

Heart Attack Fatal To Dam Workman

Frank Dean Baker, 39, laborer on the Boulder canyon project, died suddenly this morning, apparently of heart failure, as he went about his duties. He died about nine o'clock.

Baker had been on the job about four days and this morning was walking across the top of the coffer dam when he suddenly slumped to the ground and died before medical aid could reach him.

So far as could be learned, he had no relatives in this section.
