Subject: NW Area Water Supply Project

To whom it concerns,

I have been following this project from its inception. I was also born and raised in a small rural ND community and have lived my entire life in the state of North Dakota. It is extremely critical for this project to continue, be completed and become fully operational. I understand some of the environmental concerns but also understand that there has been study after study plus careful planning of the system. It's time to put an end to the dispute and complete this vital project.

Regards,

Paul T. Kramer
