

Ocean of More Than 300 Chimneys With No Smoke Is Feature of Boulder City

More than 300 smokeless chimneys, all in one group!

That's the sight that unfolds to the view of him who comes to Boulder City.

A veritable sea of chimnies arises from the group of Six Companies houses—and not one of this group sends forth the friendly wisp of smoke generally

associated with chimneys in ones mind.

For oil burners, electric heaters and what-have-you supply heat for the residents of this colony of Six Company employes.

Coal and wood are among the missing among these 300 houses on the "avenues"; hence the sea of smokeless chimneys.
