Central Valley

PUT ME IN MY PLACE - Habitat Match

A Wildlife Refuge is a special place for birds and other animals. Government workers take care of this place so that it will always be used by the wildlife.

Different kinds of birds like to be in different parts of the refuge. Read about the birds, cut them out, and put them where they like to be.

CUT THESE OUT:

RUDDY DUCK - Likes to dive down for its food. Found in marshes or on lakes or ponds.

WESTERN GREBE - This bird stays in open water and builds a floating nest.

MALLARD - Enjoys the water, but can be found in many places on the refuge, so you can put it where you like.

SNOW GOOSE - Will be found feeding in grassy areas.
