawning requirements of selected fish species in the Truckee River basin 3-156
3.28 Flows (in cfs) recommended as maximum, preferred, and minimum by CDFG and NDOW in their respective States 3-158
3.29 The ecosystem-based six-flow regime recommendations for the lower Truckee River (TRIT, 2003) 3-159
3.30 Summary of effects: frequency that preferred flows for brown trout are achieved or exceeded without exceeding maximum flows (when specified) (+ = significant beneficial effect, - = significant adverse effect) 3-161
3.31 Frequency (percent of months) that preferred flows for brown trout from October through March are achieved or exceeded without exceeding maximum flows (when specified) 3-163
3.32 Summary of effects: frequency that minimum flows for brown trout are sustained (+ = significant beneficial effect, - = significant adverse effect) 3-166
3.33 Frequency (percent of years) that minimum flows for brown trout from October through March are sustained 3-166
3.34 Summary of effects: frequency that preferred flows for rainbow trout are achieved or exceeded without exceeding maximum flows (+ = significant beneficial effect, - = significant adverse effect) 3-169
3.35 Frequency (percent of months) that preferred flows for rainbow trout from April through September are achieved or exceeded without exceeding maximum flows (when specified) 3-170
3.36 Summary of effects: frequency that minimum flows for rainbow trout are sustained (+ = significant beneficial effect, - = significant adverse effect) 3-172
3.37 Frequency (percent of years) that minimum flows for rainbow trout from April through September are sustained 3-173

3.38 Summary of effects: frequency that flushing/stranding flows occur (+ = significant beneficial effect, - = significant adverse effect) 3-175
3.39 Frequency (percent of years) that flushing/stranding flows (i.e., twice preferred flows or greater) occur 3-176
3.40 Summary of effects: frequency of low flows in winter months that increase the potential for anchor ice formation (+ = significant beneficial effect, - = significant adverse effect) 3-178
3.41 Frequency (percent of years) of low flows in winter months that increase the potential for anchor ice formation 3-179
3.42 Abundance and use of lakes and reservoirs by fish of the Truckee River system 3-181
3.43 Summary of effects: fish in lakes and reservoirs (+ = significant beneficial effect, - = significant adverse effect) 3-182
3.44 Frequency (percent of years) that storage in reservoirs falls below the recommended thresholds 3-183
3.45 Average total area (acres) of shallow water fish spawning habitat in June in wet, median, and dry hydrologic conditions at Lake Tahoe and Donner and Independence Lakes 3-187
3.46 Average total area (acres) of shallow water fish spawning habitat in June at Pyramid Lake 3-187
3.47 Frequency that Lahontan Reservoir falls below 160,000 acre-feet in May and June 3-187
3.48 Number of waterfowl counted during 2003 FWS mid-winter inventories of all major wetlands in Douglas County (Lake Tahoe), Lyon County (Lahontan Reservoir), Churchill County (Lahontan Reservoir) and Washoe County (Lake Tahoe and Pyramid Lake), Nevada 3-192
3.49 Summary of effects: waterfowl and shorebirds (+ = significant beneficial effect, - = significant adverse effect) 3-193
3.50 Average total area (acres) of shallow water foraging habitat for waterfowl and shorebirds in wet, median, and dry hydrologic conditions during the period of use at Lake Tahoe and Stampede and Lahontan Reservoirs 3-194
3.51 Average total area (acres) of shallow water foraging habitat for waterfowl and shorebirds from September through January at Pyramid Lake 3-194
3.52 Frequency (percent of years) of predator access to nesting islands in Stampede and Lahontan Reservoirs 3-197
3.53 Frequency (percent of years) of inundation of island nests at Stampede reservoir 3-197
