Dear Project Manager:

I would like to know why our government, BOR and NPS, has not come up with a resolution for Lake Mead that will keep launch ramps and other services in place to benefit us tax paying citizens. Their third resolution to not allow motorized boats on the lake seems like a lazy way out, and has no consideration for an owner's investments in their boats, and the potential for severe economic downturn in the local economies if tourist activity is lost. Allow this beautiful National Recreation Area to be a place for us to recreate.

States need to be held more accountable to provide plans with current and future standards that will allow the water flow on the Colorado River system to stabilize, such as, decreasing outdoor water use, enforcing water conservation restrictions, and States conservation plans being sufficient to reduce water consumption.

Sincerely,

Kim Hutchings
