

# Fire Station Base

## Pouring Today

1/20/32  
Pouring of concrete foundations for the Boulder City fire house and government garage was expected today, according to Claude H. White, of the contracting firm Alter and White, who are doing the work under contract awarded by the Bureau of Reclamation.

The contractors, from Elko, have 90 days in which to finish the job from the time of receipt of notice to proceed.

The station will be located at the intersection of Nevada and Avenue B, facing eastward on the boulevard. The southwest end of the structure will be devoted to fire equipment housing, the remainder to garage facilities for the Bureau of Reclamation.
