Just to give you a heads up, Kemal Williamson of Peabody Coal has contacted me and would like to chat about NGS. Tom McCann and I are going to talk with him tomorrow afternoon. I have attached a copy of his email to me. Of course, CAWCD has no formal or contractual relationship with Peabody, CAWCD is not a decision maker with respect to the future of NGS, and there is little either CAWCD or Peabody can do to influence the economic realities in today's electricity market, and that will be the gist of our conversation with him. I expect to be sympathetic and listen, but there is obviously nothing CAWCD can do or promise to do. I understand that there might be a little nervousness about what might be said in a conversation between CAWCD and Peabody, but it will be a brief, high level conversation, and I believe that it would be more harmful for us to just ignore him or decline to speak with him and what that might infer.

Ted

Subject: Navajo Generating Station and Peabody's Kayenta Mine

Mr. Cooke,

I called earlier today and left a message with your assistant. My name is Kemal Williamson and I am President – Americas for Peabody Energy's US operations. Peabody is based in St. Louis, MO. I am responsible for the Kayenta Mine and we provide coal to the Navajo Generating Station (NGS). I attended a meeting in Phoenix last week at SRP's office along with our Sales and Marketing Team. During this meeting, SRP representatives communicated a bleak

immediate future for the Navajo Generating Station which shocked us. I would like to discuss NGS in 2017 and beyond with CAP executives and get a better understanding of the role electricity from NGS plays in making CAP successful and how Peabody and our 300 plus employees at the Kayenta Mine can help keep NGS operating. If you are interested in a call anytime on Wednesday, or another day this week, please let me know. I am in Window Rock, AZ meeting with the Navajo Nation most of the day tomorrow and can be contacted on my cell phone.

Regards,

Kemal Williamson
