

EASTERN COLORADO AREA MANAGER JACKLYNN L. GOULD

Jacklynn L. Gould is the Area Manager for the Bureau of Reclamation's Eastern Colorado Area Office based in Loveland, Colo. Gould is responsible for the management, development, and protection of water, hydropower, and water-related land and environmental resources for the Colorado-Big Thompson and Fryingpan-Arkansas Projects. She is responsible for 15 dams and reservoirs and seven hydropower plants. These facilities provide 420 megawatts of power, which is enough electricity to supply 90,000 homes with annual energy needs, and water for more than 1.4 million people.

Gould's career with Reclamation began in 1992 as a water resource planner in Reclamation's Denver office. Over the length of her career she worked as a scientist, engineer and manager. She held several positions of increasing responsibility, first in the Albuquerque Area Office, and most recently in the Eastern Colorado Area Office. In 2009, she was awarded the Superior Service Honor Award, one of the Department of the Interior's highest honors for career employees.

Gould is a Colorado native, and is a second generation Department of the Interior employee. She received bachelors degrees in Biology and Civil Engineering, and a Master of Public Administration degree from the University of Colorado. She completed the Harvard Senior Executive Fellowship program in 2011, and is a Registered Professional Engineer in Colorado.

Reclamation is the largest wholesale water supplier and the second largest producer of hydroelectric power in the United States, with operations and facilities in the 17 Western States. Its facilities also provide substantial flood control, recreation, and fish and wildlife benefits. Visit our Web site at www.usbr.gov/gp.
