

Where the Mighty Colorado

These views give you some idea of the country that man has picked to stop the mighty Colorado river. The two upper views are airplane views of the site of the great Hoover Dam that is going to impound water for power and irrigation purposes. The lower

right shows the place where the first dam was done, many miles from the dam. The lower center picture shows the river taken from a spot near where the Hoover Dam is now being built. The lower right picture shows the

Who Will Be Stopped by Man

The first actual construction work was
am. The lower left is a view of the
where the new dam will be erected.
vs the plane that flew there to get the

pictures and 1931 Chevrolet roadster. These pictures were fur-
nished through the courtesy of the Shell Oil company and the
Chevrolet Motor Car company. The contract for the dam was
signed a couple of weeks ago and a western firm got the contract.
