

Bureau of Reclamation - Hydropower Generation Summary

Fiscal Year 2025 Q4

Summary

The Bureau of Reclamation supports Administration energy priorities, in part, through ongoing investment in federal hydropower facilities and by facilitating non-federal hydropower development on Reclamation Projects. Collectively, this work allows for incremental hydropower capacity and generation, in alignment with Administration energy priorities. This summary reports on federal and non-federal hydropower facilities and associated generating capacity currently online or in development on Reclamation Projects.

Summary statistics reflect Unified Interior Regional boundaries: Interior Region 5 Missouri Basin; Interior Region 6 Arkansas-Rio Grande-Texas-Gulf; Interior Region 7: Upper Colorado Basin; Interior Region 8: Lower Colorado Basin; Interior Region 9: Columbia-Pacific Northwest; and Interior Region 10: California-Great Basin. For the purposes of this summary, Missouri Basin statistics include both the Missouri Basin and the Arkansas-Rio Grande-Texas-Gulf Regions.

Incremental Hydropower Capability

Reclamation supports the development of incremental hydropower capability on Reclamation Projects. Incremental capability performance is reported in megawatts (MW) – consisting of MW derived from generator uprates and non-federal development; and MW equivalents derived from turbine runner replacements and optimization installations, calculated by multiplying the resulting efficiency improvement by the MW capacity of the affected unit(s).

No new incremental hydropower capability was installed at Reclamation Projects between FY 2025 Q2 and FY 2025 Q4. A cumulative total of approximately **78.03 MW** of incremental capability has been installed at Reclamation Projects since FY 2018.² FY 2018 through current quarter performance is summarized in table below:

¹ See: https://www.doi.gov/employees/reorg/unified-regional-boundaries. The *Bureau of Reclamation - Hydropower Generation Summary* assigns hydropower facilities to the Unified Interior Region responsible for facility oversight.

² Incremental megawatts derived from additional optimization installations ("HydrOS") will be added once benefit assessments are complete.

Region	Facility	Activity	Completion Date	Incremental MW
Upper Colorado Basin	Glen Canyon Control Center	HydrOS Installation	October 2017	17.31
Missouri Basin	Casper Control Center	HydrOS Installation	January 2018	6.73
Missouri Basin	Yellowtail - Unit 1	Generator Uprate	July 2018	9.40
Columbia–Pacific Northwest	Palisades - Unit 2	Turbine Replacement	April 2018	1.92
Upper Colorado Basin	Olmsted	Generator Uprate	July 2018	1.43
Missouri Basin	Pueblo Dam	Lease of Power Privilege	May 2019	7.01
Missouri Basin	Yellowtail – Unit 4	Generator Uprate	October 2019	9.40
Missouri Basin	Yellowtail – Unit 2	Generator Uprate	June 2021	9.40
Upper Colorado Basin	Vinelands (Grand Valley)	Lease of Power Privilege	November 2022	4.90
California-Great Basin	Trinity – Unit 2	Turbine Replacement	April 2023	2.93
Missouri Basin	Canyon Ferry – Unit 1	Generator Uprate	November 2023	2.53
Missouri Basin	Canyon Ferry – Unit 3	Generator Uprate	November 2024	2.53
Upper Colorado Basin	Taylor Park Dam	Lease of Power Privilege	December 2024	0.50
Missouri Basin	Marys Lake – Unit 1	Turbine Replacement	December 2024	0.24
California Great Basin	Spring Creek – Unit 2	Turbine Replacement	December 2024	1.80
Total				78.03

Reclamation Hydropower Summary

Summary tables identify federal (reserved and transferred works) and non-federal hydropower facilities and associated generating capacity currently online or in development on Reclamation Projects. Quarterly table updates, if any, are noted. Table definitions are provided in Appendix A – Table Definitions. Facility details are provided in Appendix B – Regional Hydropower Generating Capacity Portfolios.

Table components may not sum to totals due to rounding.

Online Hydropower Facilities

Table updates: None.

³ Reclamation holds title to the Upper Colorado Basin Grand Valley hydropower facility LOPP. The total number of Reclamation-owned hydropower facilities is 77 (53 reserved, 23 transferred, 1 LOPP). The Upper Colorado Basin Grand Valley hydropower facility LOPP and Grand Valley (Vinelands) LOPP are separate facilities.

In Development – Conventional Hydropower (LOPP)

Table updates: The Missouri Basin Pishkun Inlet LOPP project (2.40 MW) received a *LOPP Contract* in September 2025. The project has been moved from the *Preliminary Lease* statistic to the *Contract* statistic.

In Development – Pump Storage (PS) (FERC and LOPP)

Non-federal pump storage development at Reclamation Projects may require both a FERC License and Reclamation LOPP if the proposed project utilizes a Reclamation Project reservoir within Reclamation's permitting jurisdiction and any second reservoir outside Reclamation's permitting jurisdiction (i.e., FERC jurisdiction), as defined by the 1992 Memorandum of Understanding between Reclamation and FERC.⁴

Additional information regarding non-federal pump storage development and dual jurisdiction is available on the LOPP website.⁵ Projects subject to dual FERC/LOPP jurisdiction are identified as *Dual FERC/LOPP PS* projects in table below.

Table updates: None.

 $^{^4}$ See: https://www.usbr.gov/recman/fac/fac04-08-AppA.pdf.

⁵ See: https://www.usbr.gov/power/LOPP.

⁻

⁶ The proposed Energy Storage Station Pumped Storage Project (Lake Powell) (Upper Colorado Basin) has received a FERC Preliminary Permit for upper reservoir development but has not received a Reclamation Preliminary Lease or LOPP Contract for lower reservoir development at this time.

The proposed Anderson Ranch Pumped Storage Project (Columbia-Pacific Northwest) and Seminoe Pumped Storage Project (Missouri Basin) have received both a FERC Preliminary Permit for upper reservoir development and a Reclamation Preliminary Lease for lower reservoir development.

Appendix A – Table Definitions

For the purposes of the *Bureau of Reclamation - Hydropower Generation Summary* the following definitions apply, arranged by facility type and corresponding summary table.

Online Hydropower Facilities

Reserved. Reclamation-owned hydropower facilities, wherein Reclamation has retained responsibility for carrying out facility operations and maintenance activities.

Transferred. Reclamation-owned hydropower facilities, wherein the responsibility for carrying out facility operations and maintenance activities has been transferred to a non-federal entity under the provisions of a formal operations and maintenance transfer contract.

Other. Non-federal hydropower facilities developed on Reclamation Projects, authorized outside the FERC licensing or Reclamation LOPP contracting process.

FERC (Federal Energy Regulatory Commission). Non-federal hydropower facilities developed on Reclamation Projects, authorized via the FERC licensing process.

LOPP (Lease of Power Privilege). Non-federal hydropower facilities developed on Reclamation Projects, authorized via the LOPP contracting process.

In Development – Conventional Hydropower (FERC)⁷

License. Non-federal hydropower facilities in development on Reclamation Projects, currently issued an active FERC License.

Exemption. Non-federal hydropower facilities in development on Reclamation Projects, currently issued an exemption from FERC from licensing requirements.

Preliminary Permit. Non-federal hydropower facilities in development on Reclamation Projects, currently issued an active FERC Preliminary Permit.

In Development – Conventional Hydropower (LOPP)⁸

Contract. Non-federal hydropower facilities in development on Reclamation Projects, currently issued an active LOPP Contract.

⁷ See: https://www.ferc.gov/industries/hydropower/gen-info/licensing/app-new.asp.

⁸ See: https://www.usbr.gov/power/LOPP.

Preliminary Lease. Non-federal hydropower facilities in development on Reclamation Projects, currently issued an active LOPP Preliminary Lease.

Posted Solicitation. Proposed non-federal hydropower development sites on Reclamation Projects wherein Reclamation has published a public notice soliciting project proposals.

Request for Development. Proposed non-federal hydropower development sites on Reclamation Projects wherein Reclamation has received a formal request for non-federal development.

In Development – Pump Storage (PS) (FERC and LOPP)

FERC PS – License. Non-federal pump storage hydropower facilities in development on Reclamation Projects, currently issued an active FERC License.

FERC PS – Preliminary Permit. Non-federal pump storage hydropower facilities in development on Reclamation Projects, currently issued an active FERC Preliminary Permit.

LOPP PS – Contract. Non-federal pump storage hydropower facilities in development on Reclamation Projects, currently issued an active LOPP Contract.

LOPP PS – Preliminary Lease. Non-federal pump storage hydropower facilities in development on Reclamation Projects, currently issued an active LOPP Preliminary Lease.

Dual FERC/LOPP PS – Preliminary Permit. Dual jurisdiction non-federal pump storage hydropower facilities in development on Reclamation Projects, currently issued an active FERC Preliminary Permit.

Dual FERC/LOPP PS – Preliminary Lease. Dual jurisdiction non-federal pump storage hydropower facilities in development on Reclamation Projects, currently issued an active LOPP Preliminary Lease.

Dual FERC/LOPP PS – Preliminary Lease and Permit. Dual jurisdiction non-federal pump storage hydropower facilities in development on Reclamation Projects, currently issued an active FERC Preliminary Permit and active LOPP Preliminary Lease.
