

Reclamation Era Will Re-Appear

12 - 29 - 34

That prosperity is here, or that there is a decided up-turn in government finances is proven by the fact that the "Reclamation Era," a magazine printed and edited under the supervision of the bureau of reclamation, has been reorganized and will appear in a January 19, 1935, issue.

The popular government magazine was discontinued with the publication of May, 1933, because of economy measures of the government.

The publication deals with engineering, laws, opinions, economics, finances, farm homes, and bureau of reclamation project. The price for subscription is seventy-five cents per year.
