Mark Treviño is the Area Manager of the Oklahoma-Texas Area Office, which includes most of Texas, all of Oklahoma and southern Kansas, making the area one of the largest geographical areas within Reclamation. As the Area Manager, Treviño is responsible for 11 Reclamation projects, which provide municipal and industrial water to over one million people. He also overseas significant recreation, fish and wildlife, and flood control benefits to the people of Texas, Oklahoma and Kansas.

Prior to accepting the Area Manager position in 2005, Treviño served two years as the Special Projects Director in Austin, Texas. Treviño started his career at Reclamation in 1980 as a Civil Engineer on the Nueces River Project in Three Rivers, Texas. In addition to his construction experience in Texas and Oklahoma, Treviño worked 11 years as a Hydraulic Engineer in Reclamation’s Denver Technical Services Center. Following his time in Denver, Treviño spent three years as Manager of the Alamosa Field Division in Alamosa, Colorado before moving to Austin, Texas.

Throughout Treviño’s career with Reclamation, his knowledge of various computer systems combined with his knowledge of water management practices allowed him to develop and implement computer systems and applications for purposes of improving water management decisions for daily operations as well as long range planning operations. As a senior engineer in Denver, Treviño also provided technical assistance to many of Reclamation’s International clients assisting them in assessing their computational needs and assisting with the installation and use of decision support systems aimed at helping them better manage their specific water management needs.

In 2005, Treviño received the U.S. Department of the Interior Commissioners Superior Service Award. In 2009 he was the recipient of the Cooperative Conservation Award. Treviño has also received numerous performance awards during his tenure with Reclamation. In 1998, he completed Reclamations Executive Leadership Development Program.

Treviño received a Bachelor’s of Science degree in Architectural Engineering from the University of Texas in 1980 and a Master’s degree in Civil Engineering in May 2000 from the University of Colorado-Denver.

Reclamation is the largest wholesale water supplier and the second largest producer of hydroelectric power in the United States, with operations and facilities in the 17 Western States. Its facilities also provide substantial flood control, recreation, and fish and wildlife benefits. Visit our Web site at www.usbr.gov/gp.
