HYDRAULIC LABORATORY REPORT NO. 88

- - -

A BIBLIOGRAPHY OF SUBJECTS PERTAINING TO LOSSES IN CANALS

By

R. R. POMEROY

- - -

Denver, Colorado

November 1940

Conveyance Losses (Seepage and evaporation)

1. Working Data for Irrigation Engineers.

   Moritz, E. A.
   John Wiley and Sons, New York, 1915

2. Preventing Seepage from Irrigation or Drainage Ditches with Volclay.

   Tentative Issue
   Data 229 Sup. B.

3. The Prevention of Seepage from Ditches and Canals.

   Anonymous
   Engineering Record—Aug. 29, 1908, p. 231

4. Seepage Loss from Irrigation Canals.

   Anonymous
   Engineering Record—Vol. 59, No. 7, p. 188

5. Report on Silt Lining S-4 Lateral, Newlands Project, Nevada.

   Thompson, G. L.
   U.S.B.R. Tech. Data File

6. A Study of Seepage Losses from Streams in Owens Valley, California.

   Lee, Charles H.
   Eng. News, Vol. 63, No. 16—p. 449
   Eng. News, June 30, 1898, p. 422

7. Reduction of Seepage Losses in a Canal through Porous Shale.

   Miner, J. H.
   Reclamation Rec.—Dec. 1916, p. 568

8. Water Losses in Concrete and Mortar-lined Canals.

   Anonymous
   Reclamation Rec.—June 1915, p. 243

9. Conveyance Losses of Water on U.S. Reclamation Service Irrigation Projects.

   Moritz, E. A.
   Reclamation Record—April 1921, p. 180

10. Losses of Water by Seepage from Irrigation Canals.

Eng. and Contracting—Vol. XLV, No. 24, p. 544

11. Records of Seepage Losses in Concrete-lined Canals.

Eng. and Contracting—Vol. XLIV, No. 1, p. 22

12. Some Records of Seepage and Evaporation Losses from Irrigation Reservoirs and Canals.

Eng. and Contracting—Vol. XXXVIII, No. 19, p. 522

13. Why Some Irrigation Canals and Reservoirs Leak.

Davis, A. P.
Eng. News-Rec.—April 4, 1918, p. 663

14. Transmission Losses in Unlined Irrigation Channels.

Fortier, Samuel
Eng. News—Vol. 73, No. 22, p. 1060

15. Use and Waste of Irrigation Water.

Eng. News-Rec.—Vol. 100, No. 3, p. 114

16. Canal Seepage Losses are Affected by Temperature.

Crandall, Lynn
Eng. News-Rec.—Vol. 82, Feb. 13, 1919, p. 323

17. Sluicing Silt to Reduce Canal Leakage.

Barnes, F. J.
Eng. News-Rec.—Vol. 78, No. 7

18. Results of Seepage Measurements in Irrigation Canals of Twin Falls Tract, Idaho.

Eng. and Contracting—Vol. XXXVIII, No. 15, p. 416

19. Earth Lining of Main Canal, Vale Project, Oregon.

Ketchum, Chas. C.
New Reclamation Era, Dec. 1931, p. 270

20. Formula Developed for Determining Canal Seepage Losses.

Shulits, Samuel
Eng. News-Rec.—Vol. 111, Oct. 12, 1933, p. 433

21. Losses of Water in Irrigation Systems.

Fogg, P. M.
Eng. and Contracting—Vol. XLI, No. 25, p. 720

22. Seepage Losses from Earth Canals.

Moritz, E. A.
Eng. News—Vol. 70, No. 9, p. 402

23. Facts about Percolation from Canals.

Hammatt, W. C.
Eng. News—Vol. 70, No. 18, p. 882

24. Reservoir and Canal Losses in Irrigation.

Eng. News—Vol. 69, No. 13, p. 618

25. Bibliography on Priming and Puddling Canals and Structures.

Kennedy, R. E.
U.S.B.R. Tech. Data File

26. The Seepage Loss of Water from Lined and Unlined Irrigation Ditches, with Some Costs of Lining.

Eng. and Contracting—Dec. 2, 1908, p. 385

27. Irrigation Practice and Engineering.

Etcheverry, B. A.
Vol. II, Chapter V

28. Use of Water on Federal Irrigation Projects.

Debler, E. B.
A.S.C.E. Transactions—Vol. 94, p. 1195, paper No. 1755

29. Advantages of Lining Irrigation Canals.

Anonymous
Eng. News-Rec.—Vol. 85, 1920, p. 892.

30. River and Canal Engineering.

Bellasis, E. S.
Spon, London, 1911

31. Effect of Depth upon Artificial Waterways.

Clarke, T. C.
Trans. A.S.M.E.—Vol. 35, 1896, p. 1

32. Evaporation from Water Surfaces—A Symposium.

C. Rohwer and others
Trans. A.S.C.E.—Vol. 95, 1931

33. Experiments to Determine Rate of Evaporation from Saturated Soils and River Bed Sands.

Parshall, R. L.
Trans. A.S.C.E.—Vol. 94, 1930

34. (Umatilla Project)

Newell, H. D.
Reclamation Record

35. How to Express Seepage Losses from Irrigation Canals.

Fortier, Samuel
Eng. News—Vol. 73, p. 1128

Friction Losses

1. Nine Charts for Flow of Water in Channels

   Higgens, George
   Water Works—Sept. 1925

2. Effect of Roughness of Bed on Depth of Water and Distribution of Velocity.

   Murphy, E. C.
   Eng. News—Vol. 62, No. 27, p. 27

3. A Formula and Diagram for Determining the Velocity of Flow in Ditches and Canals.

   Johnston, C. T.
   Eng. Rec.—Vol. 64, No. 19, p. 542

4. Curves of Kutter Coefficients

   Van Duyne, J. R.
   Eng. Record—Vol. 61, No. 13, p. 372

5. Separate Roughness Coefficients for Channel Bottom and Sides

   Horton, R. E.
   Eng. News-Rec.—Nov. 30, 1933

6. Elements of the Roughness Coefficient.

   McMillan, W. B.
   Eng. News-Rec.—Feb. 22, 1934

7. The Hydraulics of Irrigation, Drainage, and Other Channels.

   Schmeer, L.
   Eng. and Contracting—Vol. XLII, No. 13

8. Algae Growths Increase Value of "n" in Kutter's Formula.

   Taylor, Paul
   Eng. News-Rec. July 25, 1918

9. Hydraulic Efficiency of a Drainage Ditch for Five Different Channel Conditions.

   Ramser, C. E.
   Eng. News-Rec.—Vol. 82, No. 11, p. 522

10. Gagings in the Concrete Conduit of the Umatilla Project.

Hopsen, E. G.
Eng. Record—Vol. 64, No. 17, p. 480

11. Studies of Dredged Drainage Ditches Before and After Cleaning.

Ramser, C. E.
Eng. News—Vol. 77, No. 3, p. 104

11.1 Flow of Water in Drainage Channels

Ramser, C. E.
U.S.D.A. Tech. Bul. No. 129, Nov. 1928

12. Notes on Hydraulic Roughness of Irrigation Canals.

Bradley, J. N.
U.S.B.R. Tech. Memo.

13. Characteristics of Some Meadow Strip Vegetations.

Cook, H. L. and Campbell, F. B.
Agricultural Eng., Sept. 1939

14. Diagrams of Mean Velocity of Uniform Motion of Water in Open Channels.

Church, I. P.
John Wiley & Sons, New York, 1902

15. Evaluation of Chezy's C in Models and Nature

U.S. Waterways Experiment Station
Tech. Memo. No. 12-2

16. Data for Calculation of Manning's "n".

U.S. Waterways Experiment Station
Tech. Memo. No. 12-1

17. The Flow of Water in Irrigation Channels.

Ellis, G. H.
A.S.C.E. Paper—Feb. 1916

18. Flow of Water in Irrigation and Similar Canals.

Scobey, F. C.
U.S. Dept. of Agr. Tech. Bulletin No. 652,
Feb. 1939

19. The Effect of Changes in Canal Grades on Rate of Flow.

Hanna, F. W.
Eng. News--Vol. 58, p. 545, Nov. 21, 1907

Friction Losses

20. Study of Stream Flow

Camickel, C., Parmentur, and Escande, L.
Acad. des Science, Comptus Pendus des Sciences,
Vol. 200, p. 1808, 1935

21. Hydraulic Diagrams for Canals in Earth.

Kennedy, R. G.
Min. Proc. Inst. C.E.—Vol. 119, 1895, p. 281

22. Hydraulics of Open Channels.

Bahmeteff, B. A.
McGraw-Hill Book Co., N. Y., 1932

23. Tests on Friction Loss as Depending on Hydraulic Radius.

Schober, R.
Dresden, 1916 (German)

24. Experimental Investigation of the Roughness Problem.

Streeter, V. L.—Translator
U. of Calif. Translation—Available at
Nat. Hyd. Lab.

25. Roughness.

U. of Calif. Translation—Nat. Bur. of Stds.

26. Open Channel Formulas.

Horton, R. E.
Eng. News-Rec.—Vol. 82, Jan. 16, 1919

27. Some Better Kutter's Formula Coefficients.

Horton, R. E.
Eng. News-Rec., Feb. 24, May 4, 1916

28. Calculation of Flow in Open Channels.

Houk, Ivan E.
Technical Reports, Part IV, State of Ohio,
The Miami Conservancy District, 1918

Losses Due to Canal Structures

1. The Effect of Changes on Canal Sections Upon Rate of Flow

   Hanna, F. W.
   Eng. News—Vol. 57, p. 630, June 6, 1907

2. Conveyance of Water—Vol. I.

   Etcheverry, B. A.
   McGraw-Hill Book Co., N. Y., 1915

3. Theory of the Hydraulic Jump and Backwater Curves.

   Woodward, Sherman M.
   Tech. Reports, Part III, 1917, Miami Conservancy District

4. The Hydraulic Jump in Open Channel Flow at High Velocity.

   Kennison, K. R.
   Trans. A.S.C.E.—Vol. LXXX (1916) p. 338

5. Experiments in the Flow of Water Through Contraction in Open Channel.

   Lane, E. W.
   Trans. A.S.C.E., Vol. LXXXIII (1920) p. 1149

6. The Hydraulic Jump and Critical Depth in Design.

   Hinds, Julian
   Eng. News-Rec., Vol. 85, p. 1034, 1920

7. Experiments on the Flow of Water Through Contraction in an Open Channel.

   Lane, E. W.
   A.S.C.E. Proceedings, Oct.-Nov.-Dec., 1919

8. The Hydraulic Design of Flumes and Siphon Transitions.

   Hinds, Julian
   Trans. A.S.C.E., Vol. 92, p. 1423

9. Bridge Piers as Channel Obstructions.

   Yarnell, D. L.
   U.S. Dept. of Agr. Tech. Bulletin No. 442

Losses Due to Bends

1. Gaugings in the Concrete Conduit of the Umatilla Project.

   Hopson, E. G.
   Eng. Record—Vol. 64, No. 17, p. 480

2. Superelevation of Water Surfaces in Passing Around Curves at High Velocities.

   Eng. and Contracting—Vol. 38, No. 1

3. Experiments on the Resistance to Flow in Curved Open Channels.

   Raju, Sanjiva Puttu
   Translated by Bardsley, C.E.S.
   U.S.B.R. Tech. Data File

4. Reports on Tests for Coefficient and Retardation of Flow Due to Curvature.

   Prepared by A. W. Kidder
   Drumand Lake Valley Cross-Over Canals,
   Drum Division, U.S.B.R. Tech. File

5. A Study of High Velocity Flow in Curved Sections of Open Channels.

   Prepared by A. T. Ippen
   Calif. Inst. Tech. March 29, 1936

6. Report on Retardation of Flow Due to Curvature of a Trapezoidal Canal.

   Prepared by A. W. Kidder
   U.S.B.R. Tech. Data File

7. Flow of Water Around 180° Bends.

   Yarnell, D. L. and Woodward, S. M.
   U.S. Dept. of Agr. Tech. Bulletin No. 526,
   Oct. 1936

Scour and Silting

1. Bibliography on the Subject of Transportation of Solids by Flowing Water in Open Channels.

U.S.B.R. Bibliography No. 21, March 1933

2. Designing Stable Channels and Computing Bed-Load Movement.

Hedberg, John
Civil Eng.--Vol. 7, No. 3, p. 227

3. Kennedy's Laws of Silting.

Eng. News--June 8, 1911, p. 701

4. The Velocity of Water Flowing Down a Steep Slope.

Hill, E. P.
Inst. C. E.--Selected Papers--
U.S.B.R. Tech. Data File

5. The Flow Around Bridge Piers and Its Effect on River Bed.

Kentner, Chas.
Translated by E. F. Wilsey, U.S.B.R.

6. Working Data for Irrigation Engineers

Moritz, E. A.
John Wiley & Sons, New York, 1915

7. Progress Report No. 1 on Study of Nonsilting, Nonscouring Canal Sections of the All-American Canal.

U.S.B.R. Tech. Memo. No. 349, Sept. 7, 1935

8. The Cause and Prevention of Bed Erosion with Special Reference to the Protection of Structures Controlling Rivers and Canals.

Butcher, A. and Atkinson, J. D.
Paper No. 4865, Proc. Inst. of Civ. Eng.,
Vol. 235, 1932-3, p. 175

Methods for Reducing Seepage Losses from Reservoirs

(Additional references not included in Hyd. Lab. Report No. 88)

34. Sealing Chenery Reservoir.
(Novel method using Bentonite suspension.)

Lee, Charles H.
Western Construction News, Dec. 25, 1930, pp. 621-625

35. Sealing Reservoir Lakes With Clay Grouting

Randolph, E. S.
The Military Engineer--Vol. XXVIII, No. 159, pp. 208-214

36. Effective Water Stoppage. (Data 229)

Anonymous
Bulletin issued 1941 by American Colloid Co.
343 West Superior St., Chicago, Ill.

37. Report on Bentonite--Its use by Region 2, Forrest Service, U.S.D.A. as an impediment to seepage in small dam construction.

Prepared by Ben F. Powell, Construction Engineer, U.S.D.A., Forrest Service, Denver, Colo., 1940

Note: Copies of these references are contained in the Bureau of Reclamation Library--Tech. Data File No. 85.2.
