

Kingman Road Oil Job to Be Finished

7-35
Oiling of 45 miles of the Kingman-Boulder dam highway to be completed this fall is virtually assured, according to word received here today from Kingman.

The plan calls for oiling the first 25 miles south of the dam itself, and for similarly surfacing 20 miles of the Kingman - Chloride route.

This was not in the original program of the Arizona state highway commission, but has been insisted upon by the bureau of public roads, it was indicated in the dispatch.
