CONTRACT BETWEEN THE UNITED STATES AND  
PRINCETON-CODORA-GLENN IRRIGATION DISTRICT,  
DIVERTER OF WATER FROM SACRAMENTO RIVER SOURCES  
SETTLING WATER RIGHTS DISPUTES AND  
PROVIDING FOR PROJECT WATER

THIS CONTRACT, hereinafter referred to as "Settlement Contract," is entered into by THE UNITED STATES OF AMERICA, hereinafter referred to as the United States, made this \_\_\_\_ day of \_\_\_\_\_, 2004, pursuant to the applicable authority granted to it generally in the Act of June 17, 1902 (32 Stat. 388), and acts amendatory or supplementary thereto, including, but not limited to, the Acts of August 26, 1937 (50 Stat. 844), as amended and supplemented, August 4, 1939 (53 Stat. 1187), as amended and supplemented, including, but not limited to, Sections 9 and 14 thereto, July 2, 1956 (70 Stat. 483), June 21, 1963 (77 Stat. 68), October 12, 1982 (96 Stat. 1262), October 27, 1986 (100 Stat. 3050), as amended, and Title XXXIV of the Act of October 30, 1992 (106 Stat. 4706), all collectively hereinafter referred to as Federal Reclamation law, and PRINCETON-CODORA-GLENN IRRIGATION DISTRICT, hereinafter referred to as the Contractor, a public agency of the State of California, duly organized, existing, and acting pursuant to the laws thereof, with its principal place of business in California;

WITNESSETH, that:

[1<sup>st</sup>] WHEREAS, the United States has constructed and is operating the Central Valley Project, California, for multiple purposes pursuant to its statutory authority; and

[2<sup>nd</sup>] WHEREAS, the Contractor has rights to divert, is diverting, and will continue to divert for reasonable beneficial use, water from the natural flow of the Sacramento River and tributaries thereto, that would have been flowing therein if the Central Valley Project were not in existence and from the Colusa Basin Drain; and

[3<sup>rd</sup>] WHEREAS, the construction and operation of the integrated and coordinated Central Valley Project has changed and will further change the regimen of the Sacramento, American, San Joaquin, and Trinity Rivers and the Sacramento-San Joaquin Delta from unregulated flow to regulated flow; and

[4<sup>th</sup>] WHEREAS, the United States has rights to divert, is diverting, and will continue to divert waters from said Rivers and said Delta in connection with the operation of said Central Valley Project; and

[5<sup>th</sup>] WHEREAS, the Contractor and the United States had a dispute over the respective rights of the parties to divert and use water from the regulated flow of the Sacramento River which threatened to result in litigation, and as a means to settle that dispute entered into Contract No. 14-06-200-849A, hereinafter referred to as the Existing Contract, which established terms for the delivery to the Contractor of Central Valley Project Water, and the quantities of Base Supply the United States and the Contractor agreed may be diverted by the Contractor from the Sacramento River pursuant to such contract; and

1 month during the period April through October of each Year without payment to the United States for such quantities diverted;

3 (b) “Basin-Wide Water Management Plan” shall mean the mutually agreeable  
4 Sacramento River Basinwide Water Management Plan, dated \_\_\_\_\_, developed by Glenn-  
5 Colusa Irrigation District, Maxwell Irrigation District, Natomas Central Mutual Water Company,  
6 Pelger Mutual Water Company, Princeton-Codora-Glenn Irrigation District, Provident Irrigation  
7 District, Reclamation District 108, Sutter Mutual Water Company, Anderson-Cottonwood  
8 Irrigation District, Meridian Farms Water Company, Reclamation District 1004, and the U.S.  
9 Bureau of Reclamation;

10 (c) “Charges” shall mean the payments for Project Water that the Contractor  
11 is required to pay to the United States in addition to the “Rates” specified in this Settlement  
12 Contract. The Contracting Officer will, on an annual basis, determine the extent of these  
13 Charges. The type and amount of each Charge shall be specified in Exhibit D;

14 (d) “Contract Total” shall mean the sum of the Base Supply and Project Water  
15 available for diversion by the Contractor for the period April 1 through October 31;

16 (e) “Critical Year” shall mean any Year in which either of the following  
17 eventualities exists:

18 (1) The forecasted full natural inflow to Shasta Lake for the current  
19 Water Year, as such forecast is made by the United States on or before February 15 and reviewed  
20 as frequently thereafter as conditions and information warrant, is equal to or less than 3.2 million  
21 acre-feet; or

1                   (2)     The total accumulated actual deficiencies below 4 million acre-feet  
2 in the immediately prior Water Year or series of successive prior Water Years each of which had  
3 inflows of less than 4 million acre-feet, together with the forecasted deficiency for the current  
4 Water Year, exceed 800,000 acre-feet.

5                   For the purpose of determining a Critical Year, the computation of inflow to  
6 Shasta Lake shall be performed in a manner that considers the extent of upstream development  
7 above Shasta Lake during the year in question, and shall be used as the full natural flow to  
8 Shasta Lake. In the event that major construction has occurred or occurs above Shasta Lake after  
9 September 1, 1963, and which has materially altered or alters the regimen of the stream systems  
10 contributing to Shasta Lake, the computed inflow to Shasta Lake used to define a Critical Year  
11 will be adjusted to eliminate the effect of such material alterations. After consultation with the  
12 State of California, the National Weather Service, and other recognized forecasting agencies, the  
13 Contracting Officer will select the forecast to be used and will make the details of it available to  
14 the Contractor. The same forecasts used by the United States for the operation of the Project  
15 shall be used to make the forecasts hereunder;

16                   (f)     “CVPIA” shall mean the Central Valley Project Improvement Act, Title  
17 XXXIV of the Act of October 30, 1992 (106 Stat. 4706);

18                   (g)     “Eligible Lands” shall mean all lands to which Project Water may be  
19 delivered in accordance with Section 204 of the Reclamation Reform Act of October 12, 1982  
20 (96 Stat. 1263), as amended, hereinafter referred to as RRA;

1           (h)     “Excess Lands” shall mean all lands in excess of the limitations contained  
2 in Section 204 of the RRA, other than those lands exempt from acreage limitation under Federal  
3 Reclamation law;

4           (i)     “Full Cost Rate” shall mean that water rate described in Sections 205(a)(3)  
5 or 202(3) of the RRA, whichever is applicable;

6           (j)     “Ineligible Lands” shall mean all lands to which Project Water may not be  
7 delivered in accordance with Section 204 of the RRA;

8           (k)     “Landholder” shall mean a party that directly or indirectly owns or leases  
9 nonexempt land, as provided in 43 CFR 426.2;

10          (l)     “Project” shall mean the Central Valley Project owned by the United  
11 States and managed by the Department of the Interior, Bureau of Reclamation;

12          (m)     “Project Water” shall mean all Surface Water diverted or scheduled to be  
13 diverted each month during the period April through October of each Year by the Contractor  
14 from the Sacramento River which is in excess of the Base Supply. The United States recognizes  
15 the right of the Contractor to make arrangements for acquisition of water from projects of others  
16 than the United States for delivery through the Sacramento River and tributaries subject to  
17 written agreement between Contractor and the United States as to identification of such water  
18 which water when so identified shall not be deemed Project Water under this Settlement  
19 Contract;

20          (n)     “Rates” shall mean the payments for Project Water determined annually  
21 by the Contracting Officer in accordance with the then current applicable water ratesetting  
22 policies for the Project, as described in subdivision (a) of Article 8 of this Settlement Contract;

1 (o) "Secretary" or "Contracting Officer" shall mean the Secretary of the  
2 Interior, a duly appointed successor, or an authorized representative acting pursuant to any  
3 authority of the Secretary and through any agency of the Department of the Interior;

4 (p) "Surface Water" shall mean only those waters that are considered as  
5 surface water under California law;

6 (q) "Water Year" shall mean the period commencing with October 1 of 1 year  
7 and extending through September 30 of the next; and

8 (r) "Year" shall mean a calendar year.

9 TERM OF SETTLEMENT CONTRACT

10 2. (a) This Settlement Contract shall become effective April 1, 2004, and shall  
11 remain in effect until and including March 31, 2044: Provided, that under terms and conditions  
12 mutually agreeable to the parties hereto, renewals may be made for successive periods not to  
13 exceed 40 years each. The terms and conditions of each renewal shall be agreed upon not later  
14 than 1 year prior to the expiration of the then existing Settlement Contract.

15 (b) With respect to Project Water and the portions of this Settlement Contract  
16 pertaining thereto, upon written request by the Contractor of the Secretary made not later than  
17 1 year prior to the expiration of this Settlement Contract, whenever, account being taken of the  
18 amount then credited to the costs of construction of water supply works, the remaining amount of  
19 construction costs of water supply work which is properly assignable for ultimate return by the  
20 Contractor as established by the Secretary of the Interior pursuant to (3) of Section 1 of Public  
21 Law 643 (70 Stat. 483), probably can be repaid to the United States within the term of a contract  
22 under subsection 9(d) of the 1939 Reclamation Project Act (53 Stat. 1187), the relevant portions

1 of this Settlement Contract may be converted to a contract under said subsection 9(d) upon terms  
2 and conditions mutually agreeable to the United States and the Contractor. The Secretary shall  
3 make a determination 10 years after the date of execution of this Settlement Contract, and every  
4 5 years thereafter, of whether a conversion to a contract under said subsection 9(d) can be  
5 accomplished pursuant to Public Law 643. Notwithstanding any provision of this Settlement  
6 Contract, the Contractor reserves and shall have all rights and benefits under Public Law 643.

7 WATER TO BE FURNISHED TO CONTRACTOR

8 3. (a) Subject to the conditions, limitations, and provisions hereinafter  
9 expressed, the Contractor is hereby entitled and authorized to divert from the Sacramento River  
10 at the locations shown in Exhibit A, for beneficial use within the area delineated on Exhibit B,  
11 (both Exhibits are attached hereto and made a part hereof), the Contract Total designated in  
12 Exhibit A, or any revision thereof, in accordance with the monthly operating schedule required  
13 by Article 3(c) of this Settlement Contract. The quantity of any water diverted under this  
14 Settlement Contract from the Sacramento River, during the period April through October, for use  
15 on any lands delineated on Exhibit B, by the owner of such lands or otherwise shall constitute a  
16 part of the Contract Total as shown on Exhibit A and shall be subject to all the provisions of this  
17 Settlement Contract relating to such Contract Total as if such diversion were made by the  
18 Contractor.

19 (b) The Contractor may have acquired rights to divert water from the  
20 Sacramento River during the period April through October, that were obtained after the date of  
21 execution of the Existing Contract, or the Contractor may acquire such rights in the future. All  
22 diversions made from the Sacramento River, pursuant to such rights, during the period April

1 through October, shall not be considered a part of the quantity of Base Supply and Project Water  
2 specified in Exhibit A; Provided, that the quantities diverted pursuant to the above rights shall be  
3 identified on the schedule submitted pursuant to Article 3(c) below, and shall not be substituted  
4 for any Base Supply or Project Water; Provided, further, that any such identified quantities of  
5 other acquired rights may be diverted by the Contractor before incurring any fee pursuant to  
6 Article 3(c)(1), below.

7 (c) Before April 1 and before the first day of each month thereafter when a  
8 revision is needed, the Contractor shall submit a written schedule to the Contracting Officer  
9 indicating the Contract Total to be diverted by the Contractor during each month under this  
10 Settlement Contract. The United States shall furnish water to the Contractor in accordance with  
11 the monthly operating schedule or any revisions thereof. However, the United States recognizes  
12 the need of the Contractor to change from time to time its monthly diversions of water from the  
13 quantities shown in Exhibit A; the Contractor may make such changes, provided:

14 (1) that for the quantity of Base Supply diverted in excess of the  
15 monthly quantity shown in Exhibit A, and as may be reduced in accordance with Article 5(a),  
16 during June, July, August, September, and October of any Water Year, the Contractor shall be  
17 charged a rescheduling fee equal to 50 percent of the sum of the storage operations and  
18 maintenance rate and the storage capital rate components of the Project ratesetting policy.

19 (2) that in no event shall the total quantity scheduled for diversion by  
20 the Contractor from the Sacramento River:

1 (i) During the period April through October exceed the  
2 aggregate of the Contract Total for that period shown in Exhibit A or any revision  
3 thereof;

4 (ii) During the period July through September exceed the  
5 aggregate of the Contract Total for that period shown in Exhibit A or any revision  
6 thereof.

7 (d) In the event conditions warrant, the Contracting Officer reserves the right  
8 to require the Contractor to submit, at least 72 hours prior to the beginning of each weekly  
9 period, its estimate of daily diversion requirements for each such period from the Sacramento  
10 River: Provided, however, that changes during any such period may be made upon the giving of  
11 72 hours' notice thereof to the Contracting Officer.

12 (e) No sale, transfer, exchange, or other disposal of any of the Contract Total  
13 designated in Exhibit A or the right to the use thereof for use on land other than that shown on  
14 Exhibit B shall be made by the Contractor without first obtaining the written consent of the  
15 Contracting Officer. Such consent will not be unreasonably withheld and a decision will be  
16 rendered in a timely manner. For short-term actions that will occur within 1 year or less, the  
17 decision will be rendered within 30 days after receipt of a complete written proposal. For long-  
18 term actions that will occur in a period longer than 1 year, the decision will be rendered within  
19 90 days after receipt of a complete written proposal. For a proposal to be deemed complete by  
20 the Contracting Officer, it must comply with all provisions required by State and Federal law,  
21 including information sufficient to enable the Contracting Officer to comply with the National  
22 Environmental Policy Act, the Endangered Species Act, and applicable rules or regulations then

1 in effect; Provided that, such consent does not authorize the use of Federal facilities to facilitate  
2 or effectuate the sale, transfer, exchange, or other disposal of Base Supply. Such use of Federal  
3 facilities will be the subject of a separate agreement to be entered into between the Contractor  
4 and Reclamation.

5 (f) For the purpose of determining whether Section 3405(a)(1)(M) of the  
6 CVPIA applies to the Contractor as a transferor or transferee of Project Water, the Contracting  
7 Officer acknowledges that the Contractor is within a county, watershed, or other area of origin,  
8 as those terms are utilized under California law.

9 (g) Nothing herein contained shall prevent the Contractor from diverting  
10 water during the months of November through March for beneficial use on the land shown on  
11 Exhibit B or elsewhere to the extent authorized under the laws of the State of California.

12 (h) The United States assumes no responsibility for and neither it nor its  
13 officers, agents, or employees shall have any liability for or on account of:

14 (1) The quality of water to be diverted by the Contractor;

15 (2) The control, carriage, handling, use, disposal, or distribution of  
16 water diverted by the Contractor outside the facilities constructed and then being operated and  
17 maintained by or on behalf of the United States;

18 (3) Claims of damage of any nature whatsoever, including but not  
19 limited to, property loss or damage, personal injury, or death arising out of or connected with the  
20 control, carriage, handling, use, disposal, or distribution of said water outside of the hereinabove  
21 referred to facilities; and

1                   INTEGRATED WATER MANAGEMENT AND PARTNERSHIPS

2           6.       The Contractor and United States desire to work together to maximize the  
3 reasonable beneficial use of water for their mutual benefit. As a consequence, the United States  
4 and the Contractor will work in partnership and with others within the Sacramento Valley,  
5 including other Contractors, to facilitate the better integration within the Sacramento Valley of  
6 all water supplies including, but not limited to, the better management and integration of surface  
7 water and groundwater, the development and better utilization of surface water storage, the  
8 effective utilization of waste, seepage and return flow water, and other operational and  
9 management options that may be identified in the future.

10                   USE OF WATER FURNISHED TO CONTRACTOR

11           7.       (a)       Project Water furnished to the Contractor pursuant to this Settlement  
12 Contract shall not be delivered or furnished by the Contractor for any purposes other than  
13 agricultural purposes without the written consent of the Contracting Officer. For purposes of this  
14 Settlement Contract, “agricultural purposes” includes, but is not restricted to, the irrigation of  
15 crops, the watering of livestock, incidental domestic use including related landscape irrigation, or  
16 underground water replenishment.

17                   (b)       The Contractor shall comply with requirements applicable to the  
18 Contractor in biological opinion(s) prepared as a result of a consultation regarding the execution  
19 of this Settlement Contract undertaken pursuant to Section 7 of the Endangered Species Act of  
20 1973, as amended, that are within the Contractor’s legal authority to implement. The Contractor  
21 shall comply with the limitations or requirements imposed by environmental documentation  
22 applicable to the Contractor and within its legal authority to implement. The Existing Contract,

1 which evidences in excess of 40 years of diversions, for agricultural uses, of the quantities of  
2 water provided for in Article 3, and the underlying water rights of the Contractor will be  
3 considered in developing an appropriate base-line for the Biological Assessment prepared  
4 pursuant to the Endangered Species Act, and in any other needed environmental review.  
5 Nothing herein shall be construed to prevent the Contractor from challenging or seeking judicial  
6 relief in a court of competent jurisdiction with respect to any biological opinion or other  
7 environmental documentation referred to in this Article.

8 RATE AND METHOD OF PAYMENT FOR WATER

9 8. (a) The Contractor shall make payments to the United States as provided in  
10 this Article for all Project Water shown in Exhibit A as follows:

11 (1) 75 percent of the amount shown as Project Water shall be paid for  
12 by the Contractor in each Year; and in addition

13 (2) the Contractor shall pay for Project Water actually diverted in  
14 excess of 75 percent of the amount shown as Project Water.

15 Such payments shall be at Rates and Charges established in accordance with: (i) the  
16 Secretary's then-current ratesetting policies for the Project; and (ii) applicable Reclamation law  
17 and associated rules and regulations, or policies: Provided, that if the Contractor desires to use  
18 Project Water for other than agricultural use the Rates and Charges set forth above will be  
19 adjusted by the Contracting Officer to the applicable Rates and Charges for such use. The Rates  
20 and Charges applicable to the Contractor upon execution of this Settlement Contract are set forth  
21 in Exhibit D, as may be revised annually. The Secretary's ratesetting policies for the Project  
22 shall be amended, modified, or superseded only through a public notice and comment procedure.

1 The Contracting Officer shall adjust the amount of Project Water for which payment is required  
2 to the extent of any reduction in diversions of Project Water made in accordance with the water  
3 conservation provisions of Article 29(e).

4 (b) The Contracting Officer shall notify the Contractor of the Rates and  
5 Charges as follows:

6 (1) Prior to July 1 of each Year, the Contracting Officer shall provide  
7 the Contractor an estimate of the Charges for Project Water that will be applied to the period  
8 October 1, of the current Year, through September 30, of the following Year, and the basis for  
9 such estimate. The Contractor shall be allowed not less than 2 months to review and comment  
10 on such estimates. On or before September 15 of each Year, the Contracting Officer shall notify  
11 the Contractor in writing of the Charges to be in effect during the period October 1 of the current  
12 Year, through September 30, of the following Year, and such notification shall revise Exhibit D.

13 (2) Prior to October 1 of each Year, the Contracting Officer shall make  
14 available to the Contractor an estimate of the Rates for Project Water for the following Year and  
15 the computations and cost allocations upon which those Rates are based. The Contractor shall be  
16 allowed not less than 2 months to review and comment on such computations and cost  
17 allocations. By December 31 of each Year, the Contracting Officer shall provide the Contractor  
18 with the final Rates to be in effect for the upcoming Year, and such notification shall revise  
19 Exhibit D.

20 (c) The Contractor shall pay the United States for Project Water in the  
21 following manner:

1                   (1)     With respect to Rates, prior to May 1 of each Year, the Contractor  
2 shall pay the United States one-half the total amount payable pursuant to subdivision (a) of this  
3 Article and the remainder shall be paid prior to July 1 or such later date or dates as may be  
4 specified by the United States in a written notice to the Contractor: Provided, however, that if at  
5 any time during the Year the amount of Project Water diverted by the Contractor shall equal the  
6 amount for which payment has been made, the Contractor shall pay for the remaining amount of  
7 such water as shown in Exhibit A in advance of any further diversion of Project Water.

8                   (2)     With respect to Charges, the Contractor shall also make a payment  
9 to the United States, in addition to the Rate(s) in subdivision (c)(1) of this Article, at the Charges  
10 then in effect, before the end of the month following the month of delivery or transfer. The  
11 payments shall be consistent with the quantities of Project Water delivered or transferred.  
12 Adjustment for overpayment or underpayment of Charges shall be made through the adjustment  
13 of payments due to the United States for Charges for the next month. Any amount to be paid for  
14 past due payment of Charges shall be computed pursuant to Article 13 of this Settlement  
15 Contract.

16                   (d)     Payments to be made by the Contractor to the United States under this  
17 Settlement Contract may be paid from any revenues available to the Contractor.

18                   (1)     All revenues received by the United States from the Contractor  
19 relating to the delivery of Project Water or the delivery of non-Project Water through Project  
20 facilities shall be allocated and applied in accordance with Federal Reclamation law and the  
21 associated rules or regulations, and the then current Project ratesetting policies for irrigation  
22 water.

1           (e)     The Contracting Officer shall keep its accounts pertaining to the  
2 administration of the financial terms and conditions of its long-term water service and Settlement  
3 Contracts, in accordance with applicable Federal standards, so as to reflect the application of  
4 Project costs and revenues. The Contracting Officer shall, each Year upon request of the  
5 Contractor, provide to the Contractor a detailed accounting of all Project and Contractor expense  
6 allocations, the disposition of all Project and Contractor revenues, and a summary of all water  
7 delivery information. The Contracting Officer and the Contractor shall enter into good faith  
8 negotiations to resolve any discrepancies or disputes relating to accountings, reports, or  
9 information.

10           (f)     The parties acknowledge and agree that the efficient administration of this  
11 Settlement Contract is their mutual goal. Recognizing that experience has demonstrated that  
12 mechanisms, policies, and procedures used for establishing Rates and Charges and/or for making  
13 and allocating payments, other than those set forth in this Article may be in the mutual best  
14 interest of the parties, it is expressly agreed that the parties may enter into agreements to modify  
15 the mechanisms, policies, and procedures for any of those purposes while this Settlement  
16 Contract is in effect without amendment of this Settlement Contract.

17           (g)     For the term of this Settlement Contract, Rates under the respective  
18 ratesetting policies for the Project will be established to recover only reimbursable operation and  
19 maintenance (including any deficits) and capital costs of the Project, as those terms are used in  
20 the then current Project ratesetting policies, and interest, where appropriate, except in instances  
21 where a minimum Rate is applicable in accordance with the relevant Project ratesetting policy.  
22 Proposed changes of significance in practices which implement the ratesetting policies for the

1 Project will not be implemented until the Contracting Officer has provided the Contractor an  
2 opportunity to discuss the nature, need, and impact of the proposed change. The Contractor  
3 retains all rights to challenge the validity of Rates and Charges imposed pursuant to this  
4 Settlement Contract, including but not limited to operation and maintenance expenses and  
5 operation and maintenance deficits, in an appropriate administrative or judicial proceeding.

6 (h) Except as provided in subsection 3405(a)(1)(B) of the CVPIA, the Rates  
7 for Project Water transferred, exchanged, or otherwise disposed of, by the Contractor shall be the  
8 Contractor's Rates adjusted upward or downward to reflect the changed costs of delivery (if any)  
9 of the transferred, exchanged, or otherwise disposed of Project Water to the transferee's point of  
10 delivery in accordance with the then-current ratesetting policies for the Project. Except as  
11 provided in subsection 3407(d)(2)(A) of the CVPIA, the Charges for Project Water transferred,  
12 exchanged, or otherwise disposed of, by the Contractor shall be the Contractor's Charges  
13 specified in Exhibit D. If the Contractor is receiving lower Rates and Charges because of  
14 inability to pay and is transferring, exchanging, or otherwise disposing of Project Water to  
15 another entity whose Rates and Charges are not adjusted due to inability to pay, the Rates and  
16 Charges for transferred, exchanged, or otherwise disposed of Project Water shall be the  
17 Contractor's Rates and Charges unadjusted for ability to pay.

18 (i) Pursuant to the Act of October 27, 1986 (100 Stat. 3050), the Contracting  
19 Officer is authorized to adjust determinations of ability to pay every 5 years.

20 (j) Each payment to be made pursuant to subdivisions (a) and (b) of this  
21 Article shall be made at the office of the Bureau of Reclamation, Mid-Pacific Region, File

1 No. 11546, P.O. Box 6000, San Francisco, California 94160-1546, or at such other place as the  
2 United States may designate in a written notice to the said Contractor. Payments shall be made  
3 by cash transaction, wire, or any other mechanism as may be agreed to in writing by the  
4 Contractor and the Contracting Officer. In the event there should be a default in the payment of  
5 the amount due, the delinquent payment provisions of Article 13 shall apply. The Contractor  
6 shall not be relieved of the whole or any part of its said obligation by, on account of, or  
7 notwithstanding, as the case may be:

8 (1) Its failure, refusal, or neglect to divert 75 percent of the quantity of  
9 Project Water shown on Exhibit A;

10 (2) The default in payment to it by any water user of assessments,  
11 tolls, or other charges levied by or owing to said Contractor;

12 (3) Any judicial determination that any assessment, toll, or other  
13 charge referred to in subsection 8(c)(2) of this Settlement Contract is irregular, void, or  
14 ineffectual; or

15 (4) Any injunctive process enjoining or restraining the Contractor  
16 from making or collecting any such assessment, toll, or other charge referred to in subsection  
17 8(c)(2) of this Settlement Contract.

18 AGREEMENT ON WATER QUANTITIES

19 9. (a) During the term of this Settlement Contract and any renewals thereof:

20 (1) It shall constitute full agreement as between the United States and  
21 the Contractor as to the quantities of water and the allocation thereof between Base Supply and  
22 Project Water which may be diverted by the Contractor from the Sacramento River for beneficial

1 use on the land shown on Exhibit B which said diversion, use, and allocation shall not be  
2 disturbed so long as the Contractor shall fulfill all of its obligations hereunder;

3 (2) Neither party shall claim any right against the other in conflict with  
4 the provisions of Article 9(a)(1) hereof.

5 (b) Nothing herein contained is intended to or does limit rights of the  
6 Contractor against others than the United States or of the United States against any person other  
7 than the Contractor: Provided, however, that in the event the Contractor, the United States, or  
8 any other person shall become a party to a general adjudication of rights to the use of water of  
9 the Sacramento River system, this Settlement Contract shall not jeopardize the rights or position  
10 of either party hereto or of any other person and the rights of all such persons in respect to the  
11 use of such water shall be determined in such proceedings the same as if this Settlement Contract  
12 had not been entered into, and if final judgment in any such general adjudication shall determine  
13 that the rights of the parties hereto are different from the rights as assumed herein, the parties  
14 shall negotiate an amendment to give effect to such judgment. In the event the parties are unable  
15 to agree on an appropriate amendment they shall, within 60 days of determining that there is an  
16 impasse, employ the services of a neutral mediator, experienced in resolving water rights  
17 disputes, to assist in resolving the impasse. The cost of the mediation will be shared equally. A  
18 failure to reach agreement on an amendment within 60 days of the end of mediation will cause  
19 the immediate termination of this Settlement Contract.

20 (c) In the event that the California State Water Resources Control Board or a  
21 court of competent jurisdiction issues a final decision or order modifying the terms and  
22 conditions of the water rights of either party to this Settlement Contract in order to impose

1 Bay-Delta water quality obligations, the Contractor and the United States shall promptly meet to  
2 determine whether or not to modify any of the terms of this Settlement Contract to comply with  
3 the final decision or order, including, but not limited to, the applicability of the rescheduling  
4 charge in Article 3(c)(1) of this Settlement Contract. If within 60 days of the date of the issuance  
5 of the final decision or order the parties are not able to reach agreement regarding either the need  
6 to modify this Settlement Contract or the manner in which this Settlement Contract is to be  
7 modified, the parties shall promptly retain a neutral mediator, experienced in resolving water  
8 right disputes, to assist the parties in resolving their dispute. The cost of the mediator shall be  
9 shared equally. In the event that either of the parties to this Settlement Contract determines that  
10 the parties will not be able to develop mutually-agreeable modification(s) to this Settlement  
11 Contract even with the assistance of a mediator, either of the parties to this Settlement Contract  
12 may attempt to resolve the impasse by seeking appropriate judicial relief including, but not  
13 limited to, filing a general adjudication of the rights to the use of water in the Sacramento River  
14 system. The foregoing provisions of this sub-article shall only apply to the incremental  
15 obligations contained within a final decision or order of the State Water Resources Control  
16 Board that reflects a modification to the obligations imposed in State Water Resources Control  
17 Board Revised Water Rights Decision 1641 dated March 15, 2000, and its associated 1995 Water  
18 Quality Control Plan which, taken together, will be considered the baseline for the application of  
19 the provisions of this sub-article.

20 (d) In the event this Settlement Contract terminates, the rights of the parties to  
21 thereafter divert and use water shall exist as if this Settlement Contract had not been entered into;  
22 and the fact that as a compromise settlement of a controversy as to the respective rights of the

1 parties to divert and use water and the yield of such rights during the term hereof, this Settlement  
2 Contract places a limit on the Contract Total to be diverted annually by the Contractor during the  
3 Settlement Contract term and segregates it into Base Supply and Project Water shall not  
4 jeopardize the rights or position of either party with respect to its water rights or the yield thereof  
5 at all times after the Settlement Contract terminates. It is further agreed that the Contractor at all  
6 times will first use water to the use of which it is entitled by virtue of its own water rights, and  
7 neither the provisions of this Settlement Contract, action taken thereunder, nor payments made  
8 thereunder to the United States by the Contractor shall be construed as an admission that any part  
9 of the water used by the Contractor during the term of this Settlement Contract was in fact water  
10 to which it would not have been entitled under water rights owned by it nor shall receipt of  
11 payments thereunder by the United States from the Contractor be construed as an admission that  
12 any part of the water used by the Contractor during the term of this Settlement Contract was in  
13 fact water to which it would have been entitled under water rights owned by it.

14 MEASUREMENT OF WATER

15 10. (a) All water diverted by the Contractor from the Sacramento River will be  
16 diverted at the existing point or points of diversion shown on Exhibit A or at such other points as  
17 may be mutually agreed upon in writing by the Contracting Officer and the Contractor.

18 (b) All water diverted from the Sacramento River pursuant to this Settlement  
19 Contract will be measured or caused to be measured by the United States at each point of  
20 diversion with existing equipment or equipment to be installed, operated, and maintained by the  
21 United States, and/or others, under contract with and at the option of the United States. The  
22 equipment and methods used to make such measurement shall be in accordance with sound

1 engineering practices. Upon request of the Contractor, the accuracy of such measurements will  
2 be investigated by the Contracting Officer and any errors appearing therein will be corrected.

3 (c) The right of ingress to and egress from all points of diversion is hereby  
4 granted to all authorized employees of the United States. The Contractor also hereby grants to  
5 the United States the right to install, operate, maintain, and replace such equipment on diversion  
6 or carriage facilities at each point of diversion as the Contracting Officer deems necessary.

7 (d) The Contractor shall not modify, alter, remove, or replace diversion  
8 facilities or do any other act which would alter the effectiveness or accuracy of the measuring  
9 equipment installed by the United States or its representatives unless and until the Contracting  
10 Officer has been notified with due diligence and has been given an opportunity to modify such  
11 measuring equipment in such manner as may be necessary or appropriate. In the event of an  
12 emergency the Contractor shall notify the United States within a reasonable time thereafter as to  
13 the existence of the emergency and the nature and extent of such modification, alteration,  
14 removal, or replacement of diversion facilities.

15 (e) The Contractor shall pay the United States for the costs to repair, relocate,  
16 or replace measurement equipment when the Contractor modifies, alters, removes, or replaces  
17 diversion or carriage facilities.

18 (f) Contractor and Contracting Officer shall develop a mutually agreeable  
19 surface water delivery water measurement program which shall be implemented by the  
20 Contractor, and such measurement program shall be consistent with the conservation and  
21 efficiency criteria for evaluating water conservation plans as provided in Article 29(a).

1 (g) All new surface water delivery systems installed within the lands  
2 delineated on Exhibit B after the effective date of this Settlement Contract shall also comply with  
3 the measurement provisions described in this Article.

4 RULES AND REGULATIONS

5 11. The parties agree that the delivery of Project Water for irrigation use or use of  
6 Federal facilities pursuant to this Settlement Contract is subject to Federal Reclamation law,  
7 including but not limited to, the Reclamation Reform Act of 1982 (43 U.S.C. 390aa et seq.), as  
8 amended and supplemented, and the rules and regulations promulgated by the Secretary of the  
9 Interior under Federal Reclamation law.

10 GENERAL OBLIGATION--BENEFITS CONDITIONED UPON PAYMENT

11 12. (a) The obligation of the Contractor to pay the United States as provided in  
12 this Settlement Contract is a general obligation of the Contractor notwithstanding the manner in  
13 which the obligation may be distributed among the Contractor's water users and notwithstanding  
14 the default of individual water users in their obligations to the Contractor.

15 (b) The payment of Charges becoming due hereunder is a condition precedent  
16 to receiving benefits under this Settlement Contract. The United States shall not make water  
17 available to the Contractor through Project facilities during any period in which the Contractor  
18 may be in arrears in the advance payment of water Rates due the United States. The Contractor  
19 shall not furnish water made available pursuant to this Settlement Contract for lands or parties  
20 which are in arrears in the advance payment of water rates levied or established by the  
21 Contractor.

22 (c) With respect to subdivision (b) of this Article, the Contractor shall have no  
23 obligation to require advance payment for water Rates which it levies.

24 CHARGES FOR DELINQUENT PAYMENTS

25 13. (a) The Contractor shall be subject to interest, administrative and penalty  
26 charges on delinquent installments or payments. When a payment is not received by the due  
27 date, the Contractor shall pay an interest charge for each day the payment is delinquent beyond  
28 the due date. When a payment becomes 60 days delinquent, the Contractor shall pay an  
29 administrative charge to cover additional costs of billing and processing the delinquent payment.

1 When a payment is delinquent 90 days or more, the Contractor shall pay an additional penalty  
2 charge of six percent per year for each day the payment is delinquent beyond the due date.  
3 Further, the Contractor shall pay any fees incurred for debt collection services associated with a  
4 delinquent payment.

5 (b) The interest charge rate shall be the greater of the rate prescribed quarterly  
6 in the Federal Register by the Department of the Treasury for application to overdue payments,  
7 or the interest rate of one-half of one percent per month prescribed by Section 6 of the  
8 Reclamation Project Act of 1939 (Public Law 76-260). The interest charge rate shall be  
9 determined as of the due date and remain fixed for the duration of the delinquent period.

10 (c) When a partial payment on a delinquent account is received, the amount  
11 received shall be applied, first to the penalty, second to the administrative charges, third to the  
12 accrued interest, and finally to the overdue payment.

13 QUALITY OF WATER

14 14. The operation and maintenance of Project facilities shall be performed in such  
15 manner as is practicable to maintain the quality of raw water made available through such  
16 facilities at the highest level reasonably attainable as determined by the Contracting Officer. The  
17 United States does not warrant the quality of water and is under no obligation to construct or  
18 furnish water treatment facilities to maintain or better the quality of water.

19 WATER AND AIR POLLUTION CONTROL

20 15. The Contractor, in carrying out this Settlement Contract, shall comply with all  
21 applicable water and air pollution laws and regulations of the United States and the State of  
22 California, and shall obtain all required permits or licenses from the appropriate Federal, State,  
23 or local authorities.

24 EQUAL OPPORTUNITY

25 16. During the performance of this Settlement Contract, the Contractor agrees as  
26 follows:

1           (a)     The Contractor will not discriminate against any employee or applicant for  
2 employment because of race, color, religion, sex, or national origin. The Contractor will take  
3 affirmative action to ensure that applicants are employed, and that employees are treated during  
4 employment, without regard to their race, color, religion, sex, or national origin. Such action  
5 shall include, but not be limited to, the following: Employment, upgrading, demotion, or  
6 transfer; recruitment or recruitment advertising; layoff or termination, rates of payment or other  
7 forms of compensation; and selection for training, including apprenticeship. The Contractor  
8 agrees to post in conspicuous places, available to employees and applicants for employment,  
9 notices to be provided by the Contracting Officer setting forth the provisions of this  
10 nondiscrimination clause.

11           (b)     The Contractor will, in all solicitations or advertisements for employees  
12 placed by or on behalf of the Contractor, state that all qualified applicants will receive  
13 consideration for employment without discrimination because of race, color, religion, sex, or  
14 national origin.

15           (c)     The Contractor will send to each labor union or representative of workers  
16 with which it has a collective bargaining agreement or other contract or understanding, a notice,  
17 to be provided by the Contracting Officer, advising the said labor union or workers'  
18 representative of the Contractor's commitments under Section 202 of Executive Order No. 11246  
19 of September 24, 1965, as amended, and shall post copies of the notice in conspicuous places  
20 available to employees and applicants for employment.

21           (d)     The Contractor will comply with all provisions of Executive Order No.  
22 11246 of September 24, 1965, as amended, and of the rules, regulations, and relevant orders of  
23 the Secretary of Labor.

24           (e)     The Contractor will furnish all information and reports required by said  
25 amended Executive Order and by the rules, regulations, and orders of the Secretary of Labor, or  
26 pursuant thereto, and will permit access to its books, records, and accounts by the Contracting  
27 Officer and the Secretary of Labor for purposes of investigation to ascertain compliance with  
28 such rules, regulations, and orders.

29           (f)     In the event of the Contractor's noncompliance with the nondiscrimination  
30 clauses of this Settlement Contract or with any of the said rules, regulations, or orders, this  
31 Settlement Contract may be canceled, terminated, or suspended, in whole or in part, and the  
32 Contractor may be declared ineligible for further Government contracts in accordance with  
33 procedures authorized in said amended Executive Order, and such other sanctions may be  
34 imposed and remedies invoked as provided in said Executive Order, or by rule, regulation, or  
35 order of the Secretary of Labor, or as otherwise provided by law.

36           (g)     The Contractor will include the provisions of paragraphs (a) through (g) in  
37 every subcontract or purchase order unless exempted by the rules, regulations, or orders of the

1 Secretary of Labor issued pursuant to Section 204 of said amended Executive Order, so that such  
2 provisions will be binding upon each subcontractor or vendor. The Contractor will take such  
3 action with respect to any subcontract or purchase order as may be directed by the Secretary of  
4 Labor as a means of enforcing such provisions, including sanctions for noncompliance:  
5 Provided, however, that in the event the Contractor becomes involved in, or is threatened with,  
6 litigation with a subcontractor or vendor as a result of such direction, the Contractor may request  
7 the United States to enter into such litigation to protect the interests of the United States.

8 COMPLIANCE WITH CIVIL RIGHTS LAWS AND REGULATIONS

9 17. (a) The Contractor shall comply with Title VI of the Civil Rights Act of 1964  
10 (42 U.S.C. 2000d), Section 504 of the Rehabilitation Act of 1975 (P.L. 93-112, as amended), the  
11 Age Discrimination Act of 1975 (42 U.S.C. 6101, et seq.) and any other applicable civil rights  
12 laws, as well as with their respective implementing regulations and guidelines imposed by the  
13 U.S. Department of the Interior and/or Bureau of Reclamation.

14 (b) These statutes require that no person in the United States shall, on the  
15 grounds of race, color, national origin, handicap, or age, be excluded from participation in, be  
16 denied the benefits of, or be otherwise subjected to discrimination under any program or activity  
17 receiving financial assistance from the Bureau of Reclamation. By executing this Settlement  
18 Contract, the Contractor agrees to immediately take any measures necessary to implement this  
19 obligation, including permitting officials of the United States to inspect premises, programs, and  
20 documents.

21 (c) The Contractor makes this agreement in consideration of and for the  
22 purpose of obtaining any and all Federal grants, loans, contracts, property discounts, or other  
23 Federal financial assistance extended after the date hereof to the Contractor by the Bureau of  
24 Reclamation, including installment payments after such date on account of arrangements for  
25 Federal financial assistance which were approved before such date. The Contractor recognizes  
26 and agrees that such Federal assistance will be extended in reliance on the representations and  
27 agreements made in this Article, and that the United States reserves the right to seek judicial  
28 enforcement thereof.

29 MINGLING OF CONTRACTOR'S PROJECT AND NON-PROJECT WATER

30 18. (a) Project Water must of necessity be transported by the Contractor to its  
31 water users by means of the same works and channels used for the transport of its non-Project  
32 Water including Base Supply. Notwithstanding such mingling of water, the provisions of Article  
33 11 hereof shall be applicable only to Project Water, and such mingling of water shall not in any

1 manner subject to the provisions of Article 11 hereof the Contractor's non-Project Water  
2 including Base Supply.

3 (b) If required in accordance with subdivision (c) of this Article, the  
4 Contractor shall install and maintain such measuring equipment and distribution facilities and  
5 maintain such records as may be necessary to determine the amounts of water delivered to  
6 Excess Lands served by the Contractor. The Contractor shall not within any month deliver to  
7 Ineligible Lands water in excess of the non-Project Water, including Base Supply, for that  
8 month. The Contracting Officer or authorized representative shall have the right at all  
9 reasonable times to inspect such records and measuring equipment.

10 (c) The Contractor will not be considered in violation of the requirement that  
11 Project Water be delivered only to Eligible Lands during any month of the irrigation season that  
12 the water requirement for beneficial use on Eligible Lands for that month is equal to or in excess  
13 of the Project Water for that month as shown on Exhibit A or any revision thereof pursuant to  
14 subdivision (c) of Article 3. The water requirement for beneficial use on Eligible Lands will be  
15 determined by multiplying:

16 (1) the number of irrigable acres of the particular types of crops grown  
17 in that year on the acreage designated as eligible by

18 (2) the Unit Duties as set forth in Exhibit C attached hereto and made  
19 a part hereof, or by such other Unit Duties mutually agreed upon by the Contractor and the  
20 Contracting Officer. In order to make the computation of the water requirement for Eligible  
21 Lands, on April 1 of each Year and concurrently with its order for water for the irrigation season,  
22 the Contractor shall designate the acreage of and type of crops to be grown on its Eligible Lands

1 that irrigation season. During any month the water requirement as above determined for crops  
2 growing on Eligible Lands during such month is equal to or in excess of the Project Water for  
3 that month as provided herein the Contractor shall not be required to measure the water delivered  
4 to Excess Lands. Any month the said water requirement is less than the amount of Project Water  
5 as provided herein, the Contractor will be required to measure water delivered to excess land in  
6 accordance with subdivision (b) hereof.

7 BOOKS, RECORDS, AND REPORTS

8 19. The Contractor shall establish and maintain accounts and other books and records  
9 pertaining to administration of the terms and conditions of this Settlement Contract, including:  
10 the Contractor's financial transactions, water supply data, and Project land and right-of-way  
11 agreements; the water users' land-use (crop census), land ownership, land-leasing and water use  
12 data; and other matters that the Contracting Officer may require. Reports thereon shall be  
13 furnished to the Contracting Officer in such form and on such date or dates as the Contracting  
14 Officer may require. Subject to applicable Federal laws and regulations, each party to this  
15 Settlement Contract shall have the right during office hours to examine and make copies of each  
16 other's books and official records relating to matters covered by this Settlement Contract.

17 CHANGE OF PLACE OF USE OR ORGANIZATION

18 20. (a) Unless the written consent of the United States is first obtained no change  
19 shall be made in the place of water use shown on Exhibit B.

20 (b) While this Settlement Contract is in effect, no change shall be made in the  
21 area of the Contractor as shown on its Exhibit B, by inclusion, exclusion, annexation, or  
22 detachment of lands, by dissolution, consolidation, or merger or otherwise, except upon the  
23 Contracting Officer's written consent thereto. Such consent will not be unreasonably withheld  
24 and a decision will be provided in a timely manner.

25 (c) In the event lands are annexed to or detached from the area of the  
26 Contractor, as provided herein, the quantity of Project Water to be diverted may be increased or

1 decreased, as may be appropriate, pursuant to a supplemental agreement to be executed in  
2 respect thereto.

3 CONSOLIDATION OF CONTRACTING ENTITIES

4 21. Consolidation of Contractors may be approved by the Contracting Officer  
5 provided: (i) the Contracting Officer approves the form and organization of the resulting entity  
6 and the utilization by it of the Contract Total; and (ii) the obligations of the Contractors are  
7 assumed by such entity.

8 No such consolidation shall be valid unless and until approved by the Contracting  
9 Officer.

10 NOTICES

11 22. Any notice, demand, or request authorized or required by this Settlement Contract  
12 shall be deemed to have been given, on behalf of the Contractor, when mailed, postage prepaid,  
13 or delivered to the Area Manager, Northern California Area Office, Bureau of Reclamation,  
14 16349 Shasta Dam Boulevard, Shasta Lake, California 96019, and on behalf of the United  
15 States, when mailed, postage prepaid, or delivered to the Board of Directors of the Princeton-  
16 Codora-Glenn Irrigation District, P.O. Box 98 (252 Commercial Street), Princeton, California  
17 95970. The designation of the addressee or the address may be changed by notice given in the  
18 same manner as provided in this Article for other notices.

19 ASSIGNMENT LIMITED--SUCCESSORS AND ASSIGNS OBLIGATED

20 23. (a) The provisions of this Settlement Contract shall apply to and bind the  
21 successors and assigns of the parties hereto, but no assignment or transfer of this Settlement  
22 Contract or any right or interest therein shall be valid until approved in writing by the  
23 Contracting Officer.

24 (b) The assignment of any right or interest in this Settlement Contract by  
25 either party shall not interfere with the rights or obligations of the other party to this Settlement  
26 Contract absent the written concurrence of said other party.

27 (c) The Contracting Officer shall not unreasonably condition or withhold his  
28 approval of any proposed assignment.

OFFICIALS NOT TO BENEFIT

24. (a) No Member of or Delegate to Congress, Resident Commissioner, or official of the Contractor shall benefit from this Settlement Contract other than as a water user or landowner in the same manner as other water users or landowners.

(b) No officer or member of the governing board of the Contractor shall receive any benefit that may arise by reason of this Settlement Contract other than as a landowner within the Contractor’s service area and in the same manner as other landowners within the said service area.

CONTINGENT UPON APPROPRIATION OR ALLOTMENT OF FUNDS

25. The expenditure or advance of any money or the performance of any obligation of the United States under this Settlement Contract shall be contingent upon appropriation or allotment of funds. Absence of appropriation or allotment of funds shall not relieve the Contractor from any obligations under this Settlement Contract. No liability shall accrue to the United States in case funds are not appropriated or allotted.

CONFIRMATION OF SETTLEMENT CONTRACT

26. The Contractor, after the execution of this Settlement Contract, shall promptly seek to secure a decree of a court of competent jurisdiction of the State of California, if appropriate, confirming the execution of this Settlement Contract. The Contractor shall furnish the United States a certified copy of the final decree, the validation proceedings, and all pertinent supporting records of the court approving and confirming this Settlement Contract, and decreeing and adjudging it to be lawful, valid, and binding on the Contractor. This Settlement Contract shall not be binding on the United States until such final decree has been secured.

UNAVOIDABLE GROUNDWATER PERCOLATION

27. To the extent applicable, the Contractor shall not be deemed to have delivered Project Water to Excess Lands or Ineligible Lands if such lands are irrigated with groundwater that reaches the underground strata as an unavoidable result of the delivery of Project Water by the Contractor to Eligible Lands.

PRIVACY ACT COMPLIANCE

28. (a) The Contractor shall comply with the Privacy Act of 1974 (5 U.S.C. 552a) (the Act) and the Department of the Interior rules and regulations under the Act (43 CFR 2.45

1 et seq.) in maintaining Landholder acreage certification and reporting records, required to be  
2 submitted to the Contractor for compliance with Sections 206 and 228 of the Reclamation  
3 Reform Act of 1982 (96 Stat. 1266), and pursuant to 43 CFR 426.18.

4 (b) With respect to the application and administration of the criminal penalty  
5 provisions of the Act (5 U.S.C. 552a(i)), the Contractor and the Contractor's employees  
6 responsible for maintaining the certification and reporting records referenced in (a) above are  
7 considered to be employees of the Department of the Interior. See 5 U.S.C. 552a(m).

8 (c) The Contracting Officer or a designated representative shall provide the  
9 Contractor with current copies of the Interior Department Privacy Act regulations and the Bureau  
10 of Reclamation Federal Register Privacy Act System of Records Notice (Acreage Limitation--  
11 Interior, Reclamation-31) which govern the maintenance, safeguarding, and disclosure of  
12 information contained in the Landholder's certification and reporting records.

13 (d) The Contracting Officer shall designate a full-time employee of the  
14 Bureau of Reclamation to be the System Manager who shall be responsible for making decisions  
15 on denials pursuant to 43 CFR 2.61 and 2.64 amendment requests pursuant to 43 CFR 2.72. The  
16 Contractor is authorized to grant requests by individuals for access to their own records.

17 (e) The Contractor shall forward promptly to the System Manager each  
18 proposed denial of access under 43 CFR 2.64; and each request for amendment of records filed  
19 under 43 CFR 2.71; notify the requester accordingly of such referral; and provide the System  
20 Manager with information and records necessary to prepare an appropriate response to the  
21 requester. These requirements do not apply to individuals seeking access to their own  
22 certification and reporting forms filed with the Contractor pursuant to 43 CFR 426.18, unless the  
23 requester elects to cite the Privacy Act as a basis for the request.

24 WATER CONSERVATION

25 29. (a) Prior to the diversion of Project Water, the Contractor shall be  
26 implementing an effective water conservation and efficiency program based on the Basin-Wide  
27 Water Management Plan and/or Contractor's water conservation plan that has been determined  
28 by the Contracting Officer to meet the conservation and efficiency criteria for evaluating water  
29 conservation plans established under Federal law. The water conservation and efficiency  
30 program shall contain definite water conservation objectives, appropriate economically feasible  
31 water conservation measures, and time schedules for meeting those objectives. Continued

1 diversion of Project Water pursuant to this Settlement Contract shall be contingent upon the  
2 Contractor's continued implementation of such water conservation program. In the event the  
3 Contractor's water conservation plan or any revised water conservation plan completed pursuant  
4 to subdivision (c) of Article 29 of this Settlement Contract have not yet been determined by the  
5 Contracting Officer to meet such criteria, due to circumstances which the Contracting Officer  
6 determines are beyond the control of the Contractor, Project Water deliveries shall be made  
7 under this Settlement Contract so long as the Contractor diligently works with the Contracting  
8 Officer to obtain such determination at the earliest practicable date, and thereafter the Contractor  
9 immediately begins implementing its water conservation and efficiency program in accordance  
10 with the time schedules therein.

11 (b) The Contractor shall submit to the Contracting Officer a report on the  
12 status of its implementation of the water conservation plan on the reporting dates specified in the  
13 then existing conservation and efficiency criteria established under Federal law.

14 (c) At 5-year intervals, the Contractor shall revise its water conservation plan  
15 to reflect the then current conservation and efficiency criteria for evaluating water conservation  
16 plans established under Federal law and submit such revised water management plan to the  
17 Contracting Officer for review and evaluation. The Contracting Officer will then determine if  
18 the water conservation plan meets Reclamation's then current conservation and efficiency  
19 criteria for evaluating water conservation plans established under Federal law.

20 (d) If the Contractor is engaged in direct ground-water recharge, such activity  
21 shall be described in the Contractor's water conservation plan.

1           (e)     In order to provide incentives for water conservation, the Contractor may  
2 reduce the amount of Project Water for which payment is required under Article 8(a) in  
3 accordance with the provisions of this Article 29(e).

4           (1)     On or before February 15 of any Water Year, the Contractor may  
5 file with Reclamation an offer to reduce Project Water use, hereinafter referred to as Offer. The  
6 Offer shall specify the maximum quantity of Project Water to be diverted by the Contractor for  
7 each month that Project Water is available for that Water Year under this Settlement Contract.  
8 The Contracting Officer shall provide the Contractor with a decision, in writing, to the Offer on  
9 or before March 15 of that Water Year. The dates specified in this Article 29(e)(1) can be  
10 changed if mutually agreed to, in writing, by the Contractor and Contracting Officer.

11           (2)     If Reclamation accepts the Offer, the Contractor's payment  
12 obligation under Article 8(a)(1) shall be reduced to the maximum quantity of Project Water to be  
13 diverted by the Contractor as specified in the Offer. The Contractor shall not divert Project  
14 Water in excess of the quantities set forth in the Offer: Provided, however, if the Contractor's  
15 diversions of Project Water exceed the quantities set forth in the Offer, the Contractor shall pay  
16 to Reclamation the applicable Rates and Charges plus an amount equal to the applicable Rates  
17 and Charges, unadjusted for ability to pay, for each acre-foot of Project Water diverted in excess  
18 of the quantities set forth in the Offer.

19           (3)     If Reclamation decides not to accept the Offer, the Contractor's  
20 payment obligation will remain as specified in Article 8(a)(1).

1                   (4)     The provisions of this Article 29(e) shall be in addition to and shall  
2 not affect the provisions of Article 3(e) pertaining to the sale, transfer, exchange, or other  
3 disposal of the Contract Total designated in Exhibit A.

4   OPINIONS AND DETERMINATIONS

5           30.     (a)     Where the terms of this Settlement Contract provide for actions to be  
6 based upon the opinion or determination of either party to this Settlement Contract, said terms  
7 shall not be construed as permitting such action to be predicated upon arbitrary, capricious, or  
8 unreasonable opinions or determinations. Both parties, notwithstanding any other provisions of  
9 this Settlement Contract, expressly reserve the right to seek relief from and appropriate  
10 adjustment for any such arbitrary, capricious, or unreasonable opinion or determination. Each  
11 opinion or determination by either party shall be provided in a timely manner. Nothing in  
12 subdivision (a) of Article 30 of this Settlement Contract is intended to or shall affect or alter the  
13 standard of judicial review applicable under Federal law to any opinion or determination  
14 implementing a specific provision of Federal law embodied in statute or regulation.

15                   (b)     The Contracting Officer shall have the right to make determinations  
16 necessary to administer this Settlement Contract that are consistent with the provisions of this  
17 Settlement Contract, the laws of the United States and of the State of California, and the rules  
18 and regulations promulgated by the Secretary of the Interior. Such determinations shall be made  
19 in consultation with the Contractor to the extent reasonably practicable.

20   CONTRACTOR TO PAY CERTAIN MISCELLANEOUS COSTS

21           31.     (a)     In addition to all other payments to be made by the Contractor pursuant to  
22 this Settlement Contract, the Contractor shall pay to the United States, within 60 days after

1 receipt of a bill and detailed statement submitted by the Contracting Officer to the Contractor for  
2 such specific items of direct cost incurred by the United States for work requested by the  
3 Contractor associated with this Settlement Contract plus indirect costs in accordance with  
4 applicable Bureau of Reclamation policies and procedures. All such amounts referred to in this  
5 Article shall not exceed the amount agreed to in writing in advance by the Contractor. This  
6 Article shall not apply to costs for routine contract administration.

7 (b) All advances for miscellaneous costs incurred for work requested by the  
8 Contractor pursuant to Article 31 of this Settlement Contract shall be adjusted to reflect the  
9 actual costs when the work has been completed. If the advances exceed the actual costs incurred,  
10 the difference will be refunded to the Contractor. If the actual costs exceed the Contractor's  
11 advances, the Contractor will be billed for the additional costs pursuant to Article 31 of this  
12 Settlement Contract.

13 WAIVER OF DEFAULT

14 32. The waiver by either party to this Settlement Contract as to any default shall not  
15 be construed as a waiver of any other default or as authority of the other party to continue such  
16 default or to make, do, or perform, or not to make, do, or perform, as the case may be, any act or  
17 thing which would constitute a default.

WATER RATES AND CHARGES

*Note: Rates and Charges shown are 2003 rates. This exhibit will be updated prior to execution of the contract to reflect the Rates and Charges for 2004.*

COST OF SERVICE RATES:	<u>Per Acre-Foot</u>
Capital Rates	
Storage	\$4.29
O&M Rates:	
Water Marketing	\$6.28
Storage	\$5.57
Deficit Rates:	
Interest Bearing	\$2.03
CFO/PFR Adjustment Rate 1/	<u>\$1.25</u>
TOTAL	<u>\$19.42</u>

FULL-COST RATES:

Section 202(3) Rate is applicable to a Qualified Recipient or to a Limited Recipient receiving irrigation water on or before October 1, 1981. \$25.47

Section 205(a)(3) Rate is applicable to a Limited Recipient that did not receive irrigation water on or before October 1, 1981. \$27.88

CHARGES UNDER P.L. 102-575 TO THE RESTORATION FUND 2/

Restoration Payments (3407(d)(2)(A)) \$7.69

1/ Chief Financial Officer (CFO) adjustment and Provision for Replacement (PFR) expense is being distributed over a 5-year period beginning in FY 2003 for those contractors that requested those costs be deferred.

2/ Restoration fund charges are payments in addition to the water rates and were determined pursuant to Title XXXIV of Public Law 102-575. Restoration fund charges are on a fiscal year basis (10/1 - 9/30).
