

The effect of Six Companies payroll on business conditions in the southern Nevada area has never been better illustrated than during the past few months. From the peak of some 3,700 men on the payroll last spring, the Boulder Dam contractors dropped under the 2,000 mark for several weeks in a row. With the assurance of a \$23,000,000 fund for the coming year, however, the forces have been gradually increased reaching 3019 yesterday. More men are being added daily, and the effect on business is quite marked. It will continue on the upgrade thruout the fall and winter months.
