Stefanie,

I have reviewed the proposed plans presented to those attending the Oct. 12 meeting. As a land owner having more than 1 1/2 miles of river frontage on the Yellowstone below the Big Horn River, I think (1) Yellowtail Dam was definitely put in for flood control and this should be a high priority; (2) The proposed plan is certainly better than the 1000 C.F.S. discharge proposed by the Wyoming representatives; (3) My biggest concern is ensuring there is adequate storage in the Reservoir to store late season heavy rains.

Sorry that my comments are so late.

Mack Cole
