- SWSPs
- Well Permitting

2021 Significant Actions

COLORADO
Division of Water Resources
Department of Natural Resources

April Cameo Call

- 2020-2021's snowpack to the west of Glenwood Springs was poor.
- Streamflows remained low as temperatures in the lower valleys increased and irrigation demands picked up.
- Triggered a Cameo call on 4/14/2021 to meet the increasing irrigation demands of the Grand Valley irrigators.

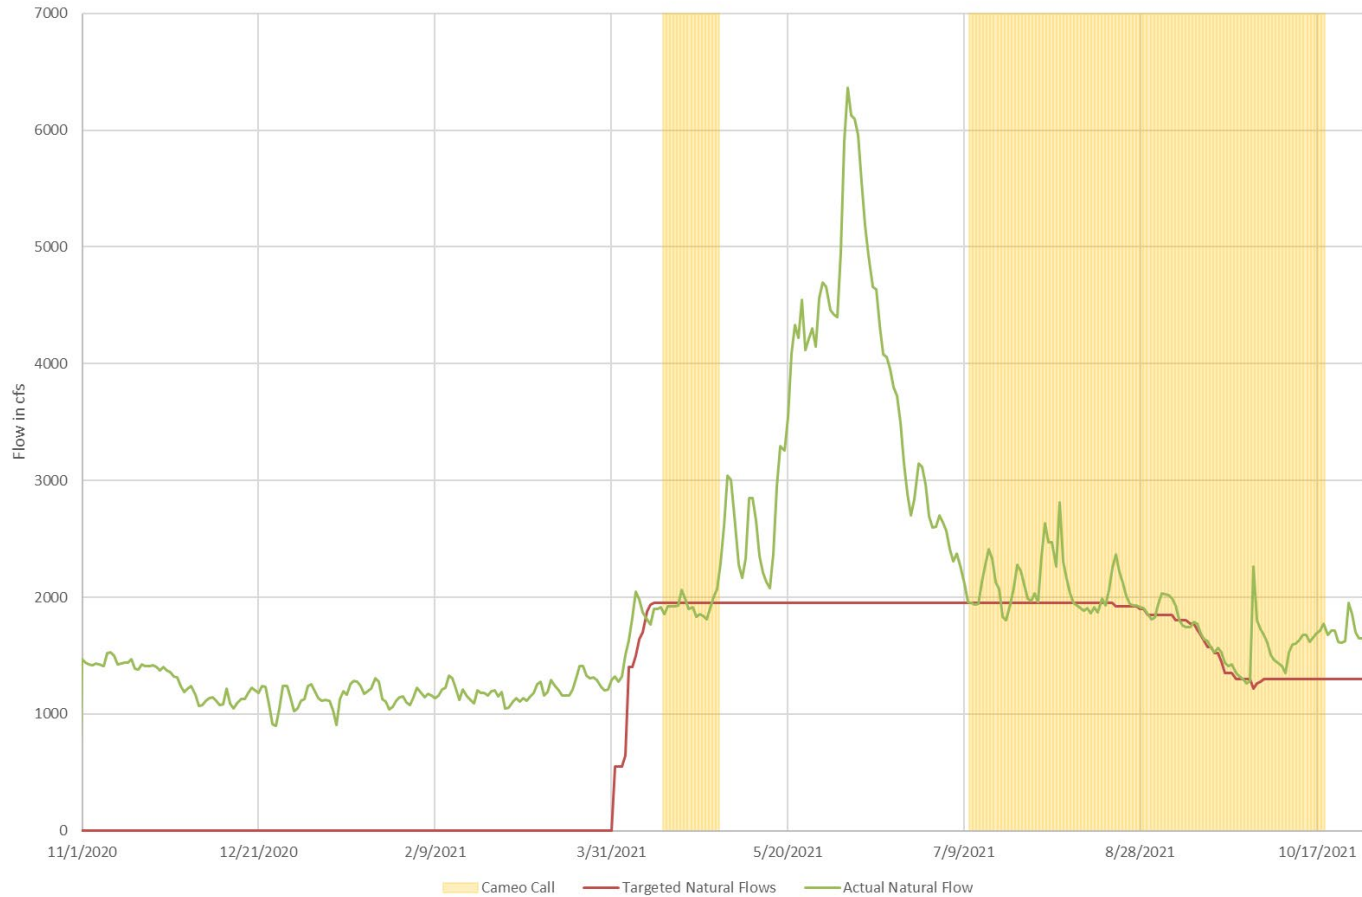

2021 Colorado River at Cameo

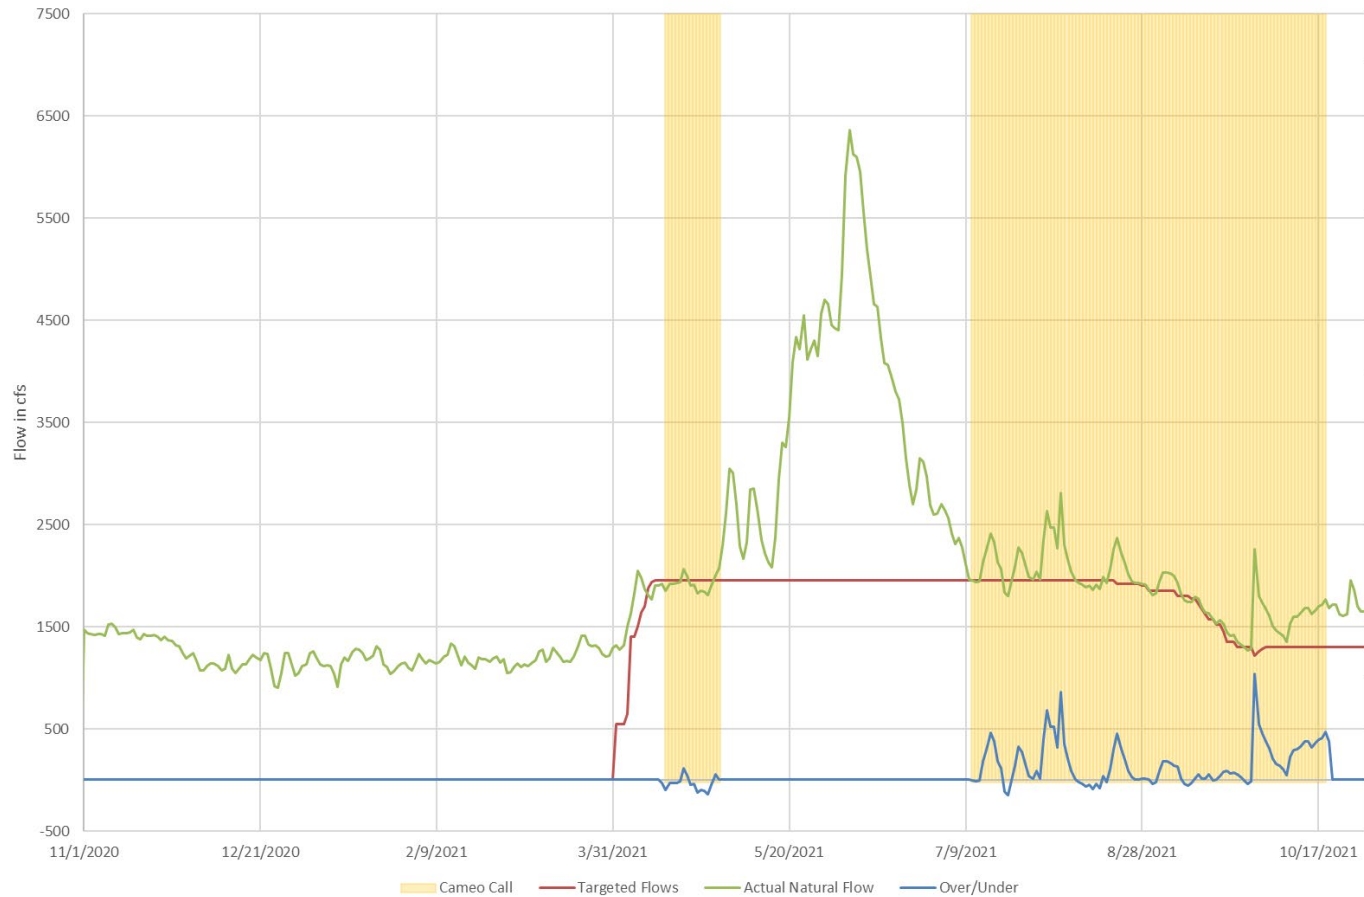

April Cameo Call

- The call started on 4/14/2021 and was released on 4/30/2021 for a total of 16 days of call in April down in the Grand Valley (Cameo Call).
- This exceeded the prior worst case call year of 5 days in 2002.
- Many plans for augmentation were developed with water supplies sufficient only to cover 7 days of call in April.

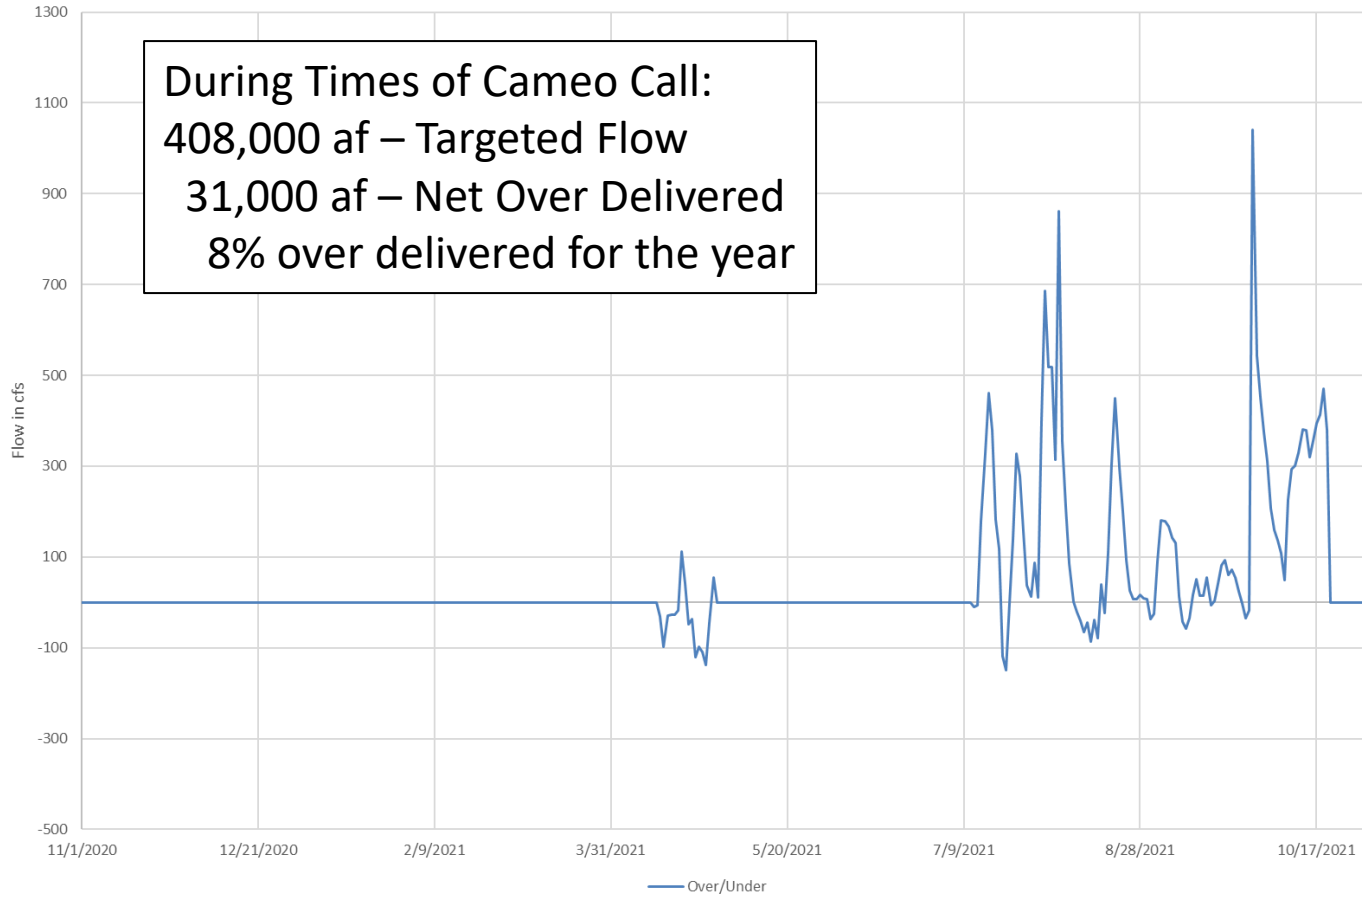

2021 Colorado River at Cameo

2021 Colorado River at Cameo

2021 Colorado River at Cameo

2022 Upcoming Significant Actions

- Identify/work with Aug Plans with insufficient April supplies
- Continue to build out our tools used to administer the river
- Continue to keep lines of communication open
 - Shoshone Outage Protocol
 - River Administration
