

## OKLAHOMA-TEXAS AREA MANAGER MARK A. TREVIÑO

Mark Trevino is the Area Manager of the Oklahoma-Texas Area Office, which includes most of Texas, all of Oklahoma and southern Kansas, making the area one of the largest geographical areas within Reclamation. As the Area Manager, Trevino is responsible for 11 Reclamation projects, which provide municipal and industrial water to over one million people. He also oversees significant recreation, fish and wildlife, and flood control benefits to the people of Texas, Oklahoma and Kansas.

Prior to accepting the Area Manager position in 2005, Trevino served two years as the Special Projects Director in Austin, Texas. Trevino started his career at Reclamation in 1980 as a Civil Engineer on the Nueces River Project in Three Rivers, Texas. He has held engineering positions in Texas and Oklahoma and spent 11 years as a Hydraulic Engineer in the Earth Sciences and Water Management Section and Water Resources and River Systems Group at Reclamation's Denver Technical Services Center. Prior to moving to Austin he spent three years as Manager of the Alamosa Field Division in Alamosa, Colo.

Throughout Trevino's career with Reclamation, he has gained experience in various computer systems and water management practices and assisted in the implementation of existing and newly developed computer applications and hardware. While working in Denver, Trevino provided technical assistance to many of Reclamation's International clients assisting them in the application of computer hardware and software to address their water management needs.

In 2005, Trevino received the U.S. Department of the Interior Commissioners Superior Service Award. In 2009 he was the recipient of the Cooperative Conservation Award. Trevino has also received numerous performance awards during his tenure with Reclamation. In 1998, he completed Reclamations Executive Leadership Development Program.

Trevino received a Bachelor's of Science degree in Architectural Engineering from the University of Texas in 1980 and a Master's degree in Civil Engineering in May 2000 from the University of Colorado-Denver.

Reclamation is the largest wholesale water supplier and the second largest producer of hydroelectric power in the United States, with operations and facilities in the 17 Western States. Its facilities also provide substantial flood control, recreation, and fish and wildlife benefits. Visit our Web site at [www.usbr.gov/gp](http://www.usbr.gov/gp).
