Dear Project Manager:

We personally have two boats on Lake Mead, one of which we JUST bought not knowing this was even going to happen.

Us locals us this lake to recreate and to get away from the Las Vegas summer heat. The impact that option 2 & 3 would bring to our community and to Boulder City is not an option!!! People would lose thousands of jobs, Boulder City would turn into a ghost town with no people bringing tourism money into the city. The amount of money our surrounding cities would lose is unfathomable.

Keep the lake, keep the water levels high enough for boat ramps , keep the jobs in the surrounding area. These are viable to our Las Vegas economy more than we even know. To see this lake go would be so depressing. We think of Lake Mead and think, FUN and BEAUTIFUL!!! Not a dried up piece of of mud nobody want to visit anymore.

Sincerely,

Kara Jarrett
