Subject: Transmittal of Meeting Minutes

Dear Gentlemen:

Enclosed is a binder which includes the minutes of the Adaptive Management Work Group (AMWG) held on July 17-18, 2002. In accordance with Federal Advisory Committee Act (FACA) requirements, the minutes are being submitted for filing with your agency. The information can also be obtained from the Bureau of Reclamation web site (www.uc.usbr.gov).

If you have any questions regarding the enclosed document, please contact me at (801) 524-3880.

Sincerely,

Linda Whetton

MEMORANDUM

To: Secretary

From: Michael R. Gabaldon
Secretary Designee and Chairman, Glen Canyon Dam Adaptive Management Program

Subject: Report and Recommendations to the Secretary of the Interior from the Glen Canyon Dam Adaptive Management Program Federal Advisory Committee

The Glen Canyon Dam Adaptive Management Work Group met on April 17-18, 2002, to discuss actions taken to meet responsibilities under the Federal Advisory Committee Act (FACA), the Grand Canyon Protection Act, and the Glen Canyon Dam Environmental Impact Statement Record of Decision. As your designee and chairman, and in accordance with the group's charter under the FACA, the following recommendation is hereby formally transmitted:

> "GCDAMP (Glen Canyon Dam Adaptive Management Program) should adopt an experimental framework that includes Scenarios 1 through 4[1] and possibly other scenarios to benefit resources of concern with a twice-a-year evaluation of data by the AMWG (Adaptive Management Work Group).
>
> Implement Scenario 1, 3, or 4, as appropriate in Water Year 2002-2003. Scenario 1 will be implemented in the first year that fall tributary inputs occur. Scenario 2 will be implemented in the next year that fall tributary inputs occur.

---

1 By way of definition, Scenario 1 consists of alternating 2-week periods of low steady flows (8,000 cfs) and low fluctuating flows (6,500 to 9,000 cfs) from September to January in a year in which a fall sediment input occurs, followed in January by a beach habitat building flow (41,000 cfs) similar to that which occurred in 1996, followed in January through March by highly fluctuating flows (5,000 to 25,000 cfs).

Scenario 2 is identical to Scenario 1, except that the September to January flows would consist of moderately fluctuating flows (5,000 to 10,000 cfs) allowed under the current Glen Canyon Dam EIS Record of Decision.

Initiate all needed activities (consultation [include endangered Humpback chub], compliance, development of a science plan, public outreach, development of a captive breeding population of Humpback Chub from Grand Canyon).

Direct that GCMRC (Grand Canyon Monitoring and Research Center) in consultation with the TWG (Technical Work Group) and the SAs (Science Advisors) develop an experimental plan for long-term implementation."

As you are aware, the Glen Canyon Dam AMWG also made five recommendations at a previous meeting, held on January 16-17, 2002. I would like to take this opportunity to formally transmit these recommendations:

Recommendation 1 -"Recommend the (Adaptive Management Program) Strategic Plan to the Secretary of the Interior as adopted and as amended with the language changes made today."

Recommendation 2 - "In support of Goal 2 (of the Strategic Plan), the AMWG (Adaptive Management Work Group) recommends the following actions subject to environmental compliance to include assessing recreational use, ESA (Endangered Species Act), in consultation with the tribes and other affected state agencies.

1. Evaluate methods to remove non-native fish, except rainbow trout, from Bright Angel Creek in 2002.

2. Evaluate methods to remove non-native fish from the LCR (Little Colorado River) in 2002.

3. Gather public input and conduct public education and environmental compliance on long-term removals in #1 and 2 above.

Scenario 3 consists of a year in which fall sediment inputs do not occur. Dam releases would consist of normal operations allowed under the Glen Canyon Dam EIS Record of Decision through December followed in January through March by highly fluctuating flows (5,000 to 25,000 cfs). If a sediment input occurs during this high fluctuating flow period, a beach habitat building flow would be immediately released.

Scenario 4 consists of a year in which no significant sediment inputs occur. Dam releases would consist of normal operations allowed under the Glen Canyon Dam EIS Record of Decision through December followed in January through March by highly fluctuating flows (5,000 to 25,000 cfs).

In all scenarios, dam releases after the high fluctuating flow period of January through March would consist of normal operations allowed under the Glen Canyon Dam EIS Record of Decision.

4. Establish a TWG (Technical Work Group) ad hoc committee to develop a 2002-2006 research monitoring and management work plan for meeting MO (Management Objective) 2.5 and 2.6 of the August 17, 2001, Draft of the AMP (Adaptive Management Program) Strategic Plan. The TWG will report back to the AMWG at the next meeting.

5. Using data from #1-4 above to make recommendations on future removal."

Recommendation 3 - "The AWMG concurs with the findings of the TWG white paper on sediment."

"In concert with RPA [Reasonable and Prudent Alternative of the biological opinion] flows for native fish, during 2002-2003 request that the GCMRC [Grand Canyon Monitoring and Research Center], in consultation with the TWG, design an experimental flow sequence that tests hypotheses for conservation of sediment. Report to AMWG in April 2002 on the proposed flow sequence."[2]

Recommendation 4 - "Incorporate KAS (Kanab ambersnail) recommendations from TWG as outlined in presentation paper."

Recommendation 5 - "Approve the FY 2003 Budget ($9,904,000)"

The next meeting of the Adaptive Management Work Group will be held on July 17-18, 2002, in Phoenix, Arizona. Agenda items will likely include the Fiscal Year 2004 work plans, a proposal to construct a selective withdrawal structure on Glen Canyon Dam, and more detailed discussion on the April experimental flow proposal which is intended to conserve sediment and benefit endangered fish. I will forward any recommendations that may result from the July meeting.

---

[2] This recommendation lead to development and adoption of the recommendation adopted at the April 17-18, 2002 meeting.

Subject: Revised AMWG Agenda

The agenda for the Glen Canyon Dam Adaptive Management Work Group Meeting to be held on July 17-18, 2002, in Phoenix, Arizona has been revised and is attached. Copies will also be provided at the meeting.

Amy Heuslein wanted me to inform you that the Property Management Office (where BIA leases office space and where the AMWG meeting is being held) wants to implement tighter security. As with the AMWG meeting held in January, all members, alternates, and interested persons will be asked to sign in on a separate log sheet upon entering the building. Reclamation will be bringing one additional staff person to assist with that process. The occupancy of the meeting rooms (Conference rooms A&B on the 12th floor) will be strictly held to 75 persons to conform with fire and safety standards.

If you have any questions, please contact me.

See you there!

Subject: AMWG Meeting, July 17-18, 2002

This is to inform you that the Glen Canyon Dam Adaptive Management Work Group will hold a public meeting on July 17 (9:30 a.m. -5 p.m.) and July 18 (8 a.m. - 1 p.m.) at the following location:

Bureau of Indian Affairs
2 Arizona Center
400 N. 5th Street
12th Floor, Conference Rooms A&B
Phoenix, Arizona

Meeting packets were sent via overnight mail to the AMWG members and alternates on Wednesday, June 19. If you are interested in receiving a packet, please let me know. The documents for the meeting are also posted on the Bureau of Reclamation web page at:

http://www.uc.usbr.gov/amp

If you have any questions, please contact me.

ADM-1.10

June 18, 2002

To: Adaptive Management Work Group Members and Alternates

Subject: Transmittal of Materials for Adaptive Management Work Group Meeting

Enclosed are the following documents in preparation for the AMWG Meeting to be held in Phoenix, Arizona, on April 17-18, 2002:

- Agenda
- Draft Minutes from the April 24-25, 2002, Meeting
- Tabbed indexes and corresponding documents

The meeting will be held at the following location:

Bureau of Indian Affairs
2 Arizona Center, 400 N. 5th Street
12th Floor, Conference Rooms A&B
Phoenix, Arizona

A block of rooms was reserved under the "Bureau of Reclamation" for the nights of July 16 (10 rooms) and July 17 (25 rooms) at the Government rate of $59 + tax at the Holiday Inn Express & Suites, 620 North 6th Street, Phoenix, Arizona, telephone: 602-452-2020. The block closes on **June 25, 2002**, however, you may still be able to get the Govt. rate if there are rooms available. If you are not able to secure a room at the above hotel, suggest you try the Hyatt Regency at 602-452-2020 or the Crowne Plaza @ 602-333-0000. Both hotels are located in the downtown area.

Sincerely,

Randall V. Peterson
Mgr., Adaptive Management and
Environmental Resources Division

Subject: Re: Draft Agenda for July AMWG Meeting

Linda,

I think that the chair of the Native Fish Working Group (Bill Persons) should present the non-native fish control agenda item (3:30 pm on the 17th), not Joe Alston. Bill has been compiling a report on non-native fish control efforts in the Grand Canyon, which includes AZ Game and Fish, GCMRC, and Grand Canyon NP.

Jeff

Subject: RE: Draft Agenda for July AMWG Meeting

I have been asked to develop a discussion paper on which information needs should be considered part of the AMP and which are outside the AMP with the help of an ad hoc committee. Towards that end, I am developing a draft paper that I hope may be appropriate for discussion at the July AMWG meeting. I was wondering if we could add some time for discussion of this under the information needs update on the proposed agenda? Thanks for considering this addition. Randy S.
