Subject: Re: Teams Webinar Dec 2

Thanks, don't know if it's a bandwidth issue, or my lack of standing with the group, but it has been very frustrating. Didn't have these problems with Web Ex FYI.

I am unable to unmute myself

Bill,
I apologize for the webinar not working for you. The recording will be up this afternoon at <https://www.usbr.gov/ColoradoRiverBasin/SEIS.html>. Hopefully that meets your needs. If you need further assistance, let me know.

Colorado River Basin. The Colorado River is a critical resource in the West. Seven U.S. states—Arizona, California, Colorado, Nevada, New Mexico, Utah, and Wyoming, two Mexican states—Baja California and Sonora, and many Native American tribes and communities depend on it for water supply, hydropower, recreation, fish and wildlife habitat, and other benefits.

Subject: [EXTERNAL] Teams Webinar Dec 2

This email has been received from outside of DOI - Use caution before clicking on links, opening attachments, or responding. ☒

Microsoft Teams is a poor choice for many of us users, the presentation does not appear on the screen without a lot of clicking between the presenter and what appears to be an icon for a pdf file. I'm really unable to follow along with the verbal description without being able to see the slides.

Can you re-do this webinar with a tool that I can use? Webex? A friendlier Teams that is set up for non DOI participants? Perhaps the recorded version will meet my needs, but it is extremely frustrating to be unable to see this presentation.
