

Block Leaders in

Boulder Meet

27

LVRJ 10/27/43
Monday evening the block and sector leaders of Boulder City met at the school house for their regular monthly meeting. Mrs. Lucile MacKay, chief block leader was in charge of the meeting. Earl F. Tucker, co-ordinator, also assisted.

A bulletin was given the members containing the latest information on salvage. It is planned in the near future to have a grease collection made by the school children. Glass containers may now be used but the jars must have a tight lid. The question as to whether rancid grease was usable was answered in the affirmative.

Plans for participation in the Hallowe'en celebration to be held in Boulder City Saturday and Sunday were discussed. The Rev. Winston Trever and Elton Garrett were guests of the organization and explained the plans and benefits of the coming community chest drive.

Some of the leaders suggested collection of tin cans more often, and the Rev. Trever announced there would be another collection around the middle of November. He also urged the saving of milk cans, which need not be flattened but must be kept in separate containers, for the collection.

Anyone having clothes which they have outgrown or no longer need may turn them over to the block leader in their section or call Mrs. Lucile MacKay and when enough have been accumulated they will be turned over to the use of some worthy organization.
