

TO: TWG members

FROM: The Ad Hoc Committee on Strategic Planning

SUBJECT: Strategic Plan

This packet includes the latest version of the Strategic Plan for your review. The redlining has been minimized in this version. The only redlined items are (1) the proposed changes to two goals that the AMWG hasn't yet considered, and (2) changes to the document based on your comments at the February TWG meeting.

The packet also includes the comments and responses table from that meeting, and the Riparian Issue Paper, also revised based on your input in February. Next week we will send you some additional definitions that we propose to add to the Glossary.

The Ad Hoc Committee on Strategic Planning is ready to recommend this document to the AMWG for adoption. We seek your concurrence in that recommendation, and we hope that you will indicate concurrence at your meeting in March. Concurrence doesn't mean that this document is exactly how you would have written it.

Concurrence means that you support moving forward with this document as our guide, and that if you have a concern, you know that it has been heard, discussed, and considered by the TWG and by the Ad Hoc Committee.

Please feel free to contact any one of the Ad Hoc Committee members if there are particular items you wish to discuss before your TWG meeting in March. Thank you.
