

BOULDER DAM EMPLOYMENT (Several)

The contract for the construction of the Hoover Dam has just been awarded to the Six Companies, Incorporated, 760 Market street, San Francisco, California.

Practically all construction work on the Boulder Dam will be let to private contractors, and laborers, helpers, cooks, skilled mechanics and foremen will be employed directly by the contractors and not by the Government. Applications should be made directly to the contractors and not to the Government.

Moreover, the March issue of the New Reclamation Era issues a warning that opportunities for employment in connection with construction of the Hoover Dam will not exist for ninety days or more. Under existing conditions, none should go to Las Vegas, Nevada, unless he is assured of employment upon arrival, or is equipped with independent means to carry him over a period of several months. In fact, the United States Employment Service at Las Vegas has on hand applications sufficient to care for possible employment needs for the next six months.
