

ALTERNATIVE 5: Import, Bismarck to Fargo Pipeline

This alternative brings water from the Missouri River near Bismarck and delivers it to Fargo and to the vicinity of Wahpeton.

Features:

1. Build biota treatment plant at the pipeline intake on the Missouri River near Bismarck.
2. Construct pipeline conveyance system to transport water from Bismarck to Fargo.
3. Add a water-supply pipeline off of the main Bismarck to Fargo pipeline to deliver water near Wahpeton.
4. Build ring-dike reservoirs near Fargo and Wahpeton to regulate the flow of water from the main pipeline.
5. Deliver treated surface-water from the Red River to rural water systems throughout the valley.
6. Incorporate water conservation measures.
