

Bureau of Reclamation - Hydropower Generation Summary

Fiscal Year 2023 Q1

Errata

August 23, 2023

In Development - Pump Storage (PS) (FERC and LOPP) table California-Great Basin total figures have been corrected.

Summary

The Bureau of Reclamation's hydropower program supports Administration and Department of the Interior clean energy and climate change initiatives by increasing Reclamation Project hydropower capabilities and value. Supporting program activities include - collaborative regulatory reform; operational and technological innovation; and stakeholder outreach. Collectively, these activities facilitate incremental, carbon-neutral renewable energy generation.

This summary report identifies federal and non-federal hydropower facilities and associated generating capacity currently online or in development on Reclamation Projects. Summary statistics reflect Unified Interior Regional boundaries: Interior Region 5 Missouri Basin; Interior Region 6 Arkansas-Rio Grande-Texas-Gulf; Interior Region 7: Upper Colorado Basin; Interior Region 8: Lower Colorado Basin; Interior Region 9: Columbia-Pacific Northwest; and Interior Region 10: California-Great Basin.¹

Incremental Hydropower Capability

In July 2022, the Department of the Interior published its Strategic Plan for Fiscal Years (FY) 2022-2026, replacing the Strategic Plan for FY 2018-2022.²

The current Strategic Plan establishes, in part, performance indicators for Reclamation's hydropower program – however incremental hydropower capability is no longer a performance indicator. Reclamation will continue to support the development of incremental hydropower capability on Reclamation Projects to serve current and future energy needs and will likewise continue to report related performance in *Bureau of Reclamation - Hydropower Generation Summary* reports.

Within FY 2023 Q1, an additional **4.90 MW** of incremental hydropower capability was installed at Reclamation Projects – The Upper Colorado Basin Vinelands (Grand Valley)³ Lease of Power Privilege (LOPP) project came online in November 2022.

A cumulative total of **67.50 MW** of incremental capability has been installed at Reclamation Projects since FY 2018. FY 2018 through current quarter performance is summarized in table below:

¹ See: https://www.doi.gov/employees/reorg/unified-regional-boundaries. The *Bureau of Reclamation - Hydropower Generation Summary* assigns hydropower facilities to the Unified Interior Region responsible for facility oversight.

² See: https://www.doi.gov/performance/strategic-planning.

³ Past Bureau of Reclamation - Hydropower Generation Summary reports identified the project as "Grand Valley (Orchard Mesa Power Canal)."

Region	Facility	Activity	Completion Date	Incremental MW
Upper Colorado Basin	Glen Canyon Control Center	HydrOS Installation	October 2017	17.31
Missouri Basin	Casper Control Center	HydrOS Installation	January 2018	6.73
Missouri Basin	Yellowtail - Unit 1	Generator Uprate	July 2018	9.40
Columbia–Pacific Northwest	Palisades - Unit 2	Turbine Runner Replacement	April 2018	1.92
Upper Colorado Basin	Olmsted	Generator Uprate	July 2018	1.43
Missouri Basin	Pueblo Dam	Lease of Power Privilege	May 2019	7.01
Missouri Basin	Yellowtail – Unit 4	Generator Uprate	October 2019	9.40
Missouri Basin	Yellowtail – Unit 2	Generator Uprate	June 2021	9.40
Upper Colorado Basin	Vinelands (Grand Valley)	Lease of Power Privilege	November 2022	4.90
Total				67.50

Reclamation Hydropower Summary

Summary tables identify federal (reserved and transferred works) and non-federal hydropower facilities and associated generating capacity currently online or in development on Reclamation Projects. Quarterly table updates, if any, are noted. Table definitions are provided in Appendix A – Table Definitions. Facility details are provided in Appendix B – Regional Hydropower Generating Capacity Portfolios.

Table components may not sum to totals due to rounding.

Online Hydropower Facilities

Table updates: The Upper Colorado Basin Vinelands (Grand Valley) LOPP project (4.90 MW) came online in November 2022. The project has been moved from the *In Development – Conventional Hydropower (LOPP) Contract* statistic to the *Online Hydropower Facilities – LOPP* statistic.

	Missouri Basin		Arkansas- Rio Grande- Texas- Gulf		Upper Colorado Basin		Lower Colorado Basin		Columbia– Pacific Northwest		California- Great Basin		Bureau of Reclamation

In Development – Conventional Hydropower (FERC)

Table updates: None.

⁻

⁴ Reclamation holds title to the Upper Colorado Basin Grand Valley hydropower facility LOPP. The total number of Reclamation-owned hydropower facilities is 77 (53 reserved, 23 transferred, 1 LOPP). The Upper Colorado Basin Grand Valley hydropower facility LOPP and Grand Valley (Vinelands) LOPP are separate facilities.

	Missouri Basin		Arkansas- Rio Grande- Texas- Gulf		Upper Colorado Basin		Lower Colorado Basin		Columbia– Pacific Northwest		California- Great Basin		Bureau of Reclamation

In Development – Conventional Hydropower (LOPP)

Table updates: The Upper Colorado Basin Vinelands (Grand Valley) LOPP project (4.90 MW) came online in November 2022. The project has been moved from the *In Development – Conventional Hydropower (LOPP) Contract* statistic to the *Online Hydropower Facilities – LOPP* statistic.

The Missouri Basin Ralston Lateral Drop LOPP project (0.01 MW) has been removed from the LOPP Contract statistic due to withdrawn non-federal interest in project development.

	Missouri Basin		Arkansas- Rio Grande- Texas- Gulf		Upper Colorado Basin		Lower Colorado Basin		Columbia– Pacific Northwest		California- Great Basin		Bureau of Reclamation

In Development – Pump Storage (PS) (FERC and LOPP)

Non-federal pump storage development at Reclamation Projects may require both a FERC License and Reclamation LOPP if the proposed project utilizes a Reclamation Project reservoir within Reclamation's permitting jurisdiction and any second reservoir outside Reclamation's permitting jurisdiction (i.e., FERC jurisdiction), as defined by the 1992 Memorandum of Understanding between Reclamation and FERC.⁵

4

⁵ See: https://www.usbr.gov/recman/fac/fac04-08-AppA.pdf.

Additional information regarding non-federal pump storage development and dual jurisdiction is available on the LOPP website. Projects subject to dual FERC/LOPP jurisdiction are identified as *Dual LOPP/FERC PS* projects in the table below.

Table updates: None.

⁶ See: https://www.usbr.gov/power/LOPP.

⁷ The proposed Energy Storage Station Pumped Storage Project (Lake Powell) (Upper Colorado Basin) and Halverson Canyon Pumped Storage Project (Roosevelt Lake) (Columbia-Pacific Northwest) have received a FERC Preliminary Permit for upper reservoir development but have not received a Reclamation Preliminary Lease or LOPP Contract for lower reservoir development at this time.

The proposed Anderson Ranch Pumped Storage Project (Columbia-Pacific Northwest) and Seminoe Pumped Storage Project (Missouri Basin) have received both a FERC Preliminary Permit for upper reservoir development and a Reclamation Preliminary Lease for lower reservoir development.

Appendix A – Table Definitions

For the purposes of the *Bureau of Reclamation - Hydropower Generation Summary* the following definitions apply, arranged by facility type and corresponding summary table.

Online Hydropower Facilities

Reserved. Reclamation-owned hydropower facilities, wherein Reclamation has retained responsibility for carrying out facility operations and maintenance activities.

Transferred. Reclamation-owned hydropower facilities, wherein the responsibility for carrying out facility operations and maintenance activities has been transferred to a non-federal entity under the provisions of a formal operations and maintenance transfer contract.

Other. Non-federal hydropower facilities developed on Reclamation Projects, authorized outside the FERC licensing or Reclamation LOPP contracting process.

FERC (Federal Energy Regulatory Commission). Non-federal hydropower facilities developed on Reclamation Projects, authorized via the FERC licensing process.

LOPP (Lease of Power Privilege). Non-federal hydropower facilities developed on Reclamation Projects, authorized via the LOPP contracting process.

In Development – Conventional Hydropower (FERC)⁸

License. Non-federal hydropower facilities in development on Reclamation Projects, currently issued an active FERC License.

Exemption. Non-federal hydropower facilities in development on Reclamation Projects, currently issued an exemption from FERC from licensing requirements.

Preliminary Permit. Non-federal hydropower facilities in development on Reclamation Projects, currently issued an active FERC Preliminary Permit.

In Development – Conventional Hydropower (LOPP)⁹

Contract. Non-federal hydropower facilities in development on Reclamation Projects, currently issued an active LOPP Contract.

⁸ See: https://www.ferc.gov/industries/hydropower/gen-info/licensing/app-new.asp.

⁹ See: https://www.usbr.gov/power/LOPP.

Preliminary Lease. Non-federal hydropower facilities in development on Reclamation Projects, currently issued an active LOPP Preliminary Lease.

Posted Solicitation. Proposed non-federal hydropower development sites on Reclamation Projects wherein Reclamation has published a public notice soliciting project proposals.

Request for Development. Proposed non-federal hydropower development sites on Reclamation Projects wherein Reclamation has received a formal request for non-federal development.

In Development – Pump Storage (PS) (FERC and LOPP)

FERC PS – License. Non-federal pump storage hydropower facilities in development on Reclamation Projects, currently issued an active FERC License.

FERC PS – Preliminary Permit. Non-federal pump storage hydropower facilities in development on Reclamation Projects, currently issued an active FERC Preliminary Permit.

LOPP PS – Contract. Non-federal pump storage hydropower facilities in development on Reclamation Projects, currently issued an active LOPP Contract.

LOPP PS – Preliminary Lease. Non-federal pump storage hydropower facilities in development on Reclamation Projects, currently issued an active LOPP Preliminary Lease.

Dual LOPP/FERC PS – Preliminary Permit. Dual jurisdiction non-federal pump storage hydropower facilities in development on Reclamation Projects, currently issued an active FERC Preliminary Permit.

Dual LOPP/FERC PS – Preliminary Lease. Dual jurisdiction non-federal pump storage hydropower facilities in development on Reclamation Projects, currently issued an active LOPP Preliminary Lease.

Dual LOPP/FERC PS – Preliminary Lease and Permit. Dual jurisdiction non-federal pump storage hydropower facilities in development on Reclamation Projects, currently issued an active LOPP Preliminary Lease and active FERC Preliminary Permit.

Appendix B – Regional Hydropower Generating Capacity Portfolios

Project updates noted in bold (e.g., new projects, capacity uprates, or permitting status updates from previous reported quarter). Projects terminated or removed within the reported quarter are noted in strikethrough.
