Subject: Fixing lake mead and rising sea levels(if you believe that
sorta thing, I DO)

This email has been received from outside of DOI - Use caution before clicking on links, opening attachments, or responding. ☒

This seems fairly straight forward and simple, Desalination stations, they will create jobs, you can continually fill Mead with Rising sea levels by pumping it wherever its needed 🗑️

This isn't Rocket Surgery, the way the government like spending our money this should be a No Brainer! Compensation? Sure if love to be monetarily set up for this, however A Nobel Peace Prize would suffice just so I could show my teachers who said I'd never be anything!

Hope i WOKE someone with this idea have an amazing day!

Thanks, Russel Cauley
