Please add me in and can I have a copy of the Dec 28th letter? I think it is great that Mike, Letty and Estevan are all up to speed but in two weeks they will be gone and I, for one, am going to have to explain to my new bosses whomever they end up being.

Pam,

Yes. There has been lots of Departmental involvement in this issue. Mike Connor, Letty, Estevan, and David Palumbo have been intimately involved in NGS and are up to date with the latest issues. SRP has been out talking to the Tribes and owners and while no formal decisions have been made, the media circus is starting. As you know, the ongoing operations discussion has heated up just recently. In anticipation of the news starting to break, I spoke to Sharon Pinto yesterday and Russ contacted Cathy's folks and OSM.

There will be many decisions to make over the next few months and we know we'll need to have excellent communication throughout the department.

I believe that Russ is scheduling a call with Cathy and her folks for early next week. We can add you to the appointment, if you'd like.

Leslie

Dave Palumbo has been the lead on this. We had a meeting with GRIC at CRUA and they asked for a briefing on LBDF impacts. I am looping in Leslie so she can tell us where we are on this.

Pam---is anyone in DOI organizing a discussion about the looming decision of NGS owners to close the plant due to economic factors (EPA regs + natural gas prices)? I'm wondering how BOR as our federal owner plans to decide the issue. How will we collectively evaluate the adverse impact closure of NGS will have on the revenue stream relied on to repay the CAWCD debt and the flow of funds to the AWSA sub accounts for Tribal water settlements. Thanks. Cathy
