

Traffic delays planned at dam

SUN STAFF REPORTS

Repair of road damage on Highway 93 on the Nevada and Arizona approaches to Hoover Dam will result in traffic delays of up to 30 minutes at the dam between now and March 25.

Patching and sealing of the road surface, damaged by winter's wet weather and the heavy volume of traffic across the dam, will be performed between 7:30 a.m. and 4 p.m. every day except Sunday.

During the construction period, motorists will encounter periods of one-way traffic across the dam.

Traffic flow is not expected to be affected before 7:30 a.m. or after 4 p.m.
