CARLIE RONCA
Wyoming Area Manager

Carlie Ronca provides leadership to roughly 120 talented professionals to provide services throughout the state of Wyoming east of the Continental Divide and into western Nebraska.

The Wyoming Area Office annually provides approximately 2.8 million acre-feet of water releases. Water is supplied to 60 irrigation entities for irrigation of 680,000 acres of land and to 20 cities, municipalities, and companies for municipal and industrial purposes. An average of 800 gigawatt-hours of hydroelectric power generation is produced annually and supplies the needs of 73,000 households. The Wyoming Area Office manages over 500,000 acres of land for beneficial uses. Other benefits include flood control, fish and wildlife enhancement, and recreation.

Ronca joined Reclamation in 2006 as a Natural Resource Specialist and Project Manager. After serving some years in the state public sector, she began her federal career in 1999 in the natural resources fields for the National Park Service. Ronca holds a Master of Science in Biology and a Bachelor of Science in Biology and General Science. She has served as the Wyoming Area Manager since 2014. Before that she was in Reclamation’s Eastern Colorado Area Office in Loveland, Colorado. A graduate of the Reclamation Executive Leadership Program, Ronca has been recognized by customers and stakeholders for her service-oriented approach and ability to produce collaborative and creative solutions to complex issues.
Reclamation has been involved with the conservation and development of Wyoming’s water resources for more than 100 years. The Wyoming Area Office service area includes the states of Wyoming east of the Continental Divide and extends into western Nebraska.

The Wyoming Area Office in Mills, Wyoming, manages multipurpose projects including 20 reservoirs, 3,800 miles of canals and laterals, and 11 operating hydroelectric power plants. The collective storage capacity is more than 4.5 million acre-feet and the combined installed power capacity is over 280 megawatts.
