Recreation

All action alternatives:

- Maintain the overall recreation capacity of the existing facilities at Shasta Lake
- Provide for modernization of relocated recreation facilities
- Increase average lake surface area and reduce drawdown during the recreation season

Recreation Enhancement					
New Trailheads / New Miles of Trail	–	–	–	–	6/18

Recreation at Shasta Lake is managed by the U.S. Forest Service. Reclamation and the U.S. Forest Service will continue to work together to refine recreation relocations and develop a recreation plan. For recreation facilities on Federal lands, the U.S. Forest Service will consider relevant laws, regulations, policy, special use permits and master development plans to develop and/or provide final approval for any proposed recreation facility relocations.
