**Comments:**

I work for the City of Glenburn where part of my job is to take care of the city's water system. Being the person who works directly with the water, I receive many of the water complaints. They are specifically about how bad the water smells, its bad taste, the coloring that is brown and unsightly looking. Also, many people with heart conditions are advised not to drink the water due to its high salt. So, therefore, I believe the NAWS water would greatly improve our city's water supply and help the health of our citizens.
