Note: On June 13, 2012, SNWA transmitted to the Bureau of Reclamation its Tributary Conservation and Imported Intentionally Created Surplus (ICS) Plans of Creation. As documented in those plans and the accompanying cover letter, SNWA anticipates creating up to 37,000 acre-feet of Tributary Conservation ICS and up to 9,000 acre-feet of Imported ICS, for a cumulative total of up to 46,000 acre-feet of ICS during calendar year 2013. The schedule above is predicated upon storing up to 43,700 acre-feet (reduced for the 5% of system assessment) of ICS credits in Lake Mead during calendar year 2013 and is subject to change.
