

Title	Location	Field below, please provide information
New Melones Tuttle town Recreation Area	Sonora CA.	Melones is close to our ranch and we love to boat here , fish and hang around the gravel beach to the right of the main boat ramp , due to the mussel problem this year they close the boat ramp during the week and inspect boats for launch fri , sat , and Sunday . They keep the gate locked on the gravel beach and it is a loooong walk from parking .to get down to the beach . Being newly handicap I am now seeing handicap issues first hand . Due to my 46 years of being a journeyman plumber I have (b) (6) (b) (6), also from works ng with Asbestos (b) (6) (b) (6) so I don't walk so good and don't breath so good . I have received a handicap placard and also gotten my Federal Parks permit . Can they possibly open the gate to the gravel beach for certain days or times as we could before drive and park closer to the water .Just a thought , never thought my life would change this drastic and I'm really missing what I was able to do before . Thanks
Natural Bridges Trail (New Melones Lake Recreation Area)	Sonora, CA	There is no welcome sign. Had to take dangerous 360 on blind hill.
Natural Bridges Trail (New Melones Lake Recreation Area)	Sonora Ca	No no parking sign at top of trail. I got a ticket but sign was taken down
New Melones Lake Angels Camp, CA	Ca.	Yes, my name in (b) (6) and I am a local resident who loves the lake! We are there at least 2 tms a week with either our jet ski or pontoon boat. My concern is that there are no toilets/ restrooms any where on the lake. Not one!!!! The marina has a tiny restroom that I know has two stalls in the women's bathroom but they either are out of service or don't have any toilet paper never ever!!!! When they did have one floating toilet on the lake last year it was absolutely disgusting because the lack of taking care of it. It was never cleaned out the entire season and people were pooping in the corner and there was poop all over the place. This is not acceptable and I doubt it would be OK to think that all the people that go to the lake are all pooping all over your

		beautiful land. This is unacceptable and inappropriate and a health hazard. Please provide restrooms for the public. Thank you.
Heart mountain interpretive center	Wyoming	The center does a remarkable job of upkeeping the grounds and providing accurate information. The only thing embarrassing are these signs you keep putting up. How awful that our own federal administration is so sensitive to be afraid of truth.
Heart Mountain Interpretive Center	Powell, WY	The Interpretive Center is excellent; it stands as a memorial to those wronged, and as a reminder to the damage that hate and discrimination can cause. This sign and form, however, are an embarrassment. Are you so insecure that you can't admit that wrongs have been committed? The US is far from a perfect country, and trying to sweep our wrongdoings under the rug and deny they happened is a disservice to every citizen. You should be ashamed.
Wetlands Park	Henderson, Nevada	It would be nice if the Wetlands Loop trail was an actual loop. Right now it dead ends at the last mile into some shallow moving water. The only thing stopping it from being an actual loop is a space of maybe 20' to cross this water. I think it's been over 10 years and this trail still isn't an actual loop.

Fruitgrowers reservoir	Delta, Colorado	I would love a water study done on this lake to see if we can use it again. It was contaminated decades ago and then completely given up on. I personally do not think it is of any danger to people anymore and should not be treated like a toxic wasteland. It has been greatly overlooked and ignored by the government. It is a beautiful lake and plenty of wildlife call it home. Birdwatching is cool for birdwatchers, but was once a great recreation area has been reduced to nothing otherwise. I do not believe that the wildlife will be negatively impacted due to the lack of accessibility by boat on the north side of the lake due to shallow water. I believe making the lake into a fishery again would help the local wildlife and water quality, along with the fact that this water does make its way into the Gunnison river. I visit this reservoir nearly every weekend with (b) (6) and my dogs. This place deserves far better for it and us. Due to the unique and temperate climate this lake rests in, a wide variety of fish should be able to thrive if introduced. I have considered setting up a trash can at the old boat ramp and taking care of it myself along with paying for water samples to be analyzed. My family and I do volunteer work for our community and we will volunteer to help with this. In summary, I believe this beautiful lake needs a second look and could be a wonderful attraction to this small community. I will be more than happy to donate my time however I can. This place does belong to the American people and even more so the wildlife. We should be taking better care of it. Please let this be seen. I would do all the work myself if I could. Thank you, whoever reads this and please make this travel to someone who cares. Sincerely (b) (6) (b) (6) (b) (6)@yahoo.com
------------------------	-----------------	---

Sebastian Law	Henderson Nevada	Hello, I'm a huge fan of the River Mountain Loop, Trail, I love to do the 38 miles on my bike, however, I noticed the section at the east entrance of Lake Mead recreation area the bike lane has lots of heavy cracks in it, it makes the ride very rough. I would much appreciate it if that section of road was redone. Thank you for your dedication and preservation of nature, (b) (6) .
Hoover Dam	Nevada and Arizona	The figures in the museum came to life and called me mean names. Please beat them with a rubber hose. Also the water vending machines on the actual dam were all empty. Try fixing that before taking real objects off of exhibit and cutting desperately needed staff you bootlickers.
Elephant Butte Lake	Elephant Butte Lake State Park	Where is all the water going??
Enders SRA	Enders, Nebraska	At the bathrooms by the showers, the only light is above the men's room. The women have to go to the other side and it is pitch black all the way around. I'm not suggesting a spot light, but something to at least illuminate the path. It would improve safety greatly! Thanks!
ECAO	Colorado	ECAO staff members should not receive passive aggressive, harassing, threatening, sexist, or otherwise demeaning treatment from fellow colleagues regarding workload or specific task items. ECAO employees should not engage in verbal abuse towards regional staff based on miscommunication or misunderstanding. ECAO staff that work in remote locations without adequate cell phone coverage should be given proper government-issued PPE, even if that PPE involves an expensive satellite phone with minimal usage. ECAO staff should be reimbursed for the price of their personal equipment used for government purposes. ECAO staff located at Mt. Elbert powerplant should not be given preferential treatment over other employees at ECAO main office with regards to allowing personal housing flexibility or other incentives, such as camping on USBR lands for greater than 14 days, as would otherwise be standard temporal constraints for the general public.

Elephant Butte	New Mexico	This sign and its McCarthyite message is the only negative thing I've seen. The paranoid, incompetent authoritarians in charge who are doing this should be put behind bars.
Pilot Butte reservoir	Wyoming	Someone stuffed trash into the grill at the picnic table
Elephant butte	New Mexico	One service you could improve upon is not making bureau of rec waste money printing stupid pointless signs, because your feelings are hurt. It's a dam. It's not meant to be beautiful as its primary purpose, genius. End your stupid witch hunts, and let the American people, including BOR get back to actual work.
Mancos State Park	Mancos, CO	The sign/notice that has this bar code and led me to this form is deeply offensive to me, an American with ancestors who arrived on these shores in the 1600s. We should seek to acknowledge and understand the diverse history of these United States of America, warts and all.
Navajo State Park	Arboles, Colorado	Lights in Tiffany Campgroun: Lights and matenace to bathrooms and shower. Fix sprinkler systems make grass green like in the past. Maintaine and rake camp sights. Over all restore Tiffany and entire Park back to what it once was.
Navajo State Park	Arboles, Colorado	The women's bathroom in Carracas campground has not had soap for 2 months and one of the faucets has been running for the same amount of time wasting tons of water
Mancos State Park	Mancos, CO	Trump is a racist poopoo who fiddles with children.
Pyramid canyon	Laughlin NV	Lights: a couple lights reflectors are broke and the Flags need to be replaced. More trash cans around the grass area would stop people from littering. Also a dog water station by the grass would be nice. The park is beautiful and we always see the guys working hard.

Lake Berryessa and Lake Solano	California	HTML address on SO 1341 sign links to Microsoft rather than to any survey form. Signs at Monticello Dam are hard to read behind chain link fence, do not need to be secure but should be readable from a vehicle on the parking area a few feet away. Logos are outdated and confusing. Signs at the dam are apparently made by contracting agencies without regard for facts or consistency with other signs such as at the visitor center. Posted information says Oak Shores day use area is “free” and there is no one to collect fees at the entrance kiosk, but halfway through the long narrow road an automated fee station says “pay here”, so the visitors are confused about what is required. The Capell Cove “free” public boat ramp is gated and closed without explanation, although it is the only public boat ramp available on the 23-mile-long lake besides a couple of expensive concessions. WiFi and cell phone service are not available to actually use the scans for this survey or visitor maps in the field or at the closed visitor center. The Cleve Dufur visitor center is named as a memorial for a deceased former lake concessions staff employee in violation of federal regulations, while the concession status remains highly controversial. Portable toilets outside of former flush toilets are very uncomfortable and embarrassing as obvious dysfunction of maintenance and management of important recreation facilities in many locations including concessions and direct-management day use areas. Markely Cove concession has flush toilets for staff only, while visitors are told to use outdoor portable toilets. Painted vault toilets are unsightly at Pope Creek parking lot. Signs touting removal of invasive species are overgrown with invasive species at Pope Creek parking lot. The sign at Monticello Dam to “Be a C.O.P.” Is confusing and inappropriate since there are actually no facilities or means nearby to “Observe Proper
---------------------------------------	-------------------	---

		Disposal Sites “ etc. and misuses a gas pump image for no apparent reason. The sign at Monticello Dam maps resorts that have been fully dismantled and closed for decades and mislead visitors to the far side of the lake many miles away. The entire east side of Lake Berryessa is fully ignored on maps and signs as important public access by road and boat or by hiking.
USBureau of Rexlamation	Washington	Thank you to the crew that picked up the dumped garbage at the Seaton's Grove access point as well as pruning the trees on the Downriver Trail and weed eatering both areas.
36 w Lytton	Tuttle town California	You shut down camping here and there's no water all of the others places are full but here it bill shit
Tuttle town recreation	Tuttle town california	It needs to be opened back up for camping in all areas. The lake needs more water. Reopen the bathrooms and showers inseams of porter potties. Open our boat launches and stop restricting our lake use times
Ridgway State Park	Colorado	I think that your attempted erasure of American history is pathetic and the parks belong to the people not whatever president is temporarily in office. If you cared about our parks so much you would stop shorting them on staffing and resources!
Salton Sea Park	Salton City	No access in a place is supuse to be public, the paques are causing respiratory issues
PowerPlant Tour	Nevada	Services must improve for deaf and disabled customers without having any sign language interpreter. Or provide disabled access for audio and payment. without accessibility, we couldnt understand how things work with powerpoint.
A Canal	Klamath Falls, Oregon	You need to stop harassing the homeless that try to peacefully camp along this area. They need a spot they can feel safe.
Black Canyon	Emmett, Idaho	One of the bathrooms near the parking lot does not lock. The lock is broken.

Lake Tahoe Dam	Tahoe City, CA	-I am a disabled person and the handicapped parking space entering the park on Mackinaw St is extremely dangerous for us to use. First off it is not built properly. It fails to provide 3 feet of space on each side so the driver cannot open their door without partially parking in the white no parking zone which the DMV denotes as illegal. Signs have been placed in the park inviting bicyclists to come barreling through the the handicapped parking zone and they are not for warned with signage that they are entering a disabled zone. It is not safe to open my passenger door there. I've had near collision experiences with bicyclist and am unable to safely use this space. The walkway entering the space from the bridge should be painted blue and signage needs to be placed directing the public to use the crosswalk provided instead of tramping through the disability zone. -There are misinformative signs placed along the national trail where the public is to have access to the pier. A real estate fraud was conducted in this area around 40 years ago. Signs are placed telling tourists that there is no outlet in this direction which is not true. The trail exit cannot be used by persons with bicycles and strollers but there is pedestrian access in this direction. There are signs over in TC's Commons Beach area telling people about the trail (which is blocked by a house, swimming pool and tennis court) and that they have pier access (the pier is always locked though) the public is not informed that they also have access to the pool and tennis courts as a result of this real estate fraud. The Tahoe Marina Lodge has blocked the parking lot most adjacent to the pier with reserved parking signs. The number of no public parking signs increased this summer. I'd like if the Marina Lodge has a permit to do this. With my placard the DMV states that I can use this reserved section no matter what but there is actually no handicapped parking space at this trail exit and I'm fearful of animosity, I cannot fight or flight my way out of a conflict. -The water fountain which runs along the trail over on the Gatekeepers side of the dam has been out of service for quite some time. I'm not sure if it is considered property of the forest service or of the state.
----------------	----------------	---

Mancos State Lark	Mancos, CO	I have identified signs of the Trump administration. Both the president and his cabinet fail to recognize the beauty and grandeur of our national parks, forests, and BLM land and are selling it to commercial interests. They are national embarrassments and should be removed from office.
Keyhole State Park	Wyoming	This park needs a dedicated kayak/ paddle board launching area. And a better maintained and cleaned beach area.
Oak shores	Fine but restrooms don't work and porta potty is poorly upkept	Working bathroom. The porta potty has feces on the floor and is not cleaned during weekend
Overlook park	California	Whitewashing history is shameful. Humans have had both positive and negative impacts, real leaders acknowledge the true past and offer multiple perspectives. This administration is a stain on our country and we hope sanity will win in the end.
Navajo lake campground	New mexico	Many sites in Pine Campground need attention. Specifically #71 needs major retaining wall repair for safety and the picnic table needs to be raised up to normal functional height. 73,74,75,47, 48, 45, 37, need guard rail repairs, among plenty others. Old dead juniper stumps need to be cut down. A canopy above the playground would be appreciated by children.
Madera Canal	California	Sign for the Madera Canal is broken with wooden board parts fallen loosely onto the ground below the sign next to the Medera Canal and County Road 206, near Friant Dam. No logo is visible.
Cobblestone	Emmett Idaho	We had a bunch of homeless people mess up and trashed the river area . So now it is locked up and believe we should start opening it back up so the crippled people have access to the river as much as the next person. If it appears someone is attempting to live at said dirt then arrest them for trespassing.
Down River Trail	Coulee , Dam, Washington	The bathrooms have been locked and unusable by the public for at least two years all year round
Grand Coulee Dam	Washington	Bathroom facility by the downriver trail is never opened for the public and/or tourists to use, even in the middle of summer!

Lake Altus-Lugert	Quartz Mountain State Park, Oklahoma	• Infrastructure needs serious improvement. Outdated electrical not meeting the standard of modern campers/RVs causing constant issues. • Historical structures in serious need of repair such as: shelters with crumbling load-bearing supports and dilapidated leaking roofs causing internal water damage, historical rock bathrooms in need of repairs and remodel, multiple Group Camp cabins closed because of structural issues like failing roof and floor/foundation issues. • Rotted guardrail posts that create a safety hazard. • Fishing dock has closed almost all summer in need of repairs before opening back up.
Kim's Marina	Helena Mt.	Why all negative outlook. I have all positive responses. Kims Marina looks more inviting than I have ever seen it. What great improvements have been made in the last few years.
Ridgway state park Eldridge bathroom/shower/laundry room next to the playground	Ridgway, co	The woman's bathroom is in terrible shape. We come here a lot and normally I the bathrooms are well kept up. There is no soap for washing hands and in two of the shower stalls the water doesn't drain which makes the stalls in poor shape. The dish station the in the attached building doesn't have warm water for washing dishes either.
Tiber Marina, Lake Elwell	Marina and Island Recreation	Vault toilets are so clean and have TP. Marina people are so welcoming and accommodating. Far exceeded all my family's expectations. Beautiful primitive but established recreation. Thank you!

Bombay Beach Campground - Salton Sea State Recreation Area	Bombay Beach, CA	Dear Bureau of Reclamation, I am a resident of Bombay Beach and a member of its evolving art community. I'm writing to strongly urge the reopening of the Bombay Beach Campground and to express support for the community-led Tree Line Project on Bureau of Reclamation land, while also drawing attention to the poorly managed Straw Bale Project, which is interfering with local efforts. 1. Repairs and Areas Needing Attention The campground's prolonged closure has created a significant gap in public access, harming tourism, local livelihoods, and cultural programming. While its infrastructure (restrooms, signage, waste facilities) needs repair, the space provides immense value when operational. Bombay Beach has seen a major increase in tourism due to its cultural revitalization. Visitors arrive not only in winter, but also in spring and fall. With the campground closed and no public facilities available, many camp on privately owned beach land, leaving trash and using the area as a restroom. Our community has even paid for portable toilets to maintain cleanliness and dignity. Given that the campground already has the infrastructure needed to support visitors—designated campsites, bathrooms, waste disposal—there is no justifiable reason it should remain closed. On a typical winter weekend, the town is overwhelmed. Reopening the campground would directly relieve this burden. 2. Services That Need Improvement We do not support the Straw Bale Project in its current form. It is actively
---	-------------------------	---

		interfering with our long-standing, community-led Tree Line Project. Though part of the Salton Sea 10-Year Management Plan, the straw bale effort appears to be failing while consuming valuable resources. Those funds would be better spent on wetland restoration or reopening the campground. Additionally, a new water meter with backflow valve was installed on Avenue A. Planned water lines to the straw bales would cross through our tree irrigation system, threatening its success. The Bureau of Reclamation has affirmed that we hold a signed agreement for the tree project and noted that the meter's placement may not have been in the approved plan. It also partially blocks access to the campground entrance, compounding the issue. 3. Information and Narrative The campground's closure gives the false impression that the area is inactive, when it is in fact a vibrant hub of ecological and cultural life. We ask that signage and materials reflect the community stewardship underway. Negative Impacts of the Closure • Economic harm: Reduced tourism = reduced local income • Public health: No restrooms = unsanitary conditions • Cultural loss: Artists and educators lose gathering space • Community disempowerment: Years of care undermined Reopening the campground would alleviate beach pressure, provide sanitary infrastructure, and support the cultural and ecological programs that define Bombay Beach today. We urge you to act. The Salton Sea region deserves restoration that includes and uplifts its people. Sincerely, (b) (6)

Spirit Mtn Park Laughlin, Nevada	Nevada	I'm a person with limitations that fall under the ADA act. I will disclose my limitations to you for purpose of me reporting this park. I have (b) (6) (b) (6) stretches every morning half of that Park you cannot because it is not fully cemented all the way around the circumference of the park. It's almost like a person with a wheelchair can get minimal access to all areas of the park, thank gosh that's not my issue but I'm also advocating for them. There needs to be a cement pathway all the way around the park, for example the ball field is half cement and then the half dirt that does not cut it for somebody who has walking issues with a cane. I'm also going to follow this up with the ADA administration that oversees this issue. I noticed there was nonsense construction the other day at the park where some cement was broken up and replaced under benches which wasn't even broken but this issue needs to be addressed. Another example is coming from the activity center what do you do in a wheelchair or on a cane problem, just stop at the dirt? Again there needs to be some type of a 360° cemented path for people to walk on whether it be continuous from the very top of the park by the recreation center to connect to the ball field or an independent one down near the ball field area and or by the gazebo. (b) (6) issues I'm trying to rehabilitate from. The park is not adequate and does not fully address all ADA needs.
Hoover Dam	Nevada	We paid extra for the Guided Dam tour on 8/2/25 at 11:30 am. Our tour guide Adam spoke too quickly for our family to understand him. I very nicely asked him about it, and he was not very kind in his reply. He mumbled and was

		Sincerely, (b) (6)
Tahoe Dam	Tahoe City, CA	Your sign and these efforts to “whitewash” history are highly offensive and a further indication on the Nazi-like regime the moron Trump is creating.

		rushing in such a way that it was very disappointing. My (b) (6) years old and they couldn't understand him. Others in our group felt the same way.
Turquoise Lake	Leadville, CO	Question 3 is ridiculous considering the government is totally fine selling off supposed "beautiful landscape" to private companies that would effectively destroy the "grandeur" and "abundance of landscape." Otherwise, beautiful! :)
Red Willow SRA	McCook, NE	Please stop letting water out of the lake. We need another 20'+. We drive out to the lake 3 times a week and check water level. It starts getting full then the next day it drops back down. It has been 20 years since it has been allowed to fill up completely.
Bombay Beach Campground	Bombay Beach, CA	I'm (b) (6), a resident of Bombay Beach for 3 years now. I am writing to support the repair and reopening of the campground next to town. We have ongoing struggles with unofficial camping on the beach, on both private and government property. No one wants to waste the time of the police or cause problems for the campers, but the situation has gotten steadily worse in the years I've been here. I believe a nearby place where we can direct people would solve the problem almost entirely.

Bombay Beach Campground - Salton Sea State Recreation Area	Bombay Beach, CA	Dear Bureau of Reclamation, I am a resident of Bombay Beach and a member of its evolving art community. I'm writing to strongly urge the reopening of the Bombay Beach Campground and to express support for the community-led Tree Line Project on Bureau of Reclamation land, while also drawing attention to the poorly managed Straw Bale Project, which is interfering with local efforts. 1. Repairs and Areas Needing Attention The campground's prolonged closure has created a significant gap in public access, harming tourism, local livelihoods, and cultural programming. While its infrastructure (restrooms, signage, waste facilities) needs repair, the space provides immense value when operational. Bombay Beach has seen a major increase in tourism due to its cultural revitalization. Visitors arrive not only in winter, but also in spring and fall. With the campground closed and no public facilities available, many camp on privately owned beach land, leaving trash and using the area as a restroom. Our community has even paid for portable toilets to maintain cleanliness and dignity. Given that the campground already has the infrastructure needed to support visitors—designated campsites, bathrooms, waste disposal—there is no justifiable reason it should remain closed. On a typical winter weekend, the town is overwhelmed. Reopening the campground would directly relieve this burden. 2. Information and Narrative The campground's closure gives the false impression that the area is inactive,
---	-------------------------	--

		when it is in fact a vibrant hub of ecological and cultural life. We ask that signage and materials reflect the community stewardship underway. Negative Impacts of the Closure • Economic harm: Reduced tourism = reduced local income • Public health: No restrooms = unsanitary conditions • Cultural loss: Artists and educators lose gathering space • Community disempowerment: Years of care undermined Reopening the campground would alleviate beach pressure, provide sanitary infrastructure, and support the cultural and ecological programs that define Bombay Beach today. We urge you to act. The Salton Sea region deserves restoration that includes and uplifts its people. Sincerely, (b) (6)

Thank you,

(b) (6)

Bombay beach campground	Bombay beach, ca	To Whom It May Concern, I'm writing to ask that you please reopen the Bombay Beach Campground and support the ongoing community-led Tree Line Project on Bureau-managed land. Although i am not a full-time resident of Bombay Beach, but I've spent a good amount of time there over the years. I've come to know people who live there full-time and care deeply about the land and the community. I've seen the good they're trying to do with limited resources. The Campground: That campground has been closed for a long while now, and the effects are clear. Tourism in Bombay Beach has increased—people come not just in winter, but through spring and fall as well. Without a public place to camp, folks pitch tents and park RVs on private land, and with no restrooms, trash and waste pile up. It's not healthy, it's not respectful, and it puts a burden on locals who've stepped in to try and keep things clean by renting their own porta-potties. The campground already has what's needed—bathrooms, trash bins, signage, campsites. It just needs repairs and the green light to reopen. In a small place like Bombay Beach, a little thing like that makes a big difference. When visitors have a proper place to stay, it eases pressure on the town and keeps the environment cleaner for everyone. The Tree Line and Straw Bale Projects I also want to speak on behalf of the Tree Line Project. That's something community members have been working on for years—planting and caring for trees that provide shade, improve the landscape, and show what's possible when people are given a little trust and room to work.
-------------------------	------------------	---

		The new Straw Bale Project, by contrast, seems to be getting in the way. The placement of a new water meter on Avenue A cuts right through the tree irrigation system, and it's partially blocking access to the campground entrance. From what I understand, the community has a signed agreement for the tree project, and the current setup wasn't in the approved plans. It's frustrating to see a top-down project—with no roots in the community—disrupt something local people have nurtured from the ground up. If funds are available, they would be better spent on wetland restoration, or simply reopening the campground. In Conclusion Right now, the campground's closure gives the false impression that Bombay Beach is some forgotten place. But anyone who's spent time there knows better. It's a place full of life, creativity, and care. People are doing their best to restore both the land and the culture, despite the odds. Closing off access doesn't just hurt tourism—it creates public health problems, removes gathering spaces for artists and educators, and sends the message that local stewardship doesn't matter. Please reconsider. Reopen the campground. Support the tree project. And work with the people who are already showing up to care for this unique and fragile place. Sincerely, (b) (6)

Overlook Park	Auburn CA	Shut down the skate park because there is nothing but drugs, alcohol and graffiti that ruins the beauty of the park.

		Also, I would recommend contacting Auburn Police Department to come through the park on a regular basis as well.
Hoover Dam	Clark County, Nevada	Nothing much to complain about, facility is clean and well maintained. Some signage at the Pat Tillman Bridge is torn and sunfaded, but that is to be expected. Improper capitalization on signage referring to black workers, either change to lowercase (pre 2020 spelling) or capitalize all races like Fox News does. If safety permits a return to pre-9/11 tours would be appreciated.
American Falls Willow Bay Marina Trail System	ID	The trail's lovely. The birds are still free to sing what they like, and the rocks haven't yet been asked to smile more patriotically. As for signage, I noticed none that failed to sufficiently glorify the landscape or suppress uncomfortable truths about our collective past. But we'll keep an eye out.

Hoover Dam	AZ	Paint a line that designates AZ and Nevada on the actual Dam road

Hofer Lake Campground	McClusky, ND	Have a handicapped accessible boat dock for people that have mobility issues. Have more than one handicapped camping spot that is cemented. It would be very nice to have more than 1/2 of the sited cemented.
Ridgway State Park	Ridgway CO	It is appalling to us as taxpayers that the current president and his administration is even considering the historic information presented at our National Parks as potentially negative. We have visited almost every National Park and they have done a fantastic job presenting the history of ALL americans, not just european. Presenting the history of enslaved people, Native Americans, immigrants and others is not negative. Our president and the current administration projects racism and xenophobia when they suggest this, which dishonors ALL Americans. It is truly shameful and history always shames narrow minded and ignorant viewpoints. Ridgway is in amazing, clean and in excellent condition and its signage is appropriate and excellent.
Ridgeway state park	Colorado	It would be nice to have a sign in the laundry room reminding people not to leave e their clothes in the dryers for hours. I cannot dry my clothes because someone else's clothes are in the dryers. I don't feel right touching someone else's property.
The trail from Galleria to Lake Mead Parkway is in bad shape and the portion that runs underneath Galleria is heavily overgrown and blocking the path	Henderson NV 89011	The path is in need of repair and restoration
Bombay Beach Campground	The campground is closed.	The campground needs to be open and functional to help support tourism and the community.
Reach 11 Sports Complex	Arizona	I have no negative remarks about the area. The trails are great and the soccer fields are the best around.
Reach 11 trails	Phoenix, AZ	Trials are beautiful. Great area to visit, only issue is the uptick of unhoused residents that leave trash in areas

East wetlands park gateway park.west wetlands park and under the territorial prison cemetery	Yuma arizona	Alot of homeless people are camping at the places that I mentioned.also there is graffiti
Department of Interior	Washington dc	The poster with the QR code presents only negative and hateful descriptions. The presentation President fails to emphasize the beauty, grandeur and HONESTY our country once stood for. Keep your fucking, filthy hellscaped hands off THE PEOPLES' properties. In no way, shape or form does ANYONE in the far right give a rats dingle about “restoring truth and sanity to American history, and the whole world knows it! Fuck off and eat shit, you monsters.
Not sure	Not sure	Stop whitewashing history because it doesn't conform to your racist and sexist agenda. This is despicable and one of thr most un-American things I've seen recently and there are many. You should be ashamed.

Bombay Beach Campground- Salton Sea State Recreation Area	Bombay Beach, CA	Dear Bureau of Reclamation, I am a resident of Bombay Beach and a member of its evolving art community. I'm writing to strongly urge the reopening of the Bombay Beach Campground and to express support for the community-led Tree Line Project on Bureau of Reclamation land, while also drawing attention to the poorly managed Straw Bale Project, which is interfering with local efforts. 1. Repairs and Areas Needing Attention The campground's prolonged closure has created a significant gap in public access, harming tourism, local livelihoods, and cultural programming. While its infrastructure (restrooms, signage, waste facilities) needs repair, the space provides immense value when operational. Bombay Beach has seen a major increase in tourism due to its cultural revitalization. Visitors arrive not only in winter, but also in spring and fall. With the campground closed and no public facilities available, many camp on privately owned beach land, leaving trash and using the area as a restroom. Our community has even paid for portable toilets to maintain cleanliness and dignity. Given that the campground already has the infrastructure needed to support visitors—designated campsites, bathrooms, waste disposal—there is no justifiable reason it should remain closed. On a typical winter weekend, the town is overwhelmed. Reopening the campground would directly relieve this burden. 2. Services That Need Improvement
--	-------------------------	---

		We do not support the Straw Bale Project in its current form. It is actively interfering with our long-standing, community-led Tree Line Project. Though part of the Salton Sea 10-Year Management Plan, the straw bale effort appears to be failing while consuming valuable resources. Those funds would be better spent on wetland restoration or reopening the campground. Additionally, a new water meter with backflow valve was installed on Avenue A. Planned water lines to the straw bales would cross through our tree irrigation system, threatening its success. The Bureau of Reclamation has affirmed that we hold a signed agreement for the tree project and noted that the meter's placement may not have been in the approved plan. It also partially blocks access to the campground entrance, compounding the issue. 3. Information and Narrative The campground's closure gives the false impression that the area is inactive, when it is in fact a vibrant hub of ecological and cultural life. We ask that signage and materials reflect the community stewardship underway. Negative Impacts of the Closure • Economic harm: Reduced tourism = reduced local income • Public health: No restrooms = unsanitary conditions • Cultural loss: Artists and educators lose gathering space • Community disempowerment: Years of care undermined Reopening the campground would alleviate beach pressure, provide sanitary infrastructure, and support the cultural and ecological programs that define Bombay Beach today. We urge you to act. The Salton Sea region deserves restoration that includes and uplifts its people. Sincerely, (b) (6)
--	--	---

Please provide the name of the Reclamation recreation area or facility.	What state is the Reclamation recreation area or facility that you would like to provide feedback on?	In the field below, please provide information on: any areas of the Reclamation location that need repair;any services that need improvement; or any signs or other information that are negative about
Hoover Dam	Nevada	If the Hoover Dam belongs to the American people, then the Visitor's Center should be FREE. Charging \$15 per person is blatant highway robbery. You all should be ashamed. The Federal Government is prohibited from trying to profit off the public. Even the Smithsonian entities in Washington DC are free to the public. And please don't send any BS about not making any profit. The \$10 fee for parking is rip off enough. Fees to cover the cost of the structure is appropriate. Once the structure is paid for, fees should be dropped, or lowered to a nominal level.

Bombay Beach campground	Bombay beach Ca	Dear Bureau of Reclamation, I am a resident of Bombay Beach and a member of its evolving art community. I'm writing to strongly urge the reopening of the Bombay Beach Campground and to express support for the community-led Tree Line Project on Bureau of Reclamation land, while also drawing attention to the poorly managed Straw Bale Project, which is interfering with local efforts. 1. We urge you to act. The Salton Sea region deserves Thank you, (b) (6)
Sunset View wild life area	Yuma Arizona	The area was clean looks like new trees being planted nice walk ways yet still in progress.
Tahoe Dam	California	The flyer that had the QR code that lead me here in its existence is offensive and has no place in my lake.
Mancos state park	Mancos,Co	None

Potholes State Park	Othello Washington	Sprinkler repair. There are sprinkler heads not working and in this hot environment it doesn't take long for trees and lawns to be damaged. The trees here are so lovely and obviously chosen with care.
Willow Bay	American Falls, Idaho	As a person (b) (6) I can't get to majority of the facilities. Much of the park is in disrepair, crumbling walkways and parking spaces. No ADA tables and ADA campsites are the worst location and I have to back in. No ADA site for pull through camping. I also can't get to any sales sites to buy stuff. I had to leave and find an ADA camping area.
Horsetooth Reservoir	Fort Collins, Colorado	Fuck Off you fucking Nazi's....
Navajo	Colorado	This sign is the problem. Fuck you you fucking retards. Plenty of Americans were assholes in the past, the glory of America is learning from their mistakes and being better, not hiding your heads in the sand like a bunch of children. What kind of fascist bullshit is it to hide embarrassing facts? If your heros turn out to be assholes, then find new heros. You don't need to pretend, like a child, that your heros are perfect. You should be ashamed that your agency put these signs out, ashamed that you are reviewing this report, and ashamed that your supervisors are too cowardly to stand against this bullshit.
Merit reservoir	Valentine, Nebraska	Dumpster near campsite 16 reeks from dumpster, probably fish cleaning. We've camped here several times, but it has never been this bad. Makes it hard to enjoy outside. Last year the dumpster was closer to the road so didn't seem to bother as bad.
Grand Junction Wildlife Area	Grand Junction, CO	Excellent signage and progress on restoration. But I am offended by this questionnaire. I expect accurate history from my tax dollars, not whitewashed history.
Department of the Interior Main Headquarters	Washington, DC	There is a whiney millionaire Secretary of the department of the interior who is constantly on Fox News complaining about "woke" and getting freshly baked cookies delivered by his subordinates and trying to sell off our public lands instead of protecting them. These lands are the

		taxpayers so you should probably get rid of that government worker who is mooching off taxpayers by being more concerned with going on Fox News and being camera ready and being annoying instead of doing his job.
Overlook park	Auburn, Ca	We need a bridge over the American River to expand access and serve all the residents and visitors of Auburn.
Chinaman's Gulch	Canyon Ferry Lake	No envelopes for cash or in-person reservations. The online and phone portals demand substantially higher prices than posted signs onsite
Klamath falls water canal	Klamath falls, oregon	Need a way of reporting issues like dead deer or water leaks.
ROMT - East Inlet	Grand Lake, CO	No negative signage. NPS needs more funding for seasonal workers & maintenance!!
East Inlet Rocky Mountain National Park	Grand Lake CO	Need better maintenance of restrooms. The message is useful and focused on safety. I object to this suggestion that signage should be politically corrected. We are proud of our National parks and oppose the firing of staff and intrusion into signage and books that tell the full history of these places.
Horsetooth Reservoir	Fort Collins Co	I am writing in response to the posted Bureau of Reclamation sign at Horsetooth reservoir in Fort Collins, CoThe sign itself is inappropriate for public recreation areas. Instead of inviting constructive feedback, its phrasing and political undertones come across as polarizing and undermine the very purpose of public lands: to provide inclusive, nonpartisan spaces where all Americans can enjoy the outdoors. The reference to “Restoring Truth and Sanity to American History” feels partisan and unnecessarily injects political ideology into a space that should remain neutral, welcoming, and focused on stewardship.Additionally, the sign contains grammatical errors that further reduce its professionalism and effectiveness as a communication tool. If the Bureau of Reclamation wishes to solicit genuine input from the public, the messaging should be carefully reviewed and free from political slogans.Finally, if the agency is serious

		about maintaining public trust and protecting these lands, the focus should not be on posting politicized signage but on prioritizing funding, conservation, and resisting the sale or transfer of public lands. Public land management should be rooted in accessibility, ecological health, and service to the people—not political agendas. I respectfully request that this sign be removed or replaced with a nonpartisan version that simply invites constructive feedback on land management. Our local recreation spaces should not be used to promote divisive narratives. Here are some basic edits you could change • Opening sentence: Added subject (“This area”) and changed “wants” → “welcomes” for professionalism. • Repair section: Removed awkward parentheses, clarified to “park or surrounding facilities.” • Services section: Changed “need improvement” → “could be improved” for constructive tone. • Signs section: Removed politicized wording (“negative about past or living Americans”) and replaced with neutral language about clarity, accuracy, and emphasis on landscapes. • QR code line: Fixed grammar by adding “the” and simplified to “visit the link below.” • Final line: Deleted biased phrase “Restoring Truth and Sanity to American History” and kept only the order reference.
Horse Thief Canyon Fruita Colorado	CO	It’s a well kept area -wilderness abound
Grey Reef Campground	Wyoming	Cleaner drinking water to be available to guest and more affordable camping (i.e. free).
Ridgway state park	Ridgway, CO	We have been camping at this great place for 20 years and in recent years general work to maintain bathrooms and showers just isn’t done. Bathrooms don’t work, showers have no hot water and general work isn’t done.
Santanka Cove north end of Horsetooth Reservoir	Colorado	Vault toilets are completely full. The only option for bathrooms on this side of the lake, we already have to pay for parking (\$10) which I don’t mind, but the bathrooms need to be properly maintained and emptied more frequently due to the heavy level of use. It’s disgusting.

Overlook day use area	Helena, MT	Vault toilet is missing, appears to have been ripped off the floor. Pit is very full and includes garbage.
Crawford state park, iron creek campground. Crawford, CO	Crawford state park, iron creek campground. Crawford, CO	Yellow jackets and wasps are abusive to campers. Suffered multiple stings during our 2 night stay.
Grand Junction Wildlife	Grand Junction CO	The restrooms need to be maintained better. Regular cleaning and stocking is needed. As a side note, when looking across the CO River there are numerous homeless camps in the vicinity of the old railroad bridge that need to be removed and cleaned up. Trash is being dumped into the river. Many dump trucks will be required for the cleanup.
rocky mountain national park	estes park, co	trump hates all past and current americans by wanting to take away our rights, including our right to be in nature. he should be removed from office if we want to bring glory back to the united states
Hoover Dam	Nevada	I am very upset that you are selling plastic encased tarantulas, scorpions and stick insects. This devalues the animals and does not discuss the endangered species status of these animals. You are not selling native birds and in my opinion should not be selling insects embedded in plastic. Thanks for considering this.
Hoover Dam	AZ	Dynamite blasting exhibit was broken and it should not cost Americans \$15 each plus \$10 to park to see this US taxpayer owned facility
Grand Coulee Dam	Coulee City, WA	It would be good to list on the information sign how many stories the dam goes down to the bottom of the river
Colorado	Colorado	I see signs denigrating America on a daily basis from our president who continues to erode democracy, ruin americas reputation, and in general act like an obscenity of a human being. This “ big brother” sign that you posted is bullshit. You should rise up against your leaders and refuse to work for a paedophile, rapist president. Fuck Donald Trump.

Ridgway State Park	Ridgway Colorado	Out of state visitors get charged \$10 per day PLUS the camping fee, only one bathroom in facility with a 100 campers - it was gross - and no hot water for showers - had to drive to town to (and pay) for a hot shower. Never saw camp host or maintenance crew entire week we spent here. One bathroom / shower building out of order apparently for months. With what is charged here BATHROOMS SHOULD ALL WORK AND BE CLEAN !
Pole Park	Grand Coulee Power Office. WA	The distance flags at the top of each of the 8 poles indicating the distance to each town should be fixed. North south east or west. Currently they move with the wind and at any given time do not accurately reflect the correct direction.
North Dam Park	Grand Coulee, Washington	The gazebo is very very old and deteriorating and so are the tables that are underneath it.
Grand Junction Wildlife Area	Colorado	The GJ wildlife area was great! The parking lot was improved so more vehicles could easily get in & out. The clean vault toilet was repainted a cheerful turquoise color. The paths were clean & maintained. I saw an Osprey fishing in a pond. Amazing awesome & terrific!
: Wild life p reserve Grand Junction	Grand Junction Colorado	The whole area is beautiful- well: maintained. My favorite place to paint as a landscape artists
Hap Hawkins Campground, Clark Canyon Reservoir	Montana	The campground looks well maintained and the manager is pleasant to be around.

Our community has even paid for portable toilets to maintain cleanliness and dignity. Given that the campground already has the infrastructure needed to support visitors—designated campsites, bathrooms, waste disposal—there is no justifiable reason it should remain closed. On a typical winter weekend, the town is overwhelmed. Reopening the campground would directly relieve this burden. 2. Services That Need Improvement We do not support the Straw Bale Project in its current form. It is actively interfering with our long-standing, community-led Tree Line Project. Though part of the Salton Sea 10-Year Management Plan, the straw bale effort appears to be failing while consuming valuable resources. Those funds would be better spent on wetland restoration or reopening the campground. Additionally, a new water meter with backflow valve was installed on Avenue A. Planned water lines to the straw bales would cross through our tree irrigation system, threatening its success. The Bureau of Reclamation has affirmed that we hold a signed agreement for the tree project and noted that the meter's placement may not have been in the approved plan. It also partially blocks access to the campground entrance, compounding the issue. 3. Information and Narrative The campground's closure gives the false impression that the area is inactive, when it is in fact a vibrant hub of ecological and cultural life. We ask that signage and materials reflect the community stewardship underway. Negative Impacts of the Closure ☐Economic harm: Reduced tourism = reduced local income ☐Public health: No restrooms = unsanitary conditions ☐Cultural loss: Artists and educators lose gathering space ☐Community disempowerment: Years of care undermined Reopening the campground would alleviate beach pressure, provide sanitary infrastructure, and support the cultural and ecological programs that define Bombay Beach today. We urge you to act. The Salton Sea region deserves restoration that includes and uplifts local inhabitants! Sincerely, Lauren Scheiner
Red willow recreation camping	Nebraska	Thanks for your work. We appreciate it.
Hoover Dam	Visitor Center	In the past, military were afforded free entrance into the visitor center. Please bring that back.
Clark Canyon Reservoir	Montana	The images of the explorers and Native Americans on the interpretation signs at the Clark Canyon Recreation Area and Camp Fortunate are clearly AI-generated and distorted. And unfortunate.
Ridgeway State Park	Ridgeway, Colorado	In the Pacochupuc campground and recreational area, the cacti is very abundant. I understand it is part of the natural landscape but there is a lot of cacti right up against the sidewalks and dirt pathways, making dog walking difficult. When walking my dogs I have to keep my eyes peeled for cactus plants. This also makes it difficult to find safe places for doggies to relieve themselves.

Bombay beach campground-salton sea state recreation area	Bombay beach, Ca	Dear Bureau of Reclamation,I am a resident of Bombay Beach and a member of its evolving art community. I’m writing to strongly urge the reopening of the Bombay Beach Campground and to express support for the community-led Tree Line Project on Bureau of Reclamation land, while also drawing attention to the poorly managed Straw Bale Project, which is interfering with local efforts. 1. Repairs and Areas Needing Attention The campground’s prolonged closure has created a significant gap in public access, harming tourism, local livelihoods, and cultural programming. While its infrastructure (restrooms, signage, waste facilities) needs repair, the space provides immense value when operational. Bombay Beach has seen a major increase in tourism due to its cultural revitalization. Visitors arrive not only in winter, but also in spring and fall. With the campground closed and no public facilities available, many camp on privately owned beach land, leaving trash and using the area as a restroom. Our community has even paid for portable toilets to maintain cleanliness and dignity. Given that the campground already has the infrastructure needed to support visitors—designated campsites, bathrooms, waste disposal—there is no justifiable reason it should remain closed. On a typical winter weekend, the town is overwhelmed. Reopening the campground would directly relieve this burden. 2. Services That Need Improvement We do not support the Straw Bale Project in its current form. It is actively interfering with our long-standing, community-led Tree Line Project. Though part of the Salton Sea 10-Year Management Plan, the straw bale effort appears to be failing while consuming valuable resources. Those funds would be better spent on wetland restoration or reopening the campground. Additionally, a new water meter with backflow valve was installed on Avenue A. Planned water lines to the straw bales would cross through our tree irrigation system, threatening its success. The Bureau of Reclamation has affirmed that we hold a signed agreement for the tree project and noted that the meter’s placement may not have been in the approved plan. It also partially blocks access to the campground entrance, compounding the issue. 3. Information and Narrative The campground’s closure gives the false impression that the area is inactive, when it is in fact a vibrant hub of ecological and cultural life. We ask that signage and materials reflect the community stewardship underway. Negative Impacts of the Closure ☒Economic harm: Reduced tourism = reduced local income ☒Public health: No restrooms = unsanitary conditions ☒Cultural loss: Artists and educators lose gathering space ☒Community disempowerment: Years of care undermined Reopening the campground would alleviate beach pressure, provide sanitary infrastructure, and support the cultural and ecological programs that define Bombay Beach today. We urge you to act. The Salton Sea region deserves restoration that includes and uplifts its people. Sincerely, James Connelly
River mountain loop trail	Nevada	There is not enough trash receptacles available along the pathway so people litter profusely. A regular trash clean up should be scheduled on a quarterly basis at the bare minimum and a one time clean up effort should be coordinated with the City of Henderson, most notably Ward 1 City Councilman Jim Seebock. I have already been in contact with his office but follow up will be required. Everyone, concerned citizens and regular trail users, want to honor our natural resources and keep Henderson beautiful for all to enjoy. Man’s rubbish robs our environment of God’s beauty. Thank you Andrew Otto Lietz 1063 Calico Ridge Dr Henderson NV 89011
Buffalo Bill State Park	Cody, Wyoming	There is a new camping area with a dock and cabins right next to Sheep Mountain Trail. It is great except for the lack of access to clean water. Even a pump or hose would be nice
Elephant Butte dam	NM	There is a horrible ugly sign taped to the very informative history sign. This sign whines and complains about sanity in history. Seems to have been put here by pathetic thin skinned government officials that do not understand history. Please grow up and remove this atrocity.
Hoover Dam	Los Vegas	The floors at the doorway going to and from the turbines need painting and the male cook in the cafe felt the need to use profanity toward me, because stated customer need to be able t wash there hands and not have to touch dirty door handle to get back to where they will eat.
Hoover Dam	Nevada	Violated my constitutional rights via my first and fourth amendment right as a United States citizen
Pishkun Reservoir	Choteau Montana	Our first visit to this location. It appears the original campground was constructed with rocks and cement from the site. Very creative and beautiful with the centerpiece being a pavilion fireplace with stone/cement tables all of which could use some TLC. Of course vandals have done some damage, but nothing that could not be repaired.
River Mountain Loop Trail	Lake Mead, NV	Currently a construction project has the trail closed. Initial indication was that this was a 1 month closure. It has been 2 months with no updates found.

Rocky mountain national park	Colorado	This sign is extremely negative and a detraction from the beauty and grandeur of natural features. You should remove these from every park. I visit national parks to learn about this country, nature, culture, and history of American residents - I mean all history. Removing information because someone perceives it as "negative" is lying about history and making our country not a great one, but a weak and pathetic one. We have made mistakes and we should recognize and grow from them. Mature adults (and countries) acknowledge their past - even the bad - and seek to become better. Children (and immature countries and leaders) are the ones who need to change history because it hurts their fragile feelings.
Rocky mountain national park	Colorado	Seriously? I'm trying to hike and enjoy the beautiful aspens and here you are foisting your thinly-veiled attempts at censorship on me. No thanks and no way. This qr code is negative information that is very much failing to emphasize America's national beauty and failing Americans.
Grand teton national park	Wyoming	More marmots, please
Glacier national park	Montana	You know who else tried to change alleged "negative" history? Nazi Germany. Is this who America wants to be?
Medicine Creek reservoir Wildlife management area	Cambridge Ne	The older shower area could use an upgrade.
Medicine creek	Nebraska	Yes- No number to call at cabins if you need something Many of the 110 outlets at campsites do not work Many signs cannot be read Bathrooms- redo signs that say how much shower is All bathrooms have duct taped vents. Maybe fix?
Hoover Dam	Nevada	The tour introductory movie is very old and of very poor quality. It needs updating, reimaging and current information added to it. I'm pretty sure it's the same movie I have seen on many occasions over the last 30 years
Canal A	Klamath Falls, Oregon	Thru Klamath falls there needs to be more patrols keeping homeless people off the canal. While they are harmless for the most part, they do litter quite heavily.
Carter lake	Berthad	None
Little Wood Reservoir	Carey, Idaho	The streamflow regulations on the Little Wood Reservoir both in regards to a winter stream flow and a sustained reservoir level are an environmental disaster. The lack of a management requirement/regulation to maintain an adequate stream flow below the dam, and a minimum reservoir level in the Little Wood Reservoir have led to several disasters in the last 5 years. In the winter season there is no water being release from the dam. In the spring of 2020 when the irrigators started releasing water from the reservoir an anoxic slug of sediment from the bottom of the reservoir filled the valley below with a sewer-smelling black stream of sediment that killed water foul and fish. This could have been avoided be requiring a sustained streamflow, which would also help maintain a quality trout fishery belowthe reservoir. Then the next year the irrigators drained the entire Little Wood Reservoir flushing more sediment and sludge along with thousands and thousands of trout to their inevitable death (my estimates are 150,000 -200,000 trout died there). The sediment load filled the river channel below the reservoir, thus choking life out of the river. So bad was the sediment build up that they had to get a backhoe to dig out the hydro turbines. They could have left a small amount of water in the Reservoir and still received what water flowed in and avoided this problem and kept those fish alive.

Rocky Mountain NP	Grand Lake, Colorado	The trails were in excellent condition. I was amazed at the ingenuity used by the National Park Service to maintain drainage and erosion in the wilderness areas. The trails were well marked and the access bridges were all in good condition. There were several new bridges that proved they are constantly working to maintain features. Staff and volunteers were very professional.
Hoover Dam	Nevada/Arizona	\$25 is too much for the tour if you just want to see the movie. There should be a price for just movie and for seniors. There were four tour guides standing there with nothing to do because no one wanted to do a 45-minute tour or they just wanted to see movie. There needs to be something in between.
Ridgeway State Park Campground	CO	This place is beautiful, let us keep it this way!
Reach 11	Phoenix, AZ	Love this area, I have been riding a bike there for years. How about connecting horse lovers parked to the park across Tatum Boulevard either by pedestrian bridge or tunnel under the road ?
River Mountain Loop	Henderson and Boulder City Nevada	Trash dumped along the River Mountain Loop along East Lake Mead Pkwy. across from the Lakemoor project of 3000 homes on the Three Kids former mine site and they have several closed off areas along the River Mountain Loop that were supposed to be back open by August 31st 2025 and as of October 12th 2025 still closed, no updates. There are several patches of dangerous areas of debris and mud and dunes that are blocking the parts of the River Mountain Loop that are still open, that could easily cause injury to bicyclists coming down a hill at higher speeds and driving into that. I used to be able to bike to work in Boulder City from Lake Las Vegas, and back again, but I've been unable to use it for several months due to closures. As a senior this is so important to me and the main reason I bought my house in 2022. When will the River Mountain Loop be re-opened?
Simon Draw Wildlife Area	Cortez, Colorado	The Wildlife Area has not been irrigated this year and all of the holding ponds are dry. The area is a designated wetlands and bird habitat, which is not possible without the irrigation water.
Simon draw wildlife area	Colorado	Why are the ponds dry? They need to put water in the ponds.
Hoover dam	Nevada	Everything was better before Trump touched it
Rocky Mountain National Park	Grand Lake, Colorado	The sign that we scanned this QR code on is located on the trailhead information board. It is entirely unnecessary and covers information that the American people would actually find valuable. Do something useful with your time and take this down.
Rocky Mountain National Park	Grand Lake, CO	This sign for this form presents negatively. It undermines the emphasis of the hard work the park rangers do to keep this park beautiful and safe and informative. Stripping people of the history of the United States and our parks as well as forcing the removal of climate change information is stripping the American people of the opportunity to experience the full beauty and true nature of the park.
Rocky Mountain National Park	Grand Lake, Colorado	In Rocky Mountain National Park, why is this sign with the QR code on Bureau of Reclamation letterhead? It is embarrassing that the people in Washington running this effort don't even know the bureaus and agencies under their control. I would consider starting there before undertaking an effort such as this.
	CO	Pay twice
Wild Rose Park	Emmett Idaho	Women's Restroom faucet and sink need replacing. Beautifully maintained park!
East Wetlands	Yuma, AZ	All of the wetlands viewable from trail appear to be Unmaintained. Random white pipes are everywhere.
Clark Canyon Res, Horse Point CG	Dill Montana?	Thank you for providing such a great resource for the people. The CG and restrooms are well maintained and a joy to visit.
Elephant Butte	Elephant Butte, NM	Knock this off, please. The parks and recreation districts are for everyone and should not pursue a biased, white-supremacist "history" that marginalizes the contributions on indigenous cultures, women, and people of color. Focus on better signage for trails and reopening the parks. This recreation area was beautiful- thank you to the NPS staff who steward it.

Hoover Dam	Nevada	At Visitor Parking women’s bathroom the first cubicle on the left gets locked and doesn’t open. I couldn’t open the lock of the bathroom. Took me a while until I opened it. The lock has to be repaired.
Hoover Dam	Boulder City, Nevada	Outstanding tour from the Hoover Dam facilities group- appreciate the continued education and public access of such critical infrastructure.
Hoover dam	Las Vegas, NV	New expo is fantastic! Downside: 3rd party security officer at metal detector intro to Power plant tour had a US flag and Mexican flag patch. Totally unacceptable- flags represent allegiance, and no one officially employed by the US government should have another country’s flag on their official uniform...disgraceful.
Lake Mead the River Loop Trail	Henderson Nevada	The trail is being repaired with Type 2 which doesn’t conform to the existing landscape and is in stark contrast to the paved trail which should have been made in decomposed granite in the first place... the repairs represent an aesthetically and environmentally unpleasing choice.
River Campground	Lohanton NV	River side trail needs repair
Hoover Dam	Nevada	Very disappointed that Hoover Dam tickets are not offered with a military/veteran discount. Seriously. That's really lame for a federal site, especially since we planned our entire trip out here around the Marine Corps 250th birthday and Veterans Day.
Hoover Dam	AZ	I would love to discuss the coating removal on the Penstock line. If that is something that is still being researched and bid out, please look up Conco Services, Conco.net.
Grand Junction Wildlife Area	Grand Junction, Colorado	On the farthest road(path) east there are 3 areas where the road has very deep ruts, caused by vehicles. When it rains these areas fill with water and you cannot get around it or through it.
Hoover Dam Visitor Center	Boulder City, Nevada	Security staff was rude and verbally abusive to multiple visitors Register staff failed to provide the time of tours. Staff failed to post availability of tours. Our group was forced to pay for parking at 830A only to learn that our tour was unavailable for the entire day. Staff refused to acknowledge their failures.
Hoover Dam	Boulder City, NV	Where is the "can-do spirit"??? Asked about customer service, one employee responded "customer service is not my job." It should be everyone's job, everyday. No employee should ever use "not my job." When a person doesn't know, ask a colleague for help, deliver the accurate answer to the customer.
Hoover Dam	Nevada	Need changing tables in restrooms
Grey Reef Reservoir	Wyoming	#3 seems like it was written by the most delicate snowflake on earth

Lake Pleasant Regional Park	Lake Pleasant Arizona	I would like to see information about the original people/Native Americans of the area and their contributions to the history of the area.
Humboldt wildlife management area	Lovelock, Nevada Humboldt wildlife	The cattle are eating all the food that the wildlife needs
Humboldt Wildlife Management Area	Lovelock, Nevada	The tules are choking off the water flow for both the waterfowl and boat access for hunters. Remove or safely poison to remove them. Plant feed for migratory birds. Don't allow public grazing for cattle or limit the areas they are allowed to graze.
Humboldt WMA,	Lovelock, Nevada	#NAME?
Hoover Dam	Boulder City, NV	we had a great tour. My only comment is to have a consistent message across all guides, we can hear other tour guides as we past and our guide was not as forthcoming with facts/information beyond the set four. Other guides appeared to be more informative. This facility and the museum is well kept and clean. Additionally, the parking structure should be automated and not requiring 2 employees to sit in a dark structure to collect payment. Thank you.
Reach 11	Arizona	I have no negative feedback, I am here to give positive feedback that this area is beautifully taken care of. I have been going here for over 10 years now and it is dear to my heart. It grows lush and beautifully and stays true to what a natural preserve should be.
Lake Pleasant	Arizona	The water level is extremely low. The lake is almost gone! They need to slow down the amount of water being drawn from it, to give it time to fill back up.
Elephant Butte Dam	NM	Great exhibit and views, it was very clean and welcoming at the viewpoint for the dab and the lake
Visiting area	Hoover Dam, Nevada	I was visiting the Hoover dam with my family on Saturday the 20th. I went to go use the restroom in the visiting area after purchasing my tickets and there was a lady in the bathroom cleaning. She just looked in incredibly unprofessional and her cleaning didn't make the bathroom feel any cleaner. When I got into there, she was bouncing in and out of the stalls incredibly quickly and there's no way that anything got sanitized. She left in such a hurry. The stall I chose to use had fingerprints all over the door. After I finished the mirrors were all completely streaky, hand drys covered in wipe marks. Don't normally comment on somebody's cleaning because I don't expect much because This is Vegas but this is government property. I thought it would be more clean. I've seen casino bathrooms cleaner than what I witnessed. I don't know if they're required a dress code, but the pants she was wearing did not fit her, were completely saggy, dirty, and bleach ridden. I have never seen a more unprofessional cleaner in my life.
Hoover D	Nevada	I find it highly inappropriate that the security company employees contracted for the federal government display Bible verses on their uniform. Establishment Clause: "Congress shall make no law respecting an establishment of religion," preventing a national church or endorsing religion.
Hoover Dam	Boulder City, Nevada	Hoover Dam was awesome, staff were great, sign with this QR code is highly offensive and stupid implying that there couldn't POSSIBLY be anything negative affiliated with the truth of the history of this country. Very in line with those supportive of this administration's move towards authoritarianism. Shameful.
Hoover Dam	Nevada	It was a very well-kept experience with polite and knowledgeable staff.
Hoover dam	Boulder City NV	Elevator was under repair
S	S	S
Elephant Butte	New Mexico	Stolen land and historic low water due to climate change

Colorado River heritage trail system - North reach trail head	Laughlin , NV	Men's restroom at North reach trailhead is very dirty . It would appear un housed people have made quite an un - sanitary situation of the facility.
Clark county wetlands park	Henderson and Las Vegas	I am very concerned about the city eventually ruining the area with more houses. They do not care about the natural beauty around us
lahontan reservoir	Nevada	I'm Camped on beach 7, Someone came through this afternoon about 4:30pm and open all the water spickets and tipped over some Porta pottys. I closed the spickets that I know about but it's a big place so someone should come out and check them all.
Davis dam	Arizona / Nevada	The bathrooms along the Colorado Heritage Trail need to be pumped and cleaned more often, several of the smaller trash cans were full and hadn't looked like they have been emptied in weeks. Thank you for your attention to this matter.
Yuma East Wetlands	Arizona	There are invasive weeds growing on the bike path by the canal in East Yuma Wetlands. I believe it's Russian Knapweed and it could quickly take over the wetlands if it's not eradicated.
Heritage Trail- Arizona side	Bullhead City, AZ	Still have cleaned up dirt and rocks from trail from the last storm a few months back.
Reach 11	Phoenix, Az	I've been coming out hear for many, many years. It is a place I can exercise and clear my mind. However, the last couple of years, the motor cycles and the homeless that are ruining the land is so disheartening. Not sure if anybody ever polices the area, it would be nice to see some kind of officer once in a while on horseback or mountain bike watching over the place.
Hoover Dam Tour	Nevada and Arizona	We have been on numerous tours at national parks throughout the county that have been excellent (and free with our national parks pass). For \$40, I expect excellence. Instead, we got one bored tour guide, and one who spoke so fast, I couldn't tell you a word he said.
Berryessa	CA	NA
horsetooth reservoir	co	stop trying to erase history you nazis
Hoover Dam	Hoover Dam	There are signs posted everywhere that pets are not allowed in the buildings. I ride up to the new exhibit area with a woman holding her little dog. I listened to it bark in the building. How many employees do you think she walked past to get up to that area? I'm assuming that all your employees can read those signs even if this visitor ignored them. (b) (6) to dog dander.
North dam park	Kids park	The kids truck all the wood is unbolted. And falling apart
Desert Tortise Campground	Peoria, Az	Women's bathroom toilets will not flush
Yuma Wetlands	Arizona	Nope. Just wanted to tell you a great facility.
Lake Casitas Recreation Area	Ventura California	You need to let people who are handicapped to be able to drive their car in for 5 or 10 minutes to look at the campsite to see if they would like to go there in the future. It's not right to charge someone \$10 to drive their car in for 10 minutes to check out the campsites when they can't even walk 100 yd and are forced to pay your tax. You need to look at this issue, it's very important that you do so. I came on February 15th and (b) (6) (b) (6) It would have been nice for you folks to let me in for 10 minutes and drive around and look at your campsites to see if I would like to visit them in the future with my RV. But instead if I was to do so you were forcing me to pay a \$10 fee. Not good, you need to address this issue immediately. Thank you
Hoover dam	Hoover dam. Boulder City NV	Beautiful. Love the art deco
Grand Z junction Wildlife Area	Colorado	Fuck Trump and Burgum. Quit trying to erase our history good or bad. It's a fools game. History is in the books! You all going to start burning books next? If you want to know what needs to be done at the area ask the people that work there or hire back the folks you fired and send them out to look and JUST DO IT!
Tahoe City Dam	Tahoe City, CA	Everything is great. Order 3431 is a ridiculous joke of an order pushed by the pedophile rapist Donald Trump. Anybody involved in white washing history should be ashamed and you shoild resign from your position.
Hoover damn	Boulder city nv	Need a bright sign on steps by the compass my dad did not see and fell
Tahoe Dam	Tahoe city, CA	This is the first time I've run across this request for feedback asking for information about educational materials representing negative information about past or living Americans. I find this need to whitewash our history misguided. We'll only create a more perfect union by being clear eyed about our country, both the beautiful and ugly parts.
A canal Klamath Falls OR	Klamath Falls OR	It would be nice to have dog poop pick up stations and trash cans. Also there is a shocking amount of trash in the canal that is disintegrating and contribution to water pollution .

Mountain View Park	Nevada	RE: Dead and at risk trees. Either dead already or at severe risk. I quit counting when I reached 15 huge dead trees. From: Tim White. W&W Construction. Laughlin Nevada. Life long Community activist. Tree transplanter and tree specialist. First time I went to the park yesterday I found many trees in need of urgent attention. The company that handles this property is "RPM" real property management, I was told by a park supervisor and that this office knows how to contact them. I can not find this company. Please give me a phone # to call and I can fix this with their help and volunteers. I need the phone # you have on file for the property management people. I can fix this if you help me. This park is an oasis and gold mine in the middle of the hottest Desert in North America (Mohave desert). The Problem is water and proper irrigation lines called "drip lines". They are starving and dehydrating because of lack of water. Tons of trees if you add it up.Tim White./V.P. Kiwanis. 702-335-7058
Grand junction wilderness refuge	Grand Junction CO	I believe that history should be represented accurately. Telling the story truthfully and not hiding facts in an effort to paint a picture better than it was.
American Falls Marina Walkway	American Falls, Idaho	The walkway itself has a lot of wear and tear. Very bumpy, with large potholes throughout.
Hover dam	Nevada	No

Please provide the name of the Reclamation recreation area or facility.	What state is the Reclamation recreation area or facility that you would like to provide feedback on?	In the field below, please provide information on: any areas of the Reclamation location that need repair;any services that need improvement; or any signs or other information that are negative a...
American Falls Marina walking trail	American Falls, ID	The entire trail needs replaced or repaved. It has cracks and potholes the entire length of the trail. This makes it nearly impossible to walk with a stroller or for the elderly.
Ridgway State Park	Ridgway, Colorado	Kids playground is completely falling apart and needs to be rebuilt. They have clearly tried hard to extend the life of the facility, but there's only so much lipstick you can put on that pig.
Lake pleasant	Arizona	During the weekend ends like Friday, Saturday and Sunday needs more patrol presence next to places where they are renting using jet skis, basically to enforce the no wake zone next to where they are renting paddles bordering plz someone look into this (or cameras should be in place)
Cobblestone Park	Emmett, idaho	Water is leaking heavily from door of BLDG 533 Storage.
Grand Coulee Dam North Dam Park	North Dam Park near Grand Coulee, WA	The wall of the park gazebo is broken, immediately next to the location that the DOI Secretarial Order 3431 Notice was posted. A picture of irony.
Willwood River access Shoshone River (above dam)	Wyoming	Improve/ repair existing boat ramp. It's backfilled with +\~ 50 cu yds of muck sediment and needs to be cleared and likely have some type of base rock (or concrete) filled back into it
This law is stupid	Anywhere, CO	Stupid, stupid law
