

**LONG-TERM RESTORATION PROGRAM FOR THE
HISTORICAL SOUTHWESTERN WILLOW FLYCATCHER
(Empidonax traillii extimus) HABITAT ALONG
THE LOWER COLORADO RIVER**

Submitted by Lower Colorado Region, Bureau of Reclamation

TABLE OF CONTENTS

INTRODUCTION.....	6
SPECIES DESCRIPTION AND LIFE REQUISITES.....	6
Description of breeding habitat.....	8
HISTORICAL HABITAT	
Chronology of development along the Lower Colorado River.....	12
Estimation of historical habitat.....	14
Estimation of historical habitat from Grand Canyon to Cottonwood Valley.....	15
Estimation of historical habitat from Mohave Valley to Mohave Canyon.....	17
Estimation of historical habitat within the Chemehuevis Valley.....	19
Estimation of historical habitat within the “Great Valley of the Colorado”.....	21
Estimation of historical habitat from Canebrake Canyon to Mexico.....	24
Summary of the estimation of historical habitat.....	30
CURRENT OCCUPIED AND POTENTIAL HABITAT.....	32
RESTORATION AND ACQUISITION OF BREEDING HABITAT.....	36
Lower Colorado River.....	37
Opportunities within the Yuma Valley.....	37
Opportunities from the head of Canebrake Canyon to Laguna Dam.....	39
Opportunities within the “Great Valley”.....	40
Opportunities within Chemehuevis Valley.....	41
Opportunities within Mohave Valley.....	42
Lower Gila River.....	42
Upper Gila River.....	43

San Pedro River.....	43
Virgin River.....	44

SUMMARY

Limitations of this study.....	45
--------------------------------	----

LITERATURE CITED..... 46

APPENDIX A

Reasonable and Prudent Alternative Provision Number 5.....	52
--	----

Reasonable and Prudent Alternative Provision Number 11.....	52
---	----

APPENDIX B

Description of riparian vegetation community types.....	54
---	----

Description of vegetation structure types.....	55
--	----

Description of marsh types.....	56
---------------------------------	----

APPENDIX C

Peer Review of methods.....	57
-----------------------------	----

Comments on draft report.....	68
-------------------------------	----

LIST OF TABLES

Table 1. Chronology of the exploration of the Lower Colorado River.....	10
Table 2. Assumptions used to derive the estimate of historical habitat.....	14
Table 3. Estimate of historical habitat, by river reach, as delineated from the 1938 aerial photography (with appropriate adjustments).....	30
Table 4. 1996-98 occupied southwestern willow flycatcher breeding habitat by river reach.....	32
Table 5. 1994 acreage, by vegetation communities, along the Lower Colorado River from Davis Dam to Mexico.....	33
Table 6. Occupied habitat and potentially suitable but unoccupied habitat by vegetation community type per river reach, 1998.....	35

LIST OF FIGURES

Figure 1. Map of the Lower Colorado River.....	6
Figure 2. Approximate breeding ranges of the various races of willow flycatcher.....	7
Figure 3. The Colorado River as it emerges from the Grand Canyon, near present-day Pierce Ferry, Arizona, 1890.....	16
Figure 4. The Colorado River at Rioville, Nevada (also known as Bonelli's Landing), 1890. This area now lies under Lake Mead.....	16
Figure 5. Cottonwood Valley, circa 1890. This area now lies under Lake Mohave.....	17
Figure 6. Mohave Valley, 1922, near present-day Bullhead City, Arizona.....	17
Figure 7. Mohave Canyon, 1910.....	18
Figure 8. Chemehuevis Valley, 1910.....	19
Figure 9. Map of Olive Lake cut-off, near Blythe, California, 1920.....	24
Figure 10. Ehrenberg, Arizona.....	25
Figure 11. Canebrake Canyon, 1890.....	25
Figure 12. The confluence of the Colorado and Gila Rivers, 1980.....	28
