**Subject:** August AMWG Presentation on LTEP

Please include this e-mail and the attached outline in the mailout of materials for the presentation of progress on the Long-Term Experimental Plan at the AMWG meeting on August 9-11, 2004. The outline provides general subject matter for the presentation, but is lacking in the details of our accomplishments. That is because GCMRC and the LTEP Ad Hoc will be meeting in the period between now and the AMWG meeting to continue the process of developing the LTEP. We will provide additional information and sufficient detail at the meeting to illustrate more clearly the progress that has been made by that time. Thanks.

## Proposed LTEP Presentation to AMWG August 2004

- I. What we Know, What we Suspect, What we Don't Know: Potential LTEP Experimental Actions and Knowledge of their Anticipated Effects
  - a. Physical Resources
  - b. Biological Resources
  - c. Cultural Resources
- II. Strengths and Weaknesses of Conceptual Experimental Designs
  - a. Factorial Design
  - b. Forward Titration Design
  - c. Reverse Titration Design
  - d. Hybrid Split Design
- III. Proposed Process and Schedule for Completing LTEP
  - a. Develop list of proposed actions in LTEP (July 23 deadline)
  - b. Convene workshop of scientists and managers to assess knowledge of effects of proposed actions (August 13 deadline)
  - c. Produce workshop report conveying findings for review and feedback by participants(August 25 deadline)
  - d. Communicate workshop report and framework for proposed LTEP to GCMRC and SAB (August 27 deadline)
  - e. GCMRC, TWG and SAB produce draft LTEP for Reclamation to mailout to AMWG (September 15 deadline)
  - f. Convey draft LTEP to AMWG and Science Advisors (for evaluation and risk assessment) (September 20 deadline)
  - g. Present draft LTEP and risk assessment to AMWG (~Oct 20)
