Subject: Windy Gap Draft EIS
Dear Will

As a long time Colorado Resident of 50 years, I am concerned about additional water diversions from the upper Colorado River basin. This region depends on water for it's economic lifeblood, both for to recreation and agriculture. I want to register my opinion that I am opposed to additional diversions and drops in streamflows.

At a minimum, I respectfully request that an additional 60 days be added to the review and comment period for the DEIS and that an additional public meeting be held in Longmont or Broomfield.

Thank you for consideration of this request!

Sincerely,

Kent Montgomery
