Current Conditions
Snowpack: Colorado River Watershed

- Historical Range (1978-2020)
- Median (1991-2020)
- 2021-2022

Today's % of Normal Peak: 65%
Today's % of Normal: 87%

Data are from the 7 Snotel stations above Denver Water's Upper Colorado diversion facilities.
Snowpack: South Platte River Watershed

Average Water Content (inches)

Historical Range (1979-2020)
Median (1991-2020)
2021-2022

Today's % of Normal Peak: 55%
Today's % of Normal: 79%

Data are from the 7 Snotel stations above Denver Water's Upper South Platte diversion facilities.

Expected Operations in 2022
Denver Water Operations in 2022

Dillon
- Fill in wet plan, 85-90% full under dry and normal conditions
- Will likely run Roberts for most of the irrigation season and over next winter
- Roberts Tunnel inspection scheduled for September

Williams Fork
- Close to full in wet plan, 85-90% full under dry and normal conditions
- Likely Substitution year if average to dry
- Expect limited Wolford Substitution supply
Denver Water Operations in 2022

Fraser Basin/Moffat Tunnel

- Gross Reservoir Expansion Project expected to start in 2022, storage limited to around 65-65% of normal
- Moffat Tunnel diversions expected to meet demands during much of the irrigation season 75 to 150 cfs.
- Upper Williams Fork Collection System diversions will be limited during runoff
