Subject: NAWS EIS

Dear Sir,

I would like to submit my support for the 'No Action' alternative to the treatment of the waters being handled by the NAWS project.

After listening to several presentations from personnel experienced in such matters and reviewing the Draft EIS I can find no plausible evidence as to why any other alternative would be considered...or why this project has been delayed to this point.

I would heartily endorse the affirmation of this project as expeditiously as possible.

Thank you,

Dennis Voeller, CFE
