

DAM POWER LINE HEARING IS SET

Hearing on the creation of the Pioche power district for the purpose of constructing a transmission line to carry Boulder dam power to this important Lincoln county mining district, will be held in Pioche on June 12, according to word received here today.

The hearing, conducted by the public service commission under the new statute covering creation of power districts, was scheduled to be held in Carson City on May 29, but was postponed to the June date in order that the commission might meet in Pioche to survey the proposal on the ground.

A meeting of the state planning board has been called for the same date, and it is expected that both boards will meet together to go over the project.
