

# RFC MAN OKEHS DAM POWER LINE

---

LOS ANGELES, April 4. (U.P.)—Approval of the engineering methods in the construction of the Boulder dam power transmission line by the municipal bureau of power and light, was expressed today by Morton McCartney, chief engineer for the RFC, following an inspection trip which finished today.

"This is a big job, even in these days of large undertakings," he said.

"The construction of this line has opened new pathways in engineering practice and the RFC realizes its importance to Los Angeles and its entire metropolitan area."
