

PROJECT TITLE: Boundary Fence Replacement

PURPOSE/NEED FOR WORK: A neighboring land owner contacted Reclamation regarding his access road and boundary fence. He believed the boundary fence was put in at the wrong location, favoring Reclamation. Reclamation paid to have the area in question professionally surveyed, and the results yielded that the fence was in fact in the wrong location. There are 3 private landowners affected by this fence line.

DESCRIPTION OF WORK: Canyon Ferry will work with the private landowners to take the old fence down and move it 5 to 25 feet south of its current location using markers staked by the surveyor. The fence will remain a 4-strand barb wire fence with metal fenceposts spaced approximately 16 feet apart. The need for h-braces may arise during the installation, which consists of digging holes 2 feet deep by 6 inches wide with an 8 foot crossmember in between.

LOCATION OF WORK: North Boundary, Lake Park Trail Lewis and Clark County S12, T10 N, R01 W

OTHER PARTICIPANTS:
Montana Conservation Corps
