Dear Project Manager:

Please think of the lasting impacts that will occur if action is not taken to save both lakes. The effects that WILL happen if the lakes are not saved are limitless. The environment, businesses, and the people will see lasting impact. I grew up on both lakes and am heartbroken thinking about not being able to share the memories I've made with loved ones. Boating has been enjoyed by many for generations. The leaders of our country should be caring for and protecting our land and resources. By not restoring both lakes we are damaging so many aspects to our daily lives. There are so many issues that will occur if we don't do so thing now.

Please save our lakes. Thank you.

Sydney James

Sincerely,

Sydney James
