Subject: Windy Gap Firing Project Comment
Date: Sunday, December 28, 2008 4:07:58 PM

12/27/08

To Whom It May Concern:

Please add this Comment as an extension of my Comment made December 3, 2008:

The following article, related to lower water levels and resultant influence on water temperatures, stream flow, macroinvertebrates and trout, supports the need for secondary environmental impact statements: <http://www.roaringfork.org/pub/collaborative/>

[Appendix_3.5.1_Climate_Change_Influence_on_Water_Temperature,_Stream_Flow,_and_Trout.pdf](#) as well as [Appendix 1.3 Riparian and instream species of concern.xls](#) in regards to the Windy Gap Firing Project.

The 2 references mentioned above are found in the Roaring Fork Watershed Plan (December 2008) <http://www.roaringfork.org/sitepages/pid272.php>
