Dear Project Manager:

Me and my entire family have been enjoying Lake Mead to boat, camp, ski, fish and just enjoy being with Mother Nature for as long as I can remember. The Lake helps people stay active which in turn leads to a healthier community. Generations to come MUST be able to enjoy these same benefits. Lake Mead and Powel are two of the most visited national parks in our country and people come from all over the world to fish, swim, sail, water ski, take a cruise, picnic, hike and to just enjoy the nature we have to offer.

Public use will not change the lake levels so until we can control the weather we have to find a better smarter way to adjust to the present situation. Our economy is tied so closely to the recreational opportunities, we MUST keep Lake Mead and Powell open for business especially in our present situation.

Like many others am planning to retiring someday and that plan WILL include Lake Mead, all it has to offer me and generations to come.

This proposal will hurt more than boaters, residents, businesses, manufacturers, tourists, state and federal tax returns, home sales for new residents and existing residents ALL stand to loose. I pray the state of Nevada will aggressively fight for Lake Mead.

We MUST preserve the thousands of jobs our lakes support and the billions in economic dollars that are generated for our communities. There has to be a better way we can to address this issue and understand the HUGE difference between Lake Mead National Recreation Area and Lake Mead reservoir. Eliminating services on Lake Mead cannot be an option.

Please do not take away what we have all worked so hard for all love so much.

Sincerely,

Mark Wallace
