

Anti-Washout admixtures. - The Contractor shall use an anti-washout admixture, referred to herein as AWA, in all concrete placed under water. For assistance locating a supplier, the contractor may contact the Bureau of Reclamation Materials Engineering and Research Group.

The contractor will submit samples for testing and approval 30 days prior to placing concrete.

The AWA submitted will provide equivalent resistance to washout as Master Builder's PS-802, or Sika SC-100 in the Corps of Engineers test CRD-C 61-89A Test Method for Determining the Resistance of Freshly Mixed Concrete to Washing Out in Water .

However, the Contracting Officer reserves the right to adjust the quantities of AWA or eliminate its use, and the Contractor shall be entitled to no additional allowances for such adjustments.
