Dear Project Manager:

We love boating and we love Lake Mead! We deserve to have motorized boating, services, maintained launch ramps, and concessions on Lake Mead.

Lake Mead is a way to escape from the loud town and enjoy the silence and beauty the lake gives year-round.

BOR needs to keep Lake Mead water stabilized on the Colorado River System. It should be held no lower than what is current.

States need to be held to a higher standard with current major drought conditions the southwest is experiencing. States need to make cutbacks, enforce water conservation efforts as well as create new water conservation efforts, and we need good public awareness!

NPS needs to be committed to keeping launch ramps, campgrounds, services, concessions, and infrastructure updated and in place throughout the NRA.

NPS needs to recognize that motorized boating is a major and important economic driver in the park and the surrounding areas.

Sincerely,

Samantha Miller
