As a guide and private trip guy over the last 45 years I am irritated by the obviously biased point of view from the leaders of the private trip guys. Please let it be known from the silent majority that there's nothing wrong with motor trips in the canyon unlike the guys that believe we should all be like them for they know better than any one else. It is a fact that most people over 50 years can't do a 20 day trip at extreme temperatures including myself but absolutely love the canyon. I like the management at the main and middle fork rivers. There is your guide in my opinion- the canyon can absolutely handle more people and please stop the motor restrictions- from the silent majority who really know better. Thanks- John Price CPA
